For quick and complete Oracle Financials Cloud: General Ledger 2025 Implementation Professional (1z0-1054-25) exam preparation you can trust UpdateDumps Oracle 1z0-1054-25 Exam Questions. With the Oracle 1z0-1054-25 practice test questions you can ace your Oracle Financials Cloud: General Ledger 2025 Implementation Professional (1z0-1054-25) exam preparation and be ready to perform well in the final Oracle 1z0-1054-25 certification exam.

Oracle 1z0-1054-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing and Managing Journals: This section targets Oracle General Ledger Consultants and covers the full cycle of journal processing—from creation through approval to management. It includes configuration of journal-related objects and understanding how journals are sourced, tracked, and approved using predefined rules and workflows.
Topic 2	<ul style="list-style-type: none">Using AIMLMobile and Other Automation Features: This final section assesses Finance Transformation Architects and focuses on the business value derived from incorporating AI, machine learning, and mobile capabilities in Oracle Financials. Candidates are expected to understand automation use cases and the practical benefits these modern features offer in streamlining financial operations.
Topic 3	<ul style="list-style-type: none">Configuring Financial Reports: This portion of the exam measures the abilities of Financial Reporting Analysts and includes creating and managing a range of reports using tools like the Financial Reporting Center, Web Studio, OTBI, Smart View, and Dashboards. Candidates must know how to define account groups, set up infolets, and build custom analytics tailored to user needs.

Topic 4	<ul style="list-style-type: none"> Processing Intercompany: This domain assesses the skills of Finance Integration Specialists in configuring and managing intercompany transactions. Candidates must understand balancing rules, clearing configurations, and transaction processing, as well as how to maintain intercompany reconciliations in multi-entity structures.
Topic 5	<ul style="list-style-type: none"> Implementing Enterprise and Financial Reporting Structures: This section of the exam measures skills of Oracle ERP Implementation Consultants and covers the core components used in setting up enterprise structures and reporting configurations. It assesses knowledge in defining legal entities, jurisdictions, and geographies, as well as the design and configuration of Chart of Accounts. Candidates must also demonstrate how to set up and secure chart structures and manage reporting calendars and currencies.

1z0-1054-25 Test Braindumps: Oracle Financials Cloud: General Ledger 2025 Implementation Professional - 1z0-1054-25 Pass-Sure Materials &

As candidates who will attend the exam, some may be anxious about the coming exam, maybe both in the 1z0-1054-25 practice material and the mental state. We will provide you the 1z0-1054-25 practice material with high quality as well as the comfort in your mental. The 1z0-1054-25 Exam Dumps have the knowledge for the exam, and the stimulated 1z0-1054-25 soft test engine will be of great benefit to you through making you know the exam procedures.

Oracle Financials Cloud: General Ledger 2025 Implementation Professional Sample Questions (Q75-Q80):

NEW QUESTION # 75

You are trying to run a Financial Reporting Web Studio report from Financial Reporting Center. However, it is not appearing as a choice.

Which are two reasons for this? (Choose two.)

- A. You have not saved it in the Shared Folder/Custom/Financials directory.
- **B. You have not saved it in the MyFolders directory.**
- C. You have not downloaded the report to your local drive.
- **D. You have not uploaded it to Financial Reporting Center.**

Answer: B,D

Explanation:

According to Oracle documentation, two reasons why a Financial Reporting Web Studio report may not appear as a choice in Financial Reporting Center are: You have not saved it in the Shared Folder/Custom /Financials directory, and you have not uploaded it to Financial Reporting Center. Financial Reporting Web Studio enables you to design and generate reports with grids, charts, images, and text boxes using data from various sources. Financial Reporting Center enables you to access and run all types of reports from a single user interface. To make a Financial Reporting Web Studio report available in Financial Reporting Center, you must save it in the Shared Folder/Custom/Financials directory and upload it to Financial Reporting Center using Workspace. Therefore, options A and C are correct. Option B is incorrect because saving it in the MyFolders directory does not make it available in Financial Reporting Center. Option D is incorrect because downloading it to your local drive does not make it available in Financial Reporting Center.

NEW QUESTION # 76

You define intercompany balancing rules that are applied to a specific source and category, such as Payables and Invoices, or a specific intercompany transaction type, such as Intercompany Sales.

Which statement on intercompany configuration is true?

- A. You must define intercompany balancing rules for all sources, categories, and transaction types.
- **B. You can create a rule for all sources and categories by selecting the source "Other" and category "Other"**
- C. Intercompany balancing evaluates the rules in the following order: ledger, legal entity, chart of accounts, and primary balancing segment value.

Answer: B

NEW QUESTION # 77

In Financial Cloud, which three reporting tools can be used to access General Ledger balances?

- A. Oracle Transactions Business Intelligence
- B. Smart View
- C. Financial Reporting Studio
- D. Application Composer
- E. Oracle Enterprise Repository

Answer: A,B,C

NEW QUESTION # 78

What are two uses of the Column Flattening and Row Flattening features? (Choose two.)

- A. View information for runtime performance.
- B. Set the status of a tree to active.
- C. Verify correctness of trees.
- D. Create additional versions of a tree.
- E. Optimize parent/child relationships.

Answer: B,C

Explanation:

The two uses of the Column Flattening and Row Flattening features are to set the status of a tree to active and to verify correctness of trees. Column Flattening and Row Flattening are features that optimize parent-child information for run-time performance by storing additional rows or columns in a table for instantly finding all descendants or ancestors of a node without initiating a recursive query. Column Flattening and Row Flattening are required to set the status of a tree to active, as they ensure that the tree data is consistent and accurate. Column Flattening and Row Flattening are also useful to verify correctness of trees, as they allow users to view and analyze the flattened hierarchy data using various tools such as Oracle Analytics Publisher or Oracle Transactional Business Intelligence. You do not use Column Flattening and Row Flattening to create additional versions of a tree, as this is a feature that allows users to copy an existing tree version and make changes to it without affecting the original version. You do not use Column Flattening and Row Flattening to view information for runtime performance, as this is a feature that allows users to monitor and measure the performance of various processes or tasks in Oracle Fusion Applications. You do not use Column Flattening and Row Flattening to optimize parent/child relationships, as this is a feature that allows users to define rules and constraints for how nodes can be related to each other in a tree structure. NEW QUESTION # 79

Which two statements are true regarding the Intercompany Reconciliation Report? (Choose two.)

- A. You can only drill down to the general ledger journal and then from there to the subledger journal entry.
- B. The report can be run using an additional currency and conversion rate that converts all amounts into a common currency for comparison.
- C. The report includes Ledger balancing lines generated when the primary balancing segment value (BSV) is in balance, but either the second or third BSVs are not.
- D. The report displays all clearing company balancing lines for a period.
- E. The report displays the intercompany receivables and intercompany payables balances in summary for a period.

Answer: B,C

Explanation:

According to the Oracle documentation¹², the Intercompany Reconciliation Report can be run using an additional currency and conversion rate that converts all amounts into a common currency for comparison (option C). The report also includes ledger balancing lines generated when the primary balancing segment value is in balance, but either the second or third balancing segment values are not (option B). Option A is incorrect because you can drill down to the general ledger journal, subledger accounting entry,
