For the challenging Microsoft AZ-700 exam, they make an effort to locate reputable and recent Microsoft AZ-700 practice questions. The high anxiety and demanding workload the candidate must face being qualified for the Microsoft AZ-700 Certification are more difficult than only passing the Microsoft AZ-700 exam.

Microsoft AZ-700 exam is an advanced level certification exam that is designed for professionals who wish to demonstrate their expertise in designing and implementing Microsoft Azure Networking solutions. AZ-700 exam measures the candidate's ability to design and implement various networking solutions in the Azure environment, including virtual networks, load balancers, VPN gateways, and Azure ExpressRoute. AZ-700 exam also covers the implementation of various security measures to secure the network infrastructure, such as network security groups, Azure Firewall, and Azure DDoS protection.

Microsoft AZ-700 exam is an excellent opportunity for network engineers, architects, and administrators to demonstrate their expertise in designing and implementing Azure networking solutions. By passing AZ-700 Exam, you can enhance your career opportunities and stay ahead of the competition in this rapidly growing field. With the right preparation and dedication, you can successfully pass the Microsoft AZ-700 exam and take your career to the next level.

Candidates can prepare for the AZ-700 exam by taking Microsoft's official training course, "Designing and Implementing Microsoft Azure Networking Solutions," which covers all the topics included in the exam. They can also use Microsoft's online resources, such as documentation and tutorials, to supplement their learning.

Make Exam Preparation Simple Microsoft AZ-700 Exam Questions

Our Designing and Implementing Microsoft Azure Networking Solutions test torrent boost 99% passing rate and high hit rate so you can have a high probability to pass the exam. Our AZ-700 study torrent is compiled by experts and approved by the experienced professionals and the questions and answers are chosen elaborately according to the syllabus and the latest development conditions in the theory and the practice and based on the real exam. If you buy our Designing and Implementing Microsoft Azure Networking Solutions test torrent you only need 1-2 hours to learn and prepare the exam and focus your main attention on your most important thing.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q64-Q69):

NEW QUESTION # 64

You have an Azure subscription that contains the resources shown in the following table.

You plan to deploy an app named App1 to meet the following requirements.

- * External users must be able to access App1 from the internet.
- * App1 will be load balanced across all the virtual machines.
- * App1 will be hosted on VM1, VM2, VM3, and VM4.
- * App1 must be available if an Azure region fails.
- * Costs must be minimized.

You need to implement a global load balancer solution for App.

What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct answer is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 65

Your company has an office in New York.

The company has an Azure subscription that contains the virtual networks shown in the following table.

You need to connect the virtual networks to the office by using ExpressRoute. The solution must meet the following requirements:

- The connection must have up to 1 Gbps of bandwidth.
- The office must have access to all the virtual networks.
- Costs must be minimized.

How many ExpressRoute circuits should be provisioned, and which ExpressRoute SKU should you enable?

- A. one ExpressRoute Premium circuit
- B. four ExpressRoute Standard circuits
- C. two ExpressRoute Premium circuits
- D. one ExpressRoute Standard circuit

Answer: A

Explanation:

Express Route Premium SKU provides ability to connect from on-premises to any of the Azure regions across the globe.

NEW QUESTION # 66

You need to connect an on-premises network and an Azure environment. The solution must use ExpressRoute and support failing over to a Site-to-Site VPN connection if there is an ExpressRoute failure.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 67

You have an Azure Front Door instance that has a single frontend named Frontend1 and an Azure Web Application Firewall (WAF) policy named Policy1. Policy1 redirects requests that have a header containing "string1" to https://www.contoso.com/redirect1. Policy1 is associated to Frontend1.

You need to configure additional redirection settings. Requests to Frontend1 that have a header containing "string2" must be redirected to https://www.contoso.com/redirect2.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a policy.
- B. Add a custom rule to Policy1.

- C. Create a frontend host.
- D. Create a custom rule.
- E. Configure a managed rule.
- F. Create an association.

Answer: D,E,F

NEW QUESTION # 68

You have an on-premises network.

You have an Azure subscription that contains the resources shown in the following table.

□ You need to ensure that on-premises devices can communicate with Azure resources that are connected to Subnet4.

What should you do on each resource? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 69
