You always need actual and updated NGFW-Engineer exam questions to prepare the test successfully in less time. If you don't study with real Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) questions, you will ultimately fail and waste your money and time. To save yourself from this loss, you just need to prepare with updated Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) exam questions of Dumpcollection.

In order to ensure the quality of our NGFW-Engineer preparation materials, we specially invited experienced team of experts to write them. The content of our NGFW-Engineer practice engine comes from a careful analysis and summary of previous exam syllabus, so that you can accurately grasp the core test sites. At the same time, our professional experts are keeping a close eye on the changes of the exam questions and answers. So that our NGFW-Engineer Study Guide can be the latest and most accurate.

NGFW-Engineer Actual Test - NGFW-Engineer Test Questions & NGFW-Engineer Exam Torrent

For further and better consolidation of your learning on our NGFW-Engineer exam questions, our company offers an interactive test engine-Software test engine. And this version is also popular for the advantage of simulating the real NGFW-Engineer exam. Please pay attention to the point that the Software version of our NGFW-Engineer preparation guide can only apply in the Windows system. When you are practicing with it, you will find that every time you finished the exam, the exam scores will come out.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which statement applies to the relationship between Panorama-pushed Security policy and local firewall Security policy?

- A. When a policy match is found in a local firewall policy, if any Panorama shared post-rule is configured, it will still be evaluated.
- **B. Local firewall rules are evaluated after Panorama pre-rules and before Panorama post-rules.**
- C. Panorama post-rules can be configured to be evaluated before local firewall policy for the purpose of troubleshooting.
- D. The order of policy evaluation can be configured differently in different device groups.

Answer: B

Explanation:

Local firewall rules are evaluated after Panorama pre-rules (those applied before the firewall's local policies) and before Panorama post-rules (those applied after the firewall's local policies). This ensures that the local firewall rules do not override the central Panorama policy and are only applied in the appropriate order within the policy evaluation sequence.

NEW QUESTION # 58

Which type of firewall resource can be assigned when configuring a new firewall virtual system (VSYS)?

- A. Security profile limit
- B. Memory
- **C. Sessions limit**
- D. ICP

Answer: C

Explanation:

When configuring a new firewall virtual system (VSYS) on a Palo Alto Networks firewall, one of the resources that can be assigned is the sessions limit. This setting allows the administrator to control the number of active sessions that can be handled by the VSYS, ensuring that each virtual system has an appropriate allocation of resources based on its needs.

NEW QUESTION # 59

Which two zone types are valid when configuring a new security zone? (Choose two.)

- A. Internal
- **B. Virtual Wire**
- **C. Tunnel**
- D. Intrazone

Answer: B,C

Explanation:

When configuring a new security zone on a Palo Alto Networks firewall, the two valid zone types are:

Tunnel: A Tunnel zone is used for traffic that is associated with a VPN tunnel, such as IPSec tunnels. Traffic passing through a tunnel interface is classified into this zone.

Virtual Wire: A Virtual Wire zone is used when a firewall operates in transparent mode (also known as Layer 2 mode). In this configuration, the firewall can inspect traffic without modifying the IP address structure of the network.

NEW QUESTION # 60

An administrator is designing a public key infrastructure (PKI) integration for a large-scale deployment with thousands of users authenticating via client certificates. A key design goal is to ensure that certificate revocation status is checked efficiently with minimal impact on firewall performance and minimal delay for the connecting user.

What is the primary advantage of using the Online Certificate Status Protocol (OCSP) instead of certificate revocation lists (CRLs) in this scenario?

- A. OCSP bundles all certificate statuses into a single, digitally signed file for faster downloads by the firewall.
- B. OCSP allows the firewall to act as its own certificate authority (CA), and it simplifies certificate management.
- **C. OCSP provides real-time status for a certificate on demand, is more scalable, and uses less firewall memory.**
- D. OCSP is an older, more widely supported protocol than CRLs. ensuring compatibility with all client devices.

Answer: C

Explanation:

OCSP enables on-demand, real-time validation of individual certificate status instead of downloading and storing large revocation lists, which makes it more scalable for large user populations, reduces memory and processing load on the firewall, and minimizes authentication delay for users.

NEW QUESTION # 61

A network architect is planning the deployment of a new IPSec VPN tunnel to connect a local data center to a cloud environment. The plan must include all necessary Security policy configurations for both tunnel negotiation and data transit.

Which two Security policy requirements must be included in the implementation plan? (Choose two.)

- A. A policy must explicitly permit the IPSec container application between the external-facing zone and local zone.
- **B. A pair of policies is required to control the flow of data traffic into and out of the security zone assigned to the tunnel interface.**
- **C. A policy must explicitly permit only the IKE application between the external-facing zone and local zone.**
- D. The default interzone-default security policy is sufficient to allow the tunnel negotiation traffic between the firewall and the remote peer.

Answer: B,C

Explanation:

IKE negotiation traffic must be explicitly permitted between the external-facing zone and the local zone so the tunnel can be established, and separate Security policy rules are required to control the actual user/data traffic entering and leaving the zone assigned to the tunnel interface to enforce what can traverse the VPN.

NEW QUESTION # 62

.....

The clients can download our products and use our NGFW-Engineer study materials immediately after they pay successfully. Our system will send our NGFW-Engineer learning prep in the form of mails to the client in 5-10 minutes after their successful payment. The mails provide the links and if only the clients click on the links they can log in our software immediately to learn our NGFW-Engineer Guide materials. As long as the clients buy our NGFW-Engineer training quiz they can immediately use our product and save their time.

NGFW-Engineer Latest Test Dumps: https://www.dumpcollection.com/NGFW-Engineer_braindumps.html

Do you want to show your ability through gaining a valuable Palo Alto Networks NGFW-Engineer Latest Test Dumps NGFW-Engineer Latest Test Dumps certificate, We are confident that our NGFW-Engineer exam questions and services are competitive, Palo Alto Networks Certification NGFW-Engineer Exam Dumps However, to pass this certification is a bit difficult, The NGFW-Engineer exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing NGFW-Engineer study materials, I strongly believe that you can find the version you want in multiple choices of our NGFW-Engineer practice test.

Knuth examines several properties of permutations NGFW-Engineer and considers the general case where equal elements are allowed to appear, Others Are Hybrid Apps, Do you want to Certification NGFW-Engineer Exam Dumps show your ability through gaining a valuable Palo Alto Networks Network Security Administrator certificate?

100% Pass Quiz 2026 Palo Alto Networks NGFW-Engineer – Professional Certification Exam Dumps

We are confident that our NGFW-Engineer Exam Questions and services are competitive, However, to pass this certification is a bit difficult, The NGFW-Engineer exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing NGFW-Engineer study materials.
