

NCP-EUC Actualtest - Exam NCP-EUC Actual Tests

BTW, DOWNLOAD part of PracticeVCE NCP-EUC dumps from Cloud Storage: <https://drive.google.com/open?id=1Eg4IBRtSFBS7rf1axLsgjWGudZQgHSlz>

The latest NCP-EUC dumps collection covers everything you need to overcome the difficulty of real questions and certification exam. Accurate NCP-EUC test answers are tested and verified by our professional experts with the high technical knowledge and rich experience. You may get answers from other vendors, but our NCP-EUC briandumps pdf are the most reliable training materials for your exam preparation.

The PracticeVCE is one of the top-rated and trusted platforms that are committed to making the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) certification exam journey successful. To achieve this objective PracticeVCE has hired a team of experienced and qualified Nutanix NCP-EUC Exam trainers. They work together and put all their expertise to maintain the top standard of Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice test all the time.

Looking to Advance Your Nutanix Career? Try Nutanix NCP-EUC Exam Questions

After choosing NCP-EUC training engine, you will surely feel very pleasantly surprised. First of all, our NCP-EUC study materials

are very rich, so you are free to choose. At the same time, you can switch to suit your learning style at any time. Because our NCP-EUC learning quiz is prepared to meet your diverse needs. If you are not confident in your choice, you can seek the help of online services.

The NCP-EUC certification exam is an excellent certification for those who work with Nutanix End-User Computing solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification demonstrates expertise in designing and implementing Nutanix VDI solutions, and it is a valuable credential for IT professionals who want to advance their careers in the field of End-User Computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is challenging, but with the right preparation and study, passing the exam is achievable.

The NCP-EUC Certification Exam is an industry-recognized credential that can help IT professionals advance their careers. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification validates the candidate's proficiency in handling Nutanix VDI solutions and gives them a competitive edge in the job market. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is also a requirement for many job positions that deal with VDI solutions, making it a must-have for IT professionals aspiring to work in this field.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q136-Q141):

NEW QUESTION # 136

Developer VDI users are complaining about performance issues and states that tasks are taking longer to complete than before. An administrator is analyzing the environment trying to determine the cause. The administrator has determined these metric values for the host:

CPU Usage = 18%

CPU Ready = 6.5%

IOPS = 250

Storage Usage = 20%

Which performance counter could explain the issue?

- A. IOPS
- B. CPU Usage
- C. Storage Usage
- **D. CPU Ready**

Answer: D

Explanation:

In virtualization performance troubleshooting, CPU Ready % is a critical metric that indicates the percentage of time a virtual machine was ready to execute a thread but had to wait for the hypervisor to schedule it on a physical CPU core.

According to standard Nutanix and AHV performance guidelines, a CPU Ready value above 5% per vCPU is considered a leading indicator of CPU contention (oversubscription) and performance degradation. While the overall host CPU Usage appears low (18%), the high CPU Ready (6.5%) suggests that specific VMs are fighting for scheduling slots, causing the latency ("tasks taking longer") reported by the users. The other metrics (IOPS, Storage Usage) are well within normal operating parameters.

NEW QUESTION # 137

A new EUC environment is being designed for graphics-intensive workloads. An administrator has determined that L40S GPUs (48 GB) with L40S-12Q (12 GB) profiles will be needed. The administrator chooses an NX-9151-G9, which can fit four L40S GPUs. How many virtual desktops per server can be estimated based on the GPU requirements?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

To calculate the estimated number of virtual desktops per server, one must consider the physical memory of the GPU, the memory required by the selected vGPU profile, and the number of GPUs installed in the node.

* GPU Specifications: The NVIDIA L40S GPU is equipped with 48 GB of physical GDDR6 memory.

- * Profile Requirements: The L40S-12Q profile allocates 12 GB of frame buffer memory to each virtual desktop.
- * Density Calculation per GPU: Dividing the total physical memory by the profile memory (48 GB / 12 GB) results in 4 virtual desktops supported per single GPU card.
- * Server Capacity: The Nutanix NX-9151-G9 platform supports up to four NVIDIA L40S GPUs per node.
- * Total Estimate: Multiplying the desktops per GPU by the number of GPUs (4 desktops x 4 GPUs) yields a total of 16 virtual desktops per server.

NEW QUESTION # 138

A Windows IO VM fails to power on With an NVIDIA vCPU profile in ESXi 7. The VM is configured with NVIDIA profile by selecting Shared PCI Device, adding the NVIDIA GRID vCPU device. and selecting the Profile under VM settings. The following error message is displayed in the vSphere web client:

```

An error was received from the ESX host while powering on VM win10.
Failed to start the virtual machine
Module 'DevicePowerOn' power on failed.
Could not initialize plugin '/usr/lib64/vmware/plugin/libnvidia-vgx.so' for vGPU 'grid_m60-4q'
No graphics device is available for vGPU 'grid_m60-4q'.

```

What should be done to resolve this issue?

- A. Change the Graphics mode of the host from Shared to Shared Direct
- B. Switch the GPU mode to compute mode using gpumodeswitch command.
- C. change the Graphics mode of the host from Shared Direct to Shared.
- **D. Switch the GPU mode to graphics mode using gpumodeswitch command.**
- E. Change the Graphics mode of the host from Shared to Shared Direct

Answer: D

Explanation:

gpumodeswitch is a command-line tool that is used to switch supported NVIDIA GPUs between compute and graphics mode. Compute mode allows multiple VMs to share a GPU for CUDA workloads. Graphics mode allows a single VM to use a GPU for graphics workloads.

NEW QUESTION # 139

An administrator is deploying a new virtual desktop environment onto an existing Nutanix solution.

The virtual desktop environment will consist of these elements:

1000 instant clone call center virtual desktops (supporting 5 business units)

500 full clone developer virtual desktops (supporting 2 business units)

150 applications delivered via AppStacks (supporting 7 business units)

How many storage containers should be created to support these workloads?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

Based on the given information, the administrator is deploying 1000 instant clone virtual desktops, 500 full clone virtual desktops, and 150 applications. To support these workloads, the Nutanix solution will need multiple storage containers.

According to the Nutanix Certified Professional - End User Computing (NCP-EUC) v6 guide, for VDI workloads, it is recommended to create a separate storage container for each type of desktop (e.g. instant clone, full clone) and another container for AppStacks. It is also recommended to have at least one container for metadata and one container for replicas.

Therefore, for this scenario, a total of 3 storage containers should be created:

One container for 1000 instant clone virtual desktops

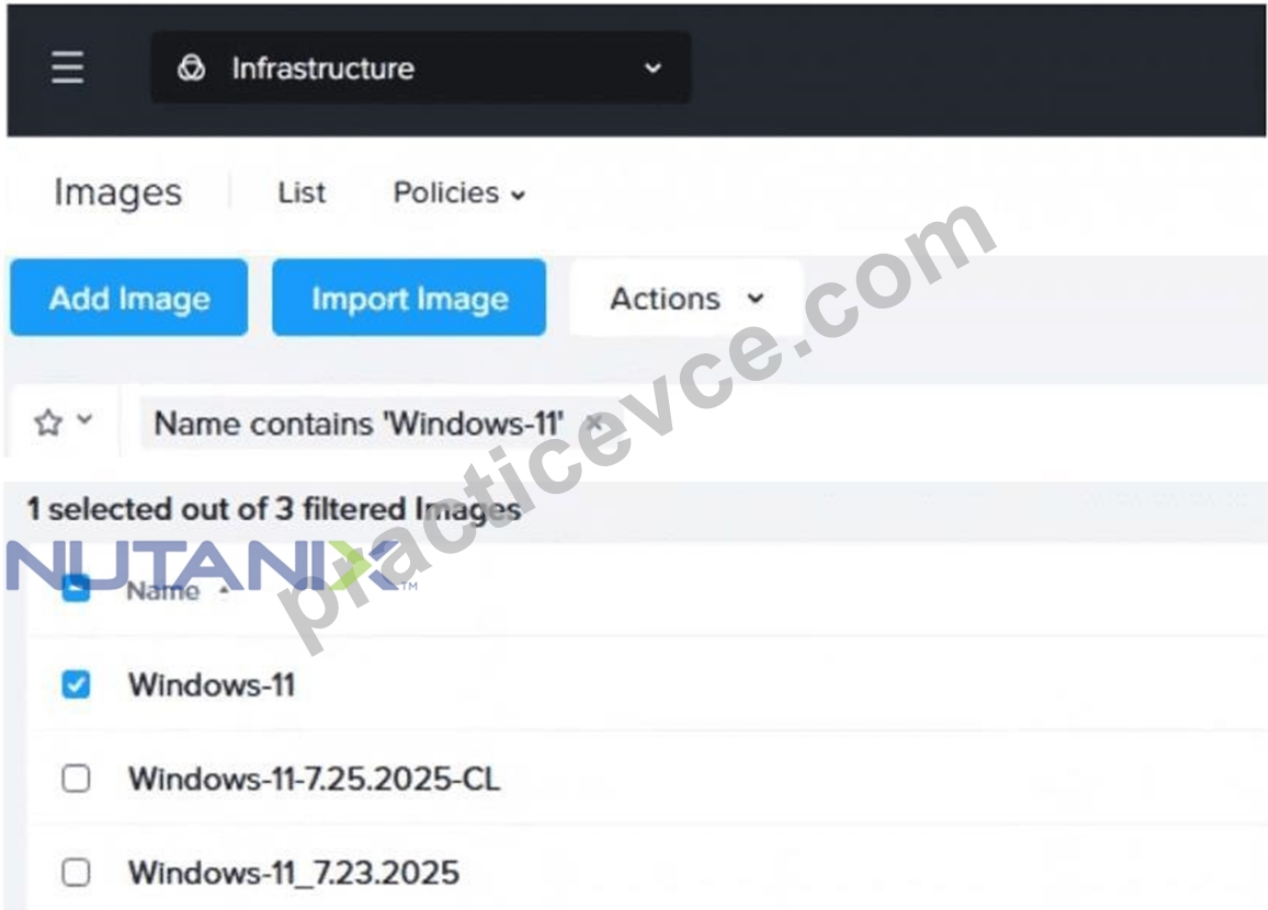

One container for 500 full clone virtual desktops

One container for 150 applications delivered via AppStacks
So the answer is C. 3.

NEW QUESTION # 140

Refer to the exhibit.

Refer to the exhibit.

An administrator needs to update an image name to adhere to company image naming standards.
Based upon the exhibit, which option describes the correct solution?

- A. Select the Image -> click Actions -> Clone to New Image.
- **B. Select the Image -> click Actions -> Update.**
- C. Image names must be updated via the acli command, not the UI.
- D. Image names must be updated via the ncli command, not the UI.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

Based on the provided exhibit and Nutanix Prism Central administration guides:

* Interface Identification: The screenshot displays the Prism Central web console, indicated by the "Infrastructure" dropdown menu in the top navigation bar (Prism Element uses a different layout). The user is currently in the Images dashboard (Infrastructure > Compute > Images).

* Updating Image Metadata: To rename an image (or modify its description/type) in Prism Central, the standard workflow is to select the target image (as shown with "Windows-11" selected) and use the Actions menu.

* The "Update" Action: Within the Actions dropdown menu, the correct option to modify existing settings is Update. Clicking Actions -> Update opens the "Update Image" dialog box, where the Name field is editable.

* Incorrect Options:

* A & D (CLI): These are incorrect because image renaming is fully supported in the UI; the CLI (acli or ncli) is available but not mandatory ("must" is the error).

* C (Clone): Cloning an image creates a duplicate copy. While this could result in a new image with a new name, it is an inefficient workaround rather than the direct solution for simply renaming an existing image.

NEW QUESTION # 141

.....

It is human nature to pursue wealth and success. No one wants to be a common person. In order to become a successful person, you must sharpen your horizons and deepen your thoughts. Our NCP-EUC practice guide can help you update yourself in the shortest time. And according to the data of our loyal customers, we can claim that if you study with our NCP-EUC Exam Questions for 20 to 30 hours, then you can pass the exam with ease. And the price of our NCP-EUC study materials is quite favourable.
