

Quiz 2026 Accurate Nutanix NCP-US-6.5 Vce Download

P.S. Free & New NCP-US-6.5 dumps are available on Google Drive shared by TestkingPDF: <https://drive.google.com/open?id=1tC6CK62Q5uF50KRc83CzRqHvcJWSKpZN>

IT exam become more important than ever in today's highly competitive world, these things mean a different future. Nutanix NCP-US-6.5 exam will be a milestone in your career, and may dig into new opportunities, but how do you pass Nutanix NCP-US-6.5 Exam? Do not worry, help is at hand, with TestkingPDF you no longer need to be afraid. TestkingPDF Nutanix NCP-US-6.5 exam questions and answers is the pioneer in exam preparation.

We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your Nutanix NCP-US-6.5 certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our Nutanix NCP-US-6.5 Exam questions than the other vendors.

>> NCP-US-6.5 Vce Download <<

Pass Guaranteed Quiz High Pass-Rate NCP-US-6.5 - Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Vce Download

The clients can use the shortest time to prepare the exam and the learning only costs 20-30 hours. The questions and answers of our NCP-US-6.5 Exam Questions are refined and have simplified the most important information so as to let the clients use little time to learn. The client only need to spare 1-2 hours to learn our Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 study question each day or learn them in the weekends. Commonly speaking, people like the in-service staff or the students are busy and don't have enough time to prepare the exam. Learning our Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 test practice dump can help them save the time and focus their attentions on their major things.

Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identify the steps to deploy Nutanix FilesGiven a scenario, determine product and sizing parameters
Topic 2	<ul style="list-style-type: none">Deploy and Upgrade Nutanix Unified StoragePerform upgradesmaintenance for FilesObjects implementations

Topic 3	<ul style="list-style-type: none"> • Given a scenario, configure shares, buckets, and or Volume Groups • Troubleshoot a failed upgrade for Files • Objects
Topic 4	<ul style="list-style-type: none"> • Configure Nutanix Objects • Describe how to monitor performance and usage
Topic 5	<ul style="list-style-type: none"> • Configure Nutanix Files with advanced features • Determine the appropriate method to ensure data availability • recoverability

Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q116-Q121):

NEW QUESTION # 116

An administrator is tasked with performing an upgrade to the latest Objects version. What should the administrator do prior to upgrade Objects Manager?

- A. Upgrade Objects service
- B. Upgrade MSP
- **C. Upgrade AOS**
- D. Upgrade Lifecycle Manager

Answer: C

Explanation:

Before upgrading Objects Manager, the administrator must upgrade AOS to the latest version. AOS is the core operating system that runs on each node in a Nutanix cluster and provides the foundation for Objects Manager and Objects service. Upgrading AOS will ensure compatibility and stability for Objects components. Reference: Nutanix Objects Administration Guide, Acropolis Operating System Upgrade Guide

NEW QUESTION # 117

Which prerequisite is required to deploy Objects on AHV or ESXi?

- **A. Port 9440 is accessible on both PE and PC**
- B. Nutanix STARTER License
- C. Valid SSL Certificate
- D. Prism Central version is 5.17.1 or later

Answer: A

Explanation:

Nutanix Objects, part of Nutanix Unified Storage (NUS), is an S3-compatible object storage solution that can be deployed on AHV or ESXi hypervisors. Deploying Objects has specific prerequisites to ensure successful installation and operation.

Analysis of Options:

* Option A (Prism Central version is 5.17.1 or later): Incorrect. While Nutanix Objects requires Prism Central for deployment and management, the minimum version for Objects deployment is typically lower (e.g., Prism Central 5.15 or later, depending on the Objects version). Version 5.17.1 is not a specific requirement for Objects deployment on AHV or ESXi.

* Option B (Port 9440 is accessible on both PE and PC): Correct. Port 9440 is used for communication between Prism Element (PE) and Prism Central (PC), as well as for internal Nutanix services. When deploying Objects, Prism Central communicates with the cluster (via Prism Element) to deploy Object Store Service VMs. This communication requires port 9440 to be open between PE and PC, making it a key prerequisite.

* Option C (Valid SSL Certificate): Incorrect. While a valid SSL certificate is recommended for secure communication (e.g., for S3 API access), it is not a strict prerequisite for deploying Objects. Objects can be deployed with self-signed certificates, though Nutanix recommends replacing them with valid certificates for production use.

* Option D (Nutanix STARTER License): Incorrect. The Nutanix STARTER license is an entry-level license for basic cluster functionality (e.g., VMs, storage). However, Nutanix Objects requires a separate license (e.g., Objects license or a higher-tier AOS

license like Pro or Ultimate). The STARTER license alone does not support Objects deployment.

Why Option B?

Port 9440 is critical for communication between Prism Element and Prism Central during the deployment of Objects. If this port is blocked, the deployment will fail, as Prism Central cannot communicate with the cluster to deploy the Object Store Service VMs.

Exact Extract from Nutanix Documentation:

From the Nutanix Objects Deployment Guide (available on the Nutanix Portal):

"Before deploying Nutanix Objects on AHV or ESXi, ensure that port 9440 is accessible between Prism Element (PE) and Prism Central (PC). This port is required for communication during the deployment process, as Prism Central manages the deployment of Object Store Service VMs on the cluster."

:

Nutanix Objects Deployment Guide, Version 4.0, Section: "Prerequisites for Deploying Objects" (Nutanix Portal).

Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix Objects Deployment Requirements".

NEW QUESTION # 118

Question: Deploying Files instances requires which two minimum resources? (Choose two.) Options:

- A. 4 vCPUs per host
- B. 8 vCPUs per host
- C. 8 GiB of memory per host
- D. 12 GiB of memory per host

Answer: A,D

Explanation:

Nutanix Files instances are deployed using File Server Virtual Machines (FSVMs) that run on the Nutanix cluster's hypervisor (AHV, ESXi, or Hyper-V). The minimum resource requirements for deploying FSVMs are specified in the Nutanix Files documentation to ensure proper performance. These requirements are typically defined per FSVM, not per host, as FSVMs are virtual machines distributed across the cluster's hosts.

According to the official Nutanix documentation:

* vCPUs: Each FSVM requires a minimum of 4 vCPUs to operate effectively.

* Memory: Each FSVM requires a minimum of 12 GiB of memory (RAM).

The question asks for the "minimum resources" required for deploying Files instances, and the options are framed as "per host."

However, in the context of Nutanix Files, resource requirements are specified per FSVM, as FSVMs are the entities consuming these resources. The options likely reflect a misunderstanding in the original question phrasing, but based on the standard Nutanix Files deployment requirements:

* 4 vCPUs per FSVM (option D) is correct, as this is the minimum vCPU requirement.

* 12 GiB of memory per FSVM (option C) is correct, as this is the minimum memory requirement.

Options A (8 vCPUs per host) and B (8 GiB of memory per host) do not align with the documented minimum requirements for FSVMs:

* 8 vCPUs is higher than the minimum requirement of 4 vCPUs per FSVM.

* 8 GiB of memory is lower than the minimum requirement of 12 GiB per FSVM.

Exact Extract from Nutanix Documentation:

"For a Nutanix Files deployment, each File Server Virtual Machine (FSVM) requires the following minimum resources:

* 4 vCPUs

* 12 GiB of RAM These resources ensure that the FSVM can handle file service operations efficiently." - Nutanix Files Deployment Guide, Version 4.0, Section: "System Requirements for Nutanix Files"

:

Nutanix Files Deployment Guide, Version 4.0, Section: "System Requirements for Nutanix Files" (Nutanix Portal).

NEW QUESTION # 119

Which error logs should the administrator be reviewing to determine why the relates service is down?

- A. Tcpkill.log
- B. Cerebro.ERROR
- C. Arithmos.ERROR
- D. Solver.log

Answer: B

Explanation:

The error log that the administrator should review to determine why the relay service is down is Cerebro.ERROR. Cerebro is a service that runs on each FSVM and provides relay functionality for Data Lens. Relay service is responsible for collecting metadata and statistics from FSVMs and sending them to Data Lens via HTTPS. If Cerebro.ERROR log shows any errors or exceptions related to relay service, it can indicate that relay service is down or not functioning properly. Reference: Nutanix Files Administration Guide, page 23; Nutanix Data Lens User Guide

NEW QUESTION # 120

Which confirmation is required for an Objects deployment?

- A. Configure a dedicated storage container on Prism Element or Prism Central
- **B. Configure NTP servers on both Prism Element and Prism Central.**
- C. Configure VPC on both Prism Element and Prism Central.
- D. Configure Domain Controllers on both Prism Element and Prism Central.

Answer: B

Explanation:

The configuration that is required for an Objects deployment is to configure NTP servers on both Prism Element and Prism Central. NTP (Network Time Protocol) is a protocol that synchronizes the clocks of devices on a network with a reliable time source. NTP servers are devices that provide accurate time information to other devices on a network. Configuring NTP servers on both Prism Element and Prism Central is required for an Objects deployment, because it ensures that the time settings are consistent and accurate across the Nutanix cluster and the Objects cluster, which can prevent any synchronization issues or errors. References: Nutanix Objects User Guide, page 9; Nutanix Objects Deployment Guide

NEW QUESTION # 121

.....

At present, many office workers are dedicated to improving themselves. Most of them make use of their spare time to study our NCP-US-6.5 learning prep. As you can see, it is important to update your skills in company. After all, the most outstanding worker can get promotion. And if you want to be one of them, you had to learn more. And our NCP-US-6.5 Exam Materials are right to help you not only on the latest information but also can help you achieve the authentic NCP-US-6.5 certification.
