

100% Pass Quiz Juniper - Useful JN0-481 Reliable Exam Sims

DOWNLOAD the newest Test4Engine JN0-481 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1boiHBwF_noWKZfaYaEpyGwA9SpeNj8cF

If you want to get a comprehensive idea about our real JN0-481 study materials. It is convenient for you to download the free demo, all you need to do is just to find the “Download for free” item, and you will find there are three kinds of versions of JN0-481 learning guide for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one version of our JN0-481 exam questions as you like.

Juniper JN0-481 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Center Multitenancy: Covers multi-tenant network management through routing zones, VRFs, virtual networks, connectivity templates, security policies, VMware integration, and Data Center Interconnect.
Topic 2	<ul style="list-style-type: none">• Apstra Build and Deploy Phases: Covers fabric deployment tasks including agent installation, cable mapping, device states, deploy modes, and Blueprint UI usage, along with related monitoring and troubleshooting.
Topic 3	<ul style="list-style-type: none">• Blueprint Operations: Covers day-to-day blueprint management including making and reverting changes, querying, virtual networks, Time Voyager, anomaly detection, property sets, configlets, and configuration types.
Topic 4	<ul style="list-style-type: none">• Juniper Apstra Architecture: Introduces core Apstra components including the server, device agents, and UI, along with administrative features such as RBAC, event logging, and syslog.

Topic 5	<ul style="list-style-type: none"> • Data Center Architectures (IP Fabrics, EVPN-VXLAN): Covers spine-leaf topology design, ECMP load balancing, and underlay • overlay routing, along with EVPN and VXLAN concepts including route types, bridge domains, VNI-to-VLAN mapping, and VTEP functions.
Topic 6	<ul style="list-style-type: none"> • Apstra Design Phase: Covers pre-deployment planning elements such as reference designs, logical devices, device profiles, rack types, interface maps, and templates, including their configuration and troubleshooting.

Latest JN0-481 Test Question | JN0-481 Premium Exam

To make your job easy, Test4Engine proudly announces that our users can gain a free-of-cost Juniper JN0-481 demo of all three available formats for JN0-481 Exam Questions. It will allow you to check out the standard of JN0-481 Practice Exam material. You will not be disappointed to see the quality of the product.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q18-Q23):

NEW QUESTION # 18

What are two types of policies that Juniper Apstra uses to push to switches using Security Policies? (Choose two.)

- A. Access control lists (ChooseACLs)
- B. Policy-based routing (ChoosePBR)
- C. Filter-based forwarding (ChooseFBF)
- D. Firewall filters

Answer: A,D

Explanation:

Apstra 5.1 Security Policies are intended to enforce permit/deny controls for traffic between defined endpoints such as routing zones, virtual networks, and IP endpoints. Apstra expresses this security intent in an implementation-independent way, then renders and deploys the equivalent enforcement configuration onto the appropriate devices and interfaces. In Apstra terminology, the outcome is an ACL applied at enforcement points, such as virtual network interfaces (SVIs/IRBs) for east-west controls and border leaf interfaces for external-to-internal controls.

Therefore, the two correct policy types in this context are access control lists (ACLs) and firewall filters. "ACL" is the abstract policy object Apstra compiles and applies, while on Junos v24.4 the concrete enforcement mechanism for stateless packet filtering on interfaces is typically implemented as a firewall filter. Apstra automatically places these rendered ACLs/filters where needed: when you add VXLAN endpoints (such as expanding a rack/leaf in a VN), the ACL is placed on the corresponding VN interface; when you add external connectivity points, relevant ACLs are placed on the border leaf enforcement points. This automation ensures that security intent remains consistent as the fabric scales or changes, reducing the risk of manual rule drift. In contrast, filter-based forwarding / policy-based routing changes forwarding decisions rather than expressing permit/deny security intent, and is not the primary mechanism used by Apstra Security Policies for reachability control.

NEW QUESTION # 19

Which Root Cause Identifier is currently supported in Juniper Apstra software?

- A. connectivity
- B. ESI imbalance
- C. BGP
- D. virtual network

Answer: C

Explanation:

As of current Juniper Apstra software capabilities, the only supported Root Cause Identifier (RCI) is BGP. The RCI feature analyzes control-plane anomalies to identify and highlight the root cause of BGP-related issues within the fabric, helping operators quickly pinpoint failures or misconfigurations.

NEW QUESTION # 20

Which of the following two statements are correct?

- A. VXLAN is a Layer 2 encapsulation protocol
- B. VXLAN encapsulation discards VNIs
- C. VXLAN encapsulation discards VLAN IDs
- D. VXLAN is a Layer 3 encapsulation protocol

Answer: A,C

NEW QUESTION # 21

Referring to the exhibit, how many rack types are used in the staged blueprint?

Filter selected by all selected only unselected only

<input type="checkbox"/>	Name	Rack Type
<input type="checkbox"/>	borderleaf_001	BorderLeaf 2022-03-02 09:33
<input type="checkbox"/>	serverrack_001	ServerRack 2022-03-01 10:19
<input type="checkbox"/>	serverrack_002	ServerRack 2022-03-01 10:19
<input type="checkbox"/>	serverrack_003	ServerRack 2022-03-01 10:19
<input type="checkbox"/>	serverrack_004	ServerRack 2022-03-01 10:19
<input type="checkbox"/>	serverrack_005	ServerRack 2022-03-01 10:19
<input type="checkbox"/>	serverrack_006	ServerRack 2022-03-01 10:19

- A. two
- B. six
- C. seven
- D. three

Answer: A

Explanation:

Referring to the exhibit, the image shows the Racks table under the Staged menu in the Juniper Apstra UI. The Racks table displays the details of the racks that are used in the blueprint, such as the name, rack type, and date. The rack type is a resource that defines the type and number of leaf devices, access switches, and/or generic systems that are used in rack builds. The image shows seven racks in the table, but only two rack types: BorderLeaf and ServerRack.

NEW QUESTION # 22

You have recently committed a change after creating a new blueprint in Juniper Apstra. In the main dashboard, you see a number of anomalies related to BGR. What is a likely cause of these anomalies?

- A. The fabric has not converged yet.
- B. You have misconfigured ASNs.
- C. A generic system has not been configured.
- D. Spine-leaf links are incorrectly set.

Answer: A

Explanation:

In Juniper Apstra, a blueprint is a logical representation of the network design and configuration.

When you create a new blueprint, you need to commit the changes to apply them to the network devices. However, committing the changes does not mean that the network is immediately updated and operational. It may take some time for the network to converge and reflect the new state of the blueprint. During this time, you may see some anomalies related to BGP in the main dashboard, which indicate that the BGP sessions are not established or stable between the devices. These anomalies are usually temporary and will disappear once the network converges and the BGP sessions are up and running.

NEW QUESTION # 23

.....

Many clients may worry that if they buy our product they will fail in the exam but we guarantee to you that our JN0-481 study questions are of high quality and can help you pass the exam easily and successfully. Our product boasts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our JN0-481 exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our Data Center, Specialist (JNCIS-DC) guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our JN0-481 Exam Torrent can help you pass the exam with high possibility.
