

CMMC-CCA Test Questions Fee - Test CMMC-CCA Questions Vce

VCE Practice Questions with Correct Answers (Complete Solutions 2023)

What are the five sensing terms? Correct Answer Doubtful, Lost, Over, Short, Target D-LOST

What is the maximum number of targets that will be presented to an MMG platform? Correct Answer 2

Which one of the following is not a key component of threat based methodology? Correct Answer Ammunition Type

Which prerequisite should the primary evaluator meet prior to evaluating live fire gunnery? Correct Answer Be a Sergeant or above

Which of the following is not a command of execution? Correct Answer Firing

What is the eighth element in a fire command? Correct Answer Execution

MMG targets will be presented for a maximum of how many seconds in the offense? Correct Answer 50 seconds

When does time start for an offensive engagement? Correct Answer When all target(s) in the initial presentation are fully locked or first round is fired

the firer or Vehicle Commander must announce a sensing before what? Correct Answer Any Subsequent fire command
Any supplemental fire command
Terminating the engagement
ALL OF THE ABOVE

Which is not a determining factor for target prioritization when multiple targets of the same threat level are encountered? Correct Answer Engage Far targets before near targets

All targets must be presented to the firer with a minimum of how much target visibility throughout the engagement? Correct Answer 90%

Initial defilade is provided in the defense for all crews when which of the following conditions are met? Correct Answer The crew is properly positioned in their defensive firing position
All targets are in the presentation are locked
The crew has not engaged any targets currently presented
ALL OF THE ABOVE

2026 Latest VCEngine CMMC-CCA PDF Dumps and CMMC-CCA Exam Engine Free Share: https://drive.google.com/open?id=1TwkzLt_-8y3Pd5METmi22DoEhOFZxGfZ

Different from the common question bank on the market, CMMC-CCA exam guide is a scientific and efficient learning system that is recognized by many industry experts. In normal times, you may take months or even a year to review a professional exam, but with CMMC-CCA exam guide you only need to spend 20-30 hours to review before the exam. And with CMMC-CCA learning question, you will no longer need any other review materials, because our study materials already contain all the important test sites. At the same time, CMMC-CCA test prep helps you to master the knowledge in the course of the practice.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.

Topic 2	<ul style="list-style-type: none"> • CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
Topic 3	<ul style="list-style-type: none"> • Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 4	<ul style="list-style-type: none"> • CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.

Test Cyber AB CMMC-CCA Questions Vce, Valid CMMC-CCA Exam Discount

Our CMMC-CCA exam questions not only includes the examination process, but more importantly, the specific content of the exam. In previous years' examinations, the hit rate of CMMC-CCA learning quiz was far ahead in the industry. We know that if you really want to pass the exam, our study materials will definitely help you by improving your hit rate as a development priority. After using CMMC-CCA training prep, you will be more calm and it is inevitable that you will get a good result.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q134-Q139):

NEW QUESTION # 134

A CCA is part of an Assessment Team conducting a CMMC Level 2 assessment. During an interview, an OSC employee admits that a critical security practice is not implemented because "it's too expensive." The CCA responds by suggesting a low-cost alternative solution to implement the practice. What should the CCA have done instead?

- A. Paused the interview to consult with the Lead Assessor about the practice's cost implications.
- **B. Noted the employee's statement and continued the interview without offering any suggestions.**
- C. Reported the employee's statement to the OSC management immediately.
- D. Encouraged the employee to discuss the issue with their supervisor after the interview.

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CoPC prohibits offering suggestions during assessments to maintain objectivity, making Option A correct. Options B, C, and D involve inappropriate actions per CoPC.

Extract from Official Document (CoPC):

* Paragraph 3.3(6) - Proper Use of Methods (pg. 7): "Do not provide guidance or assistance to OSC personnel during the assessment." References:

CMMC Code of Professional Conduct, Paragraph 3.3(6).

NEW QUESTION # 135

You are conducting a CMMC assessment for a contractor that develops software applications for the DoD.

During the assessment of the AU domain, you request to examine the contractor's audit and accountability policies, access control procedures, and system configuration documentation related to the management of audit logging functionality. Upon reviewing the documentation, the contractor has implemented a Role-Based Access Control (RBAC) model, where privileged users are assigned

different roles based on their responsibilities. One of these roles is the "Audit Administrator" role, which is granted the necessary privileges to manage audit logging functionality across the contractor's systems. However, during interviews with the system administrators, you learn that besides the Audit Administrator role, several other privileged roles, such as the "System Administrator" and "Network Administrator" roles, can also manage audit logging functionality. When you inquire about the rationale behind granting multiple privileged roles access to audit management functions, the contractor's security team explains that this approach allows for better operational flexibility and ensures that different teams can perform audit logging tasks based on their areas of responsibility. Based on the information provided in the scenario, how would you assess the contractor's compliance with CMMC practice AU.L2-3.3.9 - Audit Management?

- **A. Not Met - The contractor has granted audit management privileges to multiple privileged roles, which goes against the requirement to limit access to a subset of defined privileged users**
- B. Not Applicable - The practice is not relevant to the contractor's environment
- C. Met - The contractor has defined privileged user roles for audit management
- D. Partially Met - The contractor has limited audit management privileges to a subset of privileged users, but the roles may not be appropriately defined

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

AU.L2-3.3.9 requires "limiting management of audit logging functionality to a subset of privileged users." Granting access to multiple roles beyond the Audit Administrator (e.g., System and Network Admins) exceeds this subset, violating the practice's intent for tight control. This 1-point practice scores Not Met (-1) due to unrestricted access, per DoD methodology. Partial Met (A) isn't an option under CMMC scoring.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), AU.L2-3.3.9: "Limit audit management to a defined subset of privileged users."

* DoD Scoring Methodology: "1-point practice: Met = +1, Not Met = -1."

NEW QUESTION # 136

You are a Lead Assessor working with your C3PAO to conduct a CMMC Assessment for an OSC. During the preparation and planning phase, you meet with the OSC's Assessment Official to identify the resources and schedule for the upcoming assessment. Together, you review the OSC's pre-assessment information to estimate the level of effort required. You then collaborate to determine the specific resources needed, including the Assessment Team members, facilities, and any support personnel from the OSC. You also discuss scheduling factors like duration, key activities, and potential constraints. Based on these discussions, you develop a Rough Order of Magnitude (ROM) cost estimate and a proposed daily schedule for the assessment activities. What is your primary responsibility in identifying resources and schedule during Phase 1?

- A. Selecting the assessment team members and their roles.
- B. Finalizing the contract agreement between the C3PAO and OSC.
- **C. Verifying that all planning requirements are met when constructing the ROM estimate.**
- D. Determining the overall cost estimate for the assessment.

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The CAP designates the Lead Assessor's primary Phase 1 responsibility as ensuring all planning requirements (e.g., scope, resources, schedule) are met for the ROM, not finalizing contracts (Option A), selecting team members (Option B, a C3PAO task), or just cost estimation (Option C). Option D encompasses the full scope.

Extract from Official Document (CAP v1.0):

* Section 1.5 - Assessment Planning (pg. 16): "The Lead Assessor is responsible for verifying that all planning requirements are met when constructing the ROM estimate." References:

CMMC Assessment Process (CAP) v1.0, Section 1.5.

NEW QUESTION # 137

Different mechanisms can be used to protect information at rest. Which mechanism is MOST LIKELY to afford protection for information at rest?

- A. Secure offline storage
- B. File share
- C. Patching
- **D. Cryptographic mechanisms**

Answer: D

Explanation:

* Applicable Requirement: SC.L2-3.13.16 - "Protect the confidentiality of CUI at rest."

* Why D is Correct: Cryptographic mechanisms (e.g., full-disk encryption, database encryption, file encryption) provide the strongest protection for information at rest by preventing unauthorized disclosure if systems or media are accessed.

* Why Other Options Are Insufficient:

* A (Patching): Protects against vulnerabilities, but not specific to data-at-rest confidentiality.

* B (File share): Provides a storage method, not protection.

* C (Secure offline storage): Helps physically, but not sufficient for digital confidentiality without encryption.

References (CCA Official Sources):

* NIST SP 800-171 Rev. 2 - SC.L2-3.13.16

* NIST SP 800-171A - SC.L2-3.13.16 Assessment Objectives

* CMMC Assessment Guide - Level 2, Data at Rest Protection

NEW QUESTION # 138

While assessing the scope provided by an OSC, you realize they have two environments with distinct characteristics: the headquarters space located at 24 Industrial Pkwy and an off-site location at 25 Industrial Pkwy. The headquarters houses several offices where document processing occurs on a cloud-hosted Microsoft Dynamics 365 GCC environment. At the off-site location, users access designs from servers hosted at the headquarters through a Virtual Private Network (VPN). These designs are used first in a 3D printer to develop prototypes and subsequently in a Computer Numerical Control (CNC) machine for production. All these operations are supported by a high-quality Industrial Control System (ICS). What type of environment is the off-site facility located at 25 Industrial Pkwy?

- A. Professional environment
- B. Off-site environment
- C. Backup environment
- **D. Industrial environment**

Answer: D

Explanation:

Comprehensive and Detailed in Depth Explanation:

The off-site facility at 25 Industrial Pkwy is characterized by production activities involving 3D printers, CNC machines, and an ICS, which are hallmarks of an industrial environment per CMMC scoping guidance. These systems support manufacturing and prototyping, distinguishing it from a backup (Option A) or generic office (Option B) environment. While "off-site" (Option D) describes its location, "industrial" defines its function, aligning with CMMC's focus on environment types handling CUI. Option C is the correct answer.

Reference Extract:

* CMMC AG Level 2, Section 1.3: "Industrial environments include production facilities with ICS, 3D printers, or CNC machines processing CUI." Resources: https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

NEW QUESTION # 139

.....

The CMMC-CCA Exam practice software is based on the real CMMC-CCA exam dumps. The interface of CMMC-CCA exam practice software is user-friendly so you will not face any difficulty to become familiar with it. Practice test software contains simulated real CMMC-CCA exam scenario. It has numerous self-learning and self-assessment features to test their learning. Our software exam offers you statistical reports which will upkeep the students to find their weak areas and work on them. We guarantee if you trust the CMMC-CCA Exam Practice test software, getting the highest score in the actual CMMC-CCA exam will not be

difficult anymore.
