The latest JN0-1103 latest questions will be sent to you email, so please check then, and just feel free to contact with us if you have any problem. Our reliable JN0-1103 exam material will help pass the exam smoothly. With our numerous advantages of our JN0-1103 latest questions and service, what are you hesitating for? Our company always serves our clients with professional and precise attitudes, and we know that your satisfaction is the most important thing for us. We always aim to help you pass the JN0-1103 Exam smoothly and sincerely hope that all of our candidates can enjoy the tremendous benefit of our JN0-1103 exam material, which might lead you to a better future!

## Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active active and active</li><li>• passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Customer Network Design Requirements: This section of the exam measures skills of Network Design Engineers and covers the foundational aspects of network design. It includes understanding Juniper's life-cycle service approach, defining proposal boundaries, and considerations for both greenfield and brownfield deployments. The section also addresses top-down network design methodologies and capacity planning to ensure scalable and efficient network infrastructures.</li></ul>

**Topic 3**

- Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.

## **JN0-1103 Exam Practice Guide is Highest Quality JN0-1103 Test Materials**

PracticeMaterial IT Certification has years of training experience. PracticeMaterial Juniper JN0-1103 exam training materials is a reliable product. IT elite team continue to provide our candidates with the latest version of the JN0-1103 exam training materials. Our staff made great efforts to ensure that you always get good grades in examinations. To be sure, PracticeMaterial Juniper JN0-1103 Exam Materials can provide you with the most practical IT certification material.

## **Juniper Design - Associate (JNCIA-Design) Sample Questions (Q135-Q140):**

### **NEW QUESTION # 135**

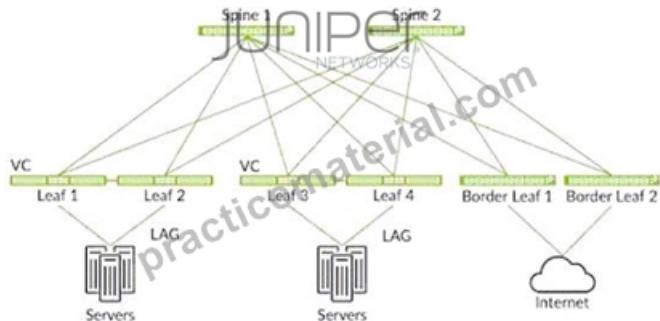

Which three questions should be asked when performing a business impact analysis? (Choose three.)

- A. How many redundant data paths are there?
- B. How long could an outage be sustained?
- C. Which functions and services are critical to the company's survival?
- D. What is the replacement cost of the core switches?
- E. What is the cost of both partial and full outages?

**Answer: B,C,E**

### **NEW QUESTION # 136**

Click the Exhibit button.

After a series of outages in an existing network, you are asked to analyze and provide recommendations for resiliency for the data center network shown in the exhibit.

Which improvement should you recommend to eliminate management plane single points of failure in this scenario?

- A. Replace the Virtual Chassis with VRRP configured on the servers.
- B. Configure a Virtual Chassis between the spines.
- C. Configure ESI-LAG on the spines facing the leafs.
- D. Replace the Virtual Chassis with ESI-LAG from the leafs facing the servers.

**Answer: D**

Explanation:

Using a Virtual Chassis (VC) introduces a single point of failure in the management plane, as all member switches depend on a master for control. Replacing the VC with ESI-LAG (Ethernet Segment Identifier - Link Aggregation Group) allows dual-homed servers to connect to independent leaf switches while maintaining resiliency and independent management planes—thus eliminating the single point of failure.

### NEW QUESTION # 137

Which two data center network architectures might be proposed by other vendors to compete with Juniper Networks Virtual Chassis Fabric (VCF) solution? (Choose two.)

- A. TRILL
- B. SON ET 1
- C. FCoE
- D. three-tier architecture

**Answer: A,D**

### NEW QUESTION # 138

What are two popular WAN service offerings that you would use in your design? (Choose two.)

- A. MPLS/VPN
- B. token ring
- C. ARCnet
- D. SONET/SDH

**Answer: A,D**

### NEW QUESTION # 139

Which automation tool can you use to automate Junos OS platforms?

- A. HTML2.0
- B. OpenView
- C. Chef
- D. Janus

**Answer: C**

### NEW QUESTION # 140

.....

We has a long history of 10 years in designing the JN0-1103 exam guide and enjoys a good reputation across the globe. There are so many features to show that our JN0-1103 study engine surpasses others. We can confirm that the high quality is the guarantee to your success. At the same time, the prices of our JN0-1103 practice materials are quite reasonable for no matter the staffs or the students to afford. What is more, usually we will give some discounts to our worthy customers.
