New SDS Test Materials, SDS Test Certification Cost

For one thing, the most advanced operation system in our company which can assure you the fastest delivery speed on our SDS exam questions, and your personal information will be encrypted automatically by our operation system. For another thing, with our SDS actual exam, you can just feel free to practice the questions in our training materials on all kinds of electronic devices. In addition, under the help of our SDS Exam Questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future.

DASCA Senior Data Scientist Sample Questions (Q83-Q88):

NEW QUESTION # 83

The aim of developing Scribe was to offer reliability with using:

- A. None of the above
- B. High disk space usage
- C. Extensive protocols
- D. Complex protocols

Answer: A

Explanation:

Scribe is a server developed by Facebook for aggregating log data streamed in real time from many servers.

Its primary aim was reliability and simplicity in collecting logs at scale.

Unlike other systems, Scribe was designed to avoid complex or extensive protocols and to ensure lightweight log transfer.

It also avoids unnecessary high disk usage, relying instead on efficient pipelines.

Thus, the correct answer is Option D (None of the above).

NEW QUESTION # 84

Which of the following is NOT Structured data?

- A. XML
- B. CSV files
- C. Relational databases
- D. Data tables
- E. None of the above

Answer: A

Explanation:

Structured data refers to highly organized data stored in predefined formats such as rows and columns.

Relational databases (Option A): Structured.

Data tables (Option B): Structured.

CSV files (Option C): Structured because they are tabular with rows and columns.

XML (Option D): Not structured but semi-structured because it stores hierarchical information with tags and attributes.

Thus, the correct answer is Option D (XML).

NEW QUESTION # 85

Which of the following is TRUE for Chief Data Monetization Officer (CDMO)?

- i. CDMO should focus on driving and deriving value from the organization's data and analytic assets.
- ii. The CDMO should own the organization's investment decisions with respect to data and analytics.
- iii. CDMO should have revenue and margin responsibilities.

- A. i, ii
- B. ii, iii
- C. All of the above

Answer: C

Explanation:

The Chief Data Monetization Officer (CDMO) is a C-level executive role emerging in data-driven organizations. Their focus is on turning data into business value and revenue growth.

Statement i: Correct. The CDMO is responsible for value realization from data and analytics investments.

Statement ii: Correct. The CDMO owns decisions around investment prioritization for data initiatives.

Statement iii: Correct. Since monetization is directly linked to business performance, the CDMO must be accountable for revenue and margin impact.

Hence, all three statements are correct, making the right answer Option C (All of the above).

NEW QUESTION # 86

Which of the following is a "thinking like a data scientist" decomposition process?

- A. Business Initiative
- B. Business Stakeholder
- C. Both B and C
- D. All of the above
- E. Strategic Nouns

Answer: D

Explanation:

The "Thinking Like a Data Scientist" (TLADS) decomposition process is a structured approach to align data science projects with business goals. It breaks complex business problems into smaller, analyzable parts:

Business Initiative (Option A): Defines the overarching organizational challenge or objective (e.g., reduce churn, increase revenue).
Business Stakeholder (Option B): Identifies decision-makers and end users whose requirements shape the use cases.
Strategic Nouns (Option C): Focuses on the entities (e.g., customer, product, supplier) that generate and consume data, serving as anchors for analytics design.
Since all three are valid elements of the TLADS decomposition, the correct answer is Option E (All of the above).

NEW QUESTION # 87

Which of the following is TRUE for Business Metamorphosis?

- A. Business Metamorphosis exercise can uncover Big Data requirements around decisions, analytics and data sources that can be leveraged to transform or metamorphose your organization's business model
- B. The Business Metamorphosis phase is where organizations integrate the insights that they captured about their customers' usage patterns, product performance behaviors, and overall market trends to transform their business models
- C. The Business Metamorphosis phase helps drive an organization's core business model through the analytic insights gathered as the organization traverses the Big Data Business Model Maturity Index
- D. Both A and C
- E. All of the above

Answer: E

Explanation:

Business Metamorphosis is the most advanced phase in the Big Data Business Model Maturity Index (BDBMMI), where organizations fundamentally transform their business models through analytics-driven insights.

Option A: Correct. This phase helps organizations identify big data requirements related to decisions, analytics, and sources that drive business transformation.

Option B: Correct. Organizations integrate customer usage patterns, product behaviors, and market trends into their decision-making to redesign or innovate their business model.

Option C: Correct. Business Metamorphosis ensures that the core business model evolves continuously, guided by insights derived across maturity stages.

Since all are correct, the best answer is Option E (All of the above).
