This way candidates can easily check the validity and reliability of the EUNA_2024 exam products without having to spend time.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q20-Q25):

NEW QUESTION # 20

When configuring a utility network to properly model how resources flow through devices and junctions, which network property is responsible for defining the flow direction?

- A. Network Attributes
- B. Network Rules

- C. Terminals

Answer: C

Explanation:

Terminals control flow direction and ensure resources move through devices according to defined valid paths.

NEW QUESTION # 21

A utility company needs to represent a pump inside a lift station as part of its water network in ArcGIS Pro. Which type of association should be used to represent this content-container relationship?

- A. Containment association
- B. Structural attachment association
- C. Connectivity association

Answer: A

Explanation:

Containment associations model content within containers, such as pumps within a lift station or pipes inside a casing.

NEW QUESTION # 22

If a utility feature does not require terminals, such as when both sides of a device are equal, which configuration should be assigned?

- A. Bidirectional
- B. Single Terminal
- C. Directional

Answer: B

Explanation:

The Single Terminal configuration is applied when no terminals are needed.

NEW QUESTION # 23

An engineer is configuring a two-terminal device, a pressure reducing valve, in a water network. Which inputs are required for this terminal configuration?

- A. Name, direction, terminal definitions (In/Out), default path
- B. Service territory and feature dataset
- C. Asset group and network category only

Answer: A

Explanation:

Two-terminal configurations require name, directionality, terminal details, and default path.

NEW QUESTION # 24

Which attribute rule type should be used if you want an attribute to be automatically populated after a feature is added or updated in ArcGIS Pro?

- A. Immediate calculation rule
- B. Constraint rule
- C. Validation rule

Answer: A

Explanation:

Immediate calculation rules run instantly after edits to populate attributes automatically.

NEW QUESTION # 25

.....
