

Unparalleled Test Plat-Admn-202 Sample Online for Real Exam

BONUS!!! Download part of Actual4test Plat-Admn-202 dumps for free: https://drive.google.com/open?id=1eOeJz72NSeuCM92_CAeitfdDdyNSNowz

They are not forced to buy one format or the other to prepare for the Salesforce Certified Platform App Builder Plat-Admn-202 exam. Actual4test designed Salesforce Plat-Admn-202 exam preparation material in Salesforce Certified Platform App Builder Plat-Admn-202 PDF and practice test. If you prefer PDF Dumps notes or practicing on the Salesforce Certified Platform App Builder Plat-Admn-202 practice test software, use either.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 2	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.

Topic 3	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 4	<ul style="list-style-type: none"> • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 5	<ul style="list-style-type: none"> • Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

Valid Plat-Admn-202 Dumps | Plat-Admn-202 Certification Dumps

Our aim is to provide customers with actual Salesforce Plat-Admn-202 questions so they pass their Salesforce Certified Platform App Builder (Plat-Admn-202) exams with confidence. We offer a free demos and up to 365 days of free Salesforce Dumps updates. One of the key elements of our approach is following the current exam content. Our Plat-Admn-202 product is designed by experienced industry professionals and is regularly updated to reflect the latest changes in the Plat-Admn-202 test content.

Salesforce Certified Platform App Builder Sample Questions (Q129-Q134):

NEW QUESTION # 129

Universal Containers manages leads in a Lead qualification queue where sales reps can accept ownership of the Lead. Campaign members are required to have a sales owner.

What validation rule should an app builder configure?

- A. **AND(ISNEW(), ISBLANK(Lead.Owner:User.Id))**
- B. NOT(ISBLANK(Lead.Owner:Queue.Id))
- C. AND(ISBLANK(Lead.Owner.Id))
- D. NOT(ISNEW() && ISBLANK(Lead.Owner:Queue.Id))

Answer: A

Explanation:

The validation rule should be AND(ISNEW(), ISBLANK(Lead.Owner:User.Id)). This rule will prevent saving a new lead record if the owner is not a user. This will ensure that campaign members have a sales owner. Option A is incorrect because it will prevent saving any lead record if the owner is blank, which is not the requirement. Option B is incorrect because it will prevent saving an existing lead record if the owner is a queue, which is not the requirement. Option D is incorrect because it will prevent saving any lead record if the owner is a queue, which is not the requirement.

NEW QUESTION # 130

An app builder at Cloud Kicks has been working on changes to a custom Shoe Sales app in a sandbox and is ready to deploy their changes to production with a change set. Part of the work included updates to a permission set.

What should the app builder take into consideration when deploying the change set to production?

- A. The existing permission set will be completely overwritten.
- B. The deployed permission set will manage with the existing permission set.
- C. Change to field-level security in the permission set will not be applied.
- **D. The deployed permission set will only contain changes related to the change set.**

Answer: D

Explanation:

Reference:

Salesforce Help - Permission Sets

NEW QUESTION # 131

The case handling process at Universal Containers includes multiple steps including approvals, notifications, and fields updates. To manage and evaluate all of these changes in a single save operation, an app builder wants to use Process Builder and the Advanced option to let the process evaluate a record multiple times has been selected.

Which two options should the app builder avoid to prevent recursion?

Choose 2 answers

- **A. The ISCHANGED function**
- B. Setting a criteria node to No criteria-just execute the procedure
- **C. Invocable processes**
- D. IF statements

Answer: A,C

Explanation:

The two options that the app builder should avoid to prevent recursion are setting a criteria node to No criteria-just execute the procedure and invocable processes. Setting a criteria node to No criteria-just execute the procedure means that the process will always execute the actions regardless of the record values, which can cause recursion if the process updates the same record that triggered it. Invocable processes are processes that can be invoked from another process or a flow, which can cause recursion if the invocable process updates the same record that triggered the parent process or flow. Option A is incorrect because IF statements are not an option in Process Builder, but rather a function that can be used in formulas or conditions. Option D is incorrect because the ISCHANGED function is not an option in Process Builder, but rather a function that can be used in formulas or conditions to check if a field value has changed.

NEW QUESTION # 132

Cloud Kicks recently implemented the application lifecycle management process to its release management strategy.

Which category handles bug fixes and simple changes?

- **A. Patch**
- B. Major
- C. Rollback
- D. Minor

Answer: A

Explanation:

The category that handles bug fixes and simple changes is minor. A minor release is a type of release that introduces small enhancements or fixes to existing functionality, such as correcting spelling errors or improving performance. A minor release usually has a low impact on users and does not require extensive testing or training. A patch release is a type of release that addresses critical issues or defects that affect the functionality or security of an application, such as fixing broken links or resolving vulnerabilities. A patch release usually has a high impact on users and requires immediate deployment. A major release is a type of release that introduces new functionality or features to an application, such as adding new objects or components or changing business processes. A major release usually has a high impact on users and requires extensive testing and training. A rollback is not a type of release, but an action that reverses a release that has been deployed to an environment, such as undoing changes or restoring previous versions. A rollback may be necessary if a release causes errors or issues that affect the functionality or performance of an application.

NEW QUESTION # 133

An app builder wants to add the option to 'Send New Email' from Leads, Contacts and Accounts for users on mobile. What is the benefit of using global actions to accomplish this?

- A. Global actions are record-specific and are available when searching that particular
- **B. Global actions can be accessed anywhere actions are pages, feed and Chatter groups,**
- C. Salesforce Lightning Component Library houses existing global actions prebuild for use.
- D. The global action's layout automatically clones the default page layout.

Answer: B

Explanation:

Global actions can be accessed anywhere actions are pages, feed and Chatter groups. This is correct because global actions are not tied to a specific object, and they can be added to any page that supports actions, such as record pages, home pages, feed pages, and Chatter groups.

NEW QUESTION # 134

.....

If you want to be familiar with the real exam before you take it, you should purchase our Software version of the Plat-Admn-202 learning guide. With our software version of Plat-Admn-202 exam material, you can practice in an environment just like the real examination. And please remember this version can only apply in the Windows system. You can install the Plat-Admn-202 Study Material test engine to different computers as long as the computer is in Windows system.
