Our Chrome-Enterprise-Administrator training quiz is your best choice. With the assistance of our Chrome-Enterprise-Administrator study materials, you will advance quickly. Also, all Chrome-Enterprise-Administrator Guide materials are compiled and developed by our professional experts. So you can totally rely on our Chrome-Enterprise-Administrator exam simulating to aid you pass the exam. Furthermore, you will learn all knowledge systematically, which can help you memorize better.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q17-Q22):

### NEW QUESTION # 17

A user reports having frequent issues accessing corporate pages and logging into corporate applications. After looking into user reports, it is determined that other users have reported similar issues over the past few months. While the broader investigation is launched to identify and resolve the root cause, which Google Admin remote actions for managed Chrome browsers can be used to help alleviate such issues for the user?

- A. Clear Cache and Cookies; Delete Temporary Files; Restart User Session
- B. Clear Cookies; Restart Browser; Logout User
- **C. Clear Cache; Clear Cookies; Clear Cache and Cookies**
- D. Clear Cache; Delete Temporary Files; Delete Swap File

**Answer: C**

Explanation:

Clearing the browser's cache and cookies is a common first-line troubleshooting step for issues related to website access and login problems. Outdated or corrupted cached data and cookies can often interfere with website functionality and authentication processes. The Google Admin console provides remote actions to "Clear Cache," "Clear Cookies," or both. Options B, C, and D include actions that are either more disruptive (restart browser, logout user, restart user session) or not standard remote actions available for managed Chrome browsers through the Admin console (delete temporary files, delete swap file).

### NEW QUESTION # 18

Chrome Browser Cloud Management has been successfully implemented at a company for the past year.

Recently, the engineering team has received feedback from the security team that Chrome browsers are not meeting patching Service Level Agreements (SLAs). In the Insight report, the engineering team sees that 30% of their companies' browsers are pending updates.

Which browser policy could the engineering team implement to ensure better compliance with the security team's patching requirement?

- A. Auto-update check period
- B. Relaunch notification
- C. Chrome browser updates
- D. Google updater policy precedence

**Answer: A**

Explanation:

To ensure timely patching, the engineering team should adjust the "Auto-update check period" policy. By shortening this period, Chrome browsers will check for updates more frequently, increasing the likelihood of applying security patches sooner and improving compliance with patching SLAs. "Chrome browser updates" is a general category, "Relaunch notification" affects when users are prompted to restart, and "Google updater policy precedence" deals with the order of policy application, not the frequency of checks.

### NEW QUESTION # 19

What report types are available in Google Chrome Enterprise Core on the Chrome Insights Report page'?

- A. Chromium browsers, Devices that need to be purchased, Devices that have been used by family members
- B. Devices that need attention, Devices that need to be purchased, Devices that have been used by family members
- C. Browsers pending updates, Browsers without activity in the past 28 days, Browsers that have been recently enrolled
- D. Device Fleet Hardware report, Browsers that need attention, Chromium browsers

**Answer: C**

Explanation:

The Chrome Insights Report in the Google Admin console provides visibility into the managed Chrome browser environment. Key report types available here include "Browsers pending updates" to identify devices needing patching, "Browsers without activity in the past 28 days" to understand browser usage, and "Browsers that have been recently enrolled" for monitoring onboarding. The other options list reports that are either not specific to Chrome Insights or related to device hardware rather than browser status.

### NEW QUESTION # 20

An administrator identifies that the next major Chrome release, Chrome 130, has an issue with one of their critical business applications. The company's Chrome browsers are currently on version 129.0.6568.91. The administrator needs to prevent browsers from updating to Chrome 130, while allowing continued updates within the Chrome 129 major version.

Which target version prefix should the administrator use in the updates setting to achieve this?

- A. 129(
- B. 129""
- C. 129.
- D. 0

**Answer: C**

Explanation:

To target all updates within the 129 major version, the administrator should use the target version prefix `129.

` . This tells Chrome to stay within the 129 branch and accept minor updates (like 129.0.x.y to 129.1.x.y) but not to upgrade to the next major version (130). The other options are not the correct syntax for specifying a major version prefix for target updates.

### NEW QUESTION # 21

In Chrome's Safe Browsing settings, which option provides the most robust protection against online threats and is suitable for a highly secure environment?

- A. Proactive Defense
- B. Secure Browsing Mode
- **C. Enhanced Protection**
- D. Advanced Threat Protection

**Answer: C**

Explanation:

Among the Safe Browsing options, **Enhanced Protection** offers the most robust security. It proactively checks URLs, downloads, and extensions against Google's Safe Browsing database in real time, and it can also share more data with Google to improve detection and provide personalized warnings. This level of protection is best suited for environments with high security requirements. The other options might represent different levels of Safe Browsing with varying degrees of protection.

### NEW QUESTION # 22

.....

About Google Chrome-Enterprise-Administrator Exam, each candidate is very confused. Everyone has their own different ideas. But the same idea is that this is a very difficult exam.
