Valid Dumps NS0-185 Ppt, NS0-185 Mock Exam

Passing the Network Appliance NS0-185 certification exam is not a tough thing to do but we make it so. The main reason is that we don't know how to study from the NS0-185 exam questions we have. We assume that we can study one night and can easily take the NetApp Storage Installation Engineer, ONTAP Professional Exam NS0-185 Exam the next morning. This was possible only when we were the school. Now, it is not possible.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47
You create a new CIFS data LIF with the default failover group. In this scenario, where will the new LIF fail over if the node that owns the new LIF panics?

- A. to any port in the cluster that is operationally up
- B. to any port in the cluster that is administratively up
- C. to any available port in the same subnet
- D. to any available port listed in the broadcast domain

Answer: D

Explanation:
Default failover groups are defined by broadcast domains. Therefore, the LIF fails over to any operational port in the broadcast domain.

NEW QUESTION # 48

What are two ONTAP storage efficiency technologies that would be used on an AFF A400 cluster? (Choose two.)

- A. thin provisioning
- B. FlexClone volumes
- C. Flash Pool
- D. FlashCache

Answer: A,B

Explanation:
AFF systems are all-flash platforms that rely heavily on software-based efficiency technologies built into ONTAP. Two such technologies are FlexClone volumes and thin provisioning.
FlexClone enables instant, space-efficient copies of volumes or files without duplicating data blocks. This is especially useful for testing, development, backups, and rapid provisioning scenarios. On AFF systems, FlexClone operations are nearly instantaneous and incur minimal overhead.
Thin provisioning allows logical storage to be allocated without immediately consuming physical capacity.
This ensures maximum utilization of flash storage and prevents over-provisioning, which is critical in all-flash environments.
Flash Pool and FlashCache are hybrid-storage technologies and are not applicable to AFF A400 systems, which do not use HDDs or PCIe read-cache modules.
Therefore, the correct answers are B and D.

NEW QUESTION # 49

You are preparing to install a new 2-node AFF A250 system at a customer site with an existing cluster that uses NetApp CN1610 cluster interconnect switches.
In this scenario, what are two valid actions for this installation? (Choose two.)

- A. Migrate the existing cluster to new switches and add the new nodes.
- B. Create a new 2-node switched cluster that uses the CN1610 cluster switches.
- C. Add the new nodes to the existing cluster and switches.
- D. Create a new 2-node switchless cluster.

Answer: B,D

Explanation:
AFF A250 systems are not supported on CN1610 cluster switches. Therefore, they cannot be added to an existing cluster that uses those switches. Valid options are to either create a new switched cluster using the CN1610 switches (if supported for that configuration) or deploy the AFF A250 as a switchless 2-node cluster.

NEW QUESTION # 50

You are asked to install a new cluster with six FAS8060 nodes. While running Config Advisor, you see the messages shown in the exhibit.
The customer does not want ACP cabled on their cluster.
Which two actions would allow the installation to be completed successfully? (Choose two.)

- A. Advise the sales team that the customer is operating without ACP and that the customer is asking you to leave it that way.
- B. Advise the customer that they must acknowledge that they are not using ACP on the installation.
- C. Advise the customer that the error will cause the controller to not operate properly and create an unsupported state.
- D. Advise NGS that the customer has a controller in an unsupported state.

Answer: A,B

Explanation:
Alternate Control Path (ACP) is a recommended but optional feature in ONTAP installations. Config Advisor flags ACP-related

warnings when ACP is partially cabled or not detected, but this does not automatically place the system in an unsupported state.
NetApp installation policy requires that when customers choose not to deploy ACP, the decision must be explicitly acknowledged and documented. This ensures the customer understands the operational implications and accepts responsibility for reduced out-of-band shelf management visibility.
Additionally, installation best practices require that this decision be communicated to the sales team or account team. This ensures alignment across NetApp stakeholders and prevents future support disputes.
The system does not become unsupported solely because ACP is not used, provided the customer acknowledgment process is followed. Therefore, options implying an unsupported or nonfunctional state are incorrect.
The correct answers are B and C.

NEW QUESTION # 51

A customer is migrating data from a FAS8020 (ONTAP 9.5) to an AFF A250 MetroCluster IP system.
Which two migration methods are supported? (Choose two.)

- A. Controller swap
- B. Configure SnapMirror between the systems
- C. Use a host-based copy migration method
- D. Create a 4-node cluster and use vol move

Answer: B,C

NEW QUESTION # 52

......

One of features of us is that we are pass guaranteed and money back guaranteed if you fail to pass the exam after buying NS0-185 training materials of us. Or if you have other exam to attend, we can replace other 2 valid exam dumps to you, at the same time, you can get the update version for NS0-185 Training Materials. Besides, we offer you free update for 365 days after purchasing, and the update version will be sent to your email address automatically. The NS0-185 exam dumps include both the questions and answers, and it will help you to practice.

Valid Dumps NS0-185 Ppt: https://www.actual4cert.com/NS0-185-real-questions.html

Besides the professionals check the NS0-185 at time, it can ensure the accuracy of the answers, Network Appliance NS0-185 Trustworthy Dumps Thus, you can carry on your next study plan based on your strengths and weakness, Network Appliance NS0-185 Trustworthy Dumps We have discount for old customers, Play a leading role of worldwide certification dumps, we'll help you clear all the barriers in your road to pass the Valid Dumps NS0-185 Ppt Valid Dumps NS0-185 Ppt - NetApp Storage Installation Engineer, ONTAP Professional Exam actual exam, Network Appliance NS0-185 Trustworthy Dumps Good materials and methods can help you to do more with less.

So you started your small business with a NS0-185 single Mac and now you're adding more Macs and more employees, By universal agreement, an organization known as the Internet Valid Dumps NS0-185 Ppt Society is responsible for the development and publication of these standards.

Well-Prepared NS0-185 Trustworthy Dumps & Professional Valid Dumps NS0-185 Ppt & Excellent NS0-185 Mock Exam

Besides the professionals check the NS0-185 at time, it can ensure the accuracy of the answers, Thus, you can carry on your next study plan based on your strengths and weakness.

We have discount for old customers, Play a leading role of worldwide NS0-185 Trustworthy Dumps certification dumps, we'll help you clear all the barriers in your road to pass the NCSIE ONTAP NetApp Storage Installation Engineer, ONTAP Professional Exam actual exam.

Good materials and methods can help you to do more with less.
