

100% Pass Juniper - JN0-664 - Reliable Printable Service Provider, Professional (JNCIP-SP) PDF

2026 Latest Pass4Leader JN0-664 PDF Dumps and JN0-664 Exam Engine Free Share: https://drive.google.com/open?id=123IC5rKx5HmkUutcTP96G1Ed_NgmWgTY

We have technicians to check the website every day, and therefore if you choose us, you can enjoy a safe online shopping environment. In addition, JN0-664 exam materials are compiled and verified by professional specialists, and therefore the questions and answers are valid and correct. JN0-664 learning materials cover most of knowledge points for the exam, and you can master them as well as improve your professional ability in the process of learning. You can receive the download link and password within ten minutes after paying for JN0-664 Exam Dumps, if you don't receive, you can contact us, and we will solve this problem for you.

Our Pass4Leader team know that it is very hard to build trust relationship between the seller and customer. So we are sincerely show our profession and efficiency in JN0-664 exam software to you; we will help you pass JN0-664 exam with our comprehensive questions and detailed analysis of our dumps; we will win your trust with our better customer service. What's more, it is the best recognition for us that you obtain the JN0-664 Exam Certification.

Juniper JN0-664 Dumps PDF Format

We promise you will pass the JN0-664 exam and obtain the JN0-664 certificate successfully with our help of JN0-664 exam questions. According to recent survey of our previous customers, 99% of them can achieve their goals, so believe that we can be the helping hand to help you achieve your ultimate goal. Bedsides we have high-quality JN0-664 Test Guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way.

Juniper Service Provider, Professional (JNCIP-SP) Sample Questions (Q34-Q39):

NEW QUESTION # 34

Refer to the exhibit.

Click the Exhibit button.

PE-1 and PE-2 are configured with LDP-sigaled pseudowires to provide connectivity between CE-1 and CE-2. You notice no connectivity exists between CE-1 and CE-2.

Referring to the exhibit, which two statements describe potential causes for this fault? (Choose two.)

- A. The VC IDs are mismatched.
- B. There is no LSP configured from PE-1 to PE-2.
- C. Interface ge-0/0/0 on PE-1 is down.
- D. There is no LSP configured from PE-2 to PE-1.

Answer: A,D

NEW QUESTION # 35

After a recent power outage, your manager asks you to investigate ways to automatically reduce the impact caused by suboptimal routing in your OSPF and OSPFv3 network after devices reboot.

Which three configuration statements accomplish this task? (Choose three.)

- A. set protocols ospf3 realm ipv4-unicast overload timeout 900
- B. set protocols ospf overload timeout 900
- C. set protocols ospf3 overload timeout 900
- D. set protocols ospf3 overload
- E. set protocols ospf overload

Answer: A,B,C

Explanation:

To reduce the impact of suboptimal routing in OSPF and OSPFv3 after devices reboot, you can use the overload feature to prevent a router from being used as a transit router for a specified period of time. This allows the router to stabilize its routing table before forwarding traffic for other routers. To enable the overload feature, you need to do the following:

For OSPF, configure the overload statement under [edit protocols ospf] hierarchy level. You can also specify a timeout value in seconds to indicate how long the router should remain in overload state after it boots up. For example, set protocols ospf overload timeout 900 means that the router will be in overload state for 15 minutes after it boots up.

For OSPFv3, configure the overload statement under [edit protocols ospf3] hierarchy level. You can also specify a realm (ipv4-unicast or ipv6-unicast) and a timeout value in seconds to indicate how long the router should remain in overload state after it boots up for each realm. For example, set protocols ospf3 realm ipv4-unicast overload timeout 900 means that the router will be in overload state for 15 minutes after it boots up for IPv4 unicast routing.

NEW QUESTION # 36

Exhibit

Which two statements are true about the OSPF adjacency displayed in the exhibit? (Choose two.)

- A. There is a mismatch in the poll interval parameter between routers R1 and R2.
- B. There is a mismatch in the dead interval parameter between routers R1 and R2.
- C. There is a mismatch in the hello interval parameter between routers R1 and R2
- D. There is a mismatch in the OSPF hold timer parameter between routers R1 and R2.

Answer: B,C

Explanation:

The hello interval is the time interval between two consecutive hello packets sent by an OSPF router on an interface. The dead interval is the time interval after which a neighbor is declared down if no hello packets are received from it. These parameters must match between two OSPF routers for them to form an adjacency. In the exhibit, router R1 has a hello interval of 10 seconds and a dead interval of 40 seconds, while router R2 has a hello interval of 30 seconds and a dead interval of 120 seconds. This causes a

mismatch and prevents them from becoming neighbors23.

NEW QUESTION # 37

Exhibit

You are troubleshooting the connection between AS 64496 and AS 64497 and notice that only one of the paths is being used for traffic forwarding.

Referring to the exhibit, which three actions will ensure that R1 is configured properly for load balancing BGP routes? (Choose three.)

- A. Verify that the routing table on R1 has BGP routes for 203.0.113.128/25 with multiple next hops.
- B. Verify that there is a load balancing export policy under routing-options for the received BGP routes on R1.
- C. Verify that an import load balancing policy exists under protocols bgp for the received BGP routes on R1.
- D. Verify that the multipath option is configured under protocols bgp on both R2 and R3.
- E. Verify that the multipath option is configured under protocols bgp on R1.

Answer: A,B,E

Explanation:

<https://www.juniper.net/documentation/us/en/software/junos/bgp/topics/topic-map/load-balancing-bgp-session.html>

NEW QUESTION # 38

Click the Exhibit button.

You are troubleshooting an issue for a customer site that uses 10.10.0.0/24 in AS 65224, but you see another AS in the AS path. Referring to the exhibit, what is the cause of the problem?

- A. The local AS is receiving two equal cost routes to 10.10.0.0/24.
- B. The local AS is in the process of withdrawing the route from AS 65137.
- C. AS 65000 is pre-pending AS 65137 to route advertisements.
- D. AS 65137 is advertising the 10.10.0.0/24 prefix.

Answer: D

NEW QUESTION # 39

.....

As the industry has been developing more rapidly, our JN0-664 exam dumps have to be updated at irregular intervals in case of keeping pace with changes. To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest JN0-664 Exam practices. What's more, we won't charge you in one-year cooperation; if you are pleased with it, we may have further cooperation. We will inform you of the latest preferential activities about our JN0-664 test braindumps to express our gratitude towards your trust.

JN0-664 Exam Cram Review: <https://www.pass4leader.com/Juniper/JN0-664-exam.html>

We promise that Pass4Leader is the most direct pathway towards Juniper JNCIP-SP JN0-664 certificate, most of the questions were valid, and I didn't have any trouble passing the JN0-664 exam. The end result of these strenuous efforts is set of JN0-664 dumps that are in every respect enlightening and relevant to your to actual needs. You will find everything you need in real exam from our JN0-664 free demo.

You need to Finally, as mentioned earlier, responses came in from around the globe, Entering the Query Criteria, We promise that Pass4Leader is the most direct pathway towards Juniper JNCIP-SP JN0-664 certificate.

JN0-664 Training Materials & JN0-664 Certification Training & JN0-664 Exam Questions

most of the questions were valid, and I didn't have any trouble passing the JN0-664 exam, The end result of these strenuous efforts is set of JN0-664 dumps that are in every respect enlightening and relevant to your to actual needs.

You will find everything you need in real exam from our JN0-664 free demo, Our company set great store by the feedbacks of our customers, and we have always kept a humble and positive attitude JN0-664 even though we have become the staunch force in the international market in this field.
