## Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q123-Q128):

### NEW QUESTION # 123

A Household Account has Contacts with Affiliations, Relationships, and Closed/Won donations associated with it. What is the outcome when a system admin attempts to delete this Household Account record?

- A. Since Closed/Won donations are associated with the Account record, an error message displays.
- B. The Household Account record and its standard related records are deleted.
- C. The Household Account record and its standard related records remain.
- D. Since Affiliations and Relationships are associated with the Contacts in this Account, an error message displays.

**Answer: A**

### NEW QUESTION # 124

The event manager for a nonprofit organization periodically imports a cleaned, structured list of event registrations. Now should the consultant set up the TDTM Trigger Handlers?

- A. Disable the Trigger Handler using Apex instead of TDTM.
- B. Disable Opportunity Contact Role trigger handlers.
- C. Disable TDTM for specific users.
- D. Disable TDTM for all users.

**Answer: C**

Explanation:

Explanation

### NEW QUESTION # 125

A system admin used NPSP Contact Merge and notices the number of household accounts has changed from 12,345 to 12,300 and is concerned that accounts have been lost.

What is the likely cause for the missing accounts?

- A. The merge automatically creates Household Accounts.
- B. The merge converts Household Accounts to Household custom object records.
- C. The merge automatically deletes any empty Household Accounts without Contacts or Opportunities.
- D. The merge combines Household Accounts with Contacts.

**Answer: C**

Explanation:

<https://powerofus.force.com/s/article/NPSP-Merging-Contacts>

When using the NPSP Contact Merge functionality, any empty Household Accounts that do not have associated Contacts or Opportunities are automatically deleted. This is likely the cause of the reduction in the number of household accounts noticed by the system administrator.

Steps to Verify:

\* Check Merge Settings:

\* Review the settings and configuration of the NPSP Contact Merge process to understand its behavior regarding empty Household Accounts.

\* Review Audit Logs:

\* Check the Salesforce audit logs to see the details of the merge operations and confirm that empty Household Accounts were deleted.

\* Restore if Necessary:

\* If the deletion of empty Household Accounts was unintended, use data recovery options to restore any necessary records.

### NEW QUESTION # 126

A nonprofit has a membership program it wants to manage in Salesforce.

What are two items the consultant needs to configure so the membership rollups in NPSP work properly?

- A. Set a grace period for memberships.
- **B. Select the membership record type for membership rollups.**
- **C. Create an Opportunity record type for memberships.**
- D. Create a custom field for Membership Amount and select it for membership rollups.

**Answer: B,C**

Explanation:

To ensure that the membership rollups in NPSP (Nonprofit Success Pack) work properly for managing a membership program, the consultant needs to configure the following items:

Select the membership record type for membership rollups:

This involves defining which Opportunity record types are used for membership donations. This configuration allows the NPSP to properly identify and roll up membership donations.

Reference:

Create an Opportunity record type for memberships:

Opportunity record types allow different types of opportunities (such as donations, memberships, etc.) to be tracked and managed separately. Creating a specific Opportunity record type for memberships ensures that these are properly categorized and can be used in rollup calculations.

### NEW QUESTION # 127

A nonprofit customer is concerned about its users having their Salesforce usernames and passwords compromised. Which Salesforce security feature should the consultant recommend?

- **A. Set up two-factor authentication**
- B. Add IP ranges on user profiles
- C. Specify a Trusted IP Range for each user
- D. Specify a My Domain login policy for its Salesforce instance

**Answer: A**

Explanation:

To enhance the security of Salesforce usernames and passwords and prevent them from being compromised, setting up two-factor authentication (2FA) is the recommended approach. Here's how to implement it:

Enable Two-Factor Authentication for the Org:

Navigate to Setup.

In the Quick Find box, type "Two-Factor Authentication" and select it.

Enable 2FA at the organization level.

Assign 2FA to User Profiles:

Go to the user profiles that require 2FA.

Under the profile settings, enable the requirement for two-factor authentication.

Configure 2FA Methods:

Allow users to register their preferred authentication method (e.g., Salesforce Authenticator app, SMS, email, or third-party authenticator apps).

Ensure users set up their 2FA methods through their personal settings.

User Training and Support:

Provide training materials and support to help users understand and set up 2FA.

Offer assistance for troubleshooting common issues during the setup process.

Monitor and Enforce:

Use Salesforce's monitoring tools to ensure compliance with 2FA requirements.

Regularly review and update security policies to maintain a high level of security.

Implementing two-factor authentication significantly reduces the risk of account compromise by adding an extra layer of security beyond just usernames and passwords.
