New CLO-002 Test Fee, Practice CLO-002 Tests

The CompTIA Cloud Essentials+ Certification Exam certification exam is one of the top-rated career advancement CLO-002 certifications in the market. This CompTIA Cloud Essentials+ Certification Exam certification exam has been inspiring candidates since its beginning. Over this long period, thousands of CompTIA Cloud Essentials+ Certification Exam exam candidates have passed their CLO-002 Certification Exam and now they are doing jobs in the world's top brands.

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q328-Q333):

NEW QUESTION # 328
Which of the following is used to connect on-premises resources to resources located in a cloud environment?

- A. Virtual private network

- B. Software-defined network
- C. Access control list
- D. Secure file transfer protocol

Answer: A

Explanation:
A virtual private network (VPN) is a technology that creates a secure and encrypted connection over a public network, such as the internet, between two or more endpoints. A VPN can be used to connect on-premises resources to resources located in a cloud environment, such as a virtual private cloud (VPC), which is a private network hosted within a public cloud. A VPN allows the on-premises and cloud resources to communicate with each other as if they were on the same local network, without exposing the traffic to the public internet. A VPN can help to ensure the privacy, security, and reliability of the data and applications that are transferred between the on-premises and cloud environments.

NEW QUESTION # 329
A military facility is NOT able to fully embrace cloud computing because of which of the following?

- A. The associates cost and infrastructure needs
- B. Constantly changing data and accessibility needs
- C. High degree of confidentiality and operational assurance
- D. Constantly changing and unpredictable workloads

Answer: C

NEW QUESTION # 330
Which of the following BEST describes decreasing the resources assigned to a system to avoid paying for unused capacity?

- A. Orchestration
- B. Right-sizing
- C. Auto-scaling
- D. Scalability

Answer: B

NEW QUESTION # 331
A company houses all its networking equipment in a third-party data center, but uses its technicians to support the networking equipment. Of which of the following types of clouds is this an example?

- A. IaaS
- B. PaaS
- C. SaaS
- D. XaaS

Answer: A

NEW QUESTION # 332
Which of the following deployment models includes application components on a company's network as well as on the Internet?

- A. Public
- B. Community
- C. Private
- D. Hybrid

Answer: D

Explanation:
A hybrid cloud deployment model includes application components on a company's network as well as on the Internet. A hybrid

cloud is a combination of two or more cloud deployment models, such as public, private, or community, that are connected by a common network or technology. A hybrid cloud allows the company to leverage the benefits of both public and private clouds, such as scalability, cost-efficiency, security, and control. A hybrid cloud can also enable the company to use different cloud services for different types of workloads, such as sensitive data, high-performance computing, or disaster recovery12.
