Microsoft GH-200 Practice Test (Web-Based)

With the pass rate reaching 98.65%, our GH-200 training materials have gained popularity in the international market. If you choose us, we can ensure that you can pass the exam in your first attempt. We are pass guarantee and money back guarantee for GH-200 exam dumps. If you fail to pass the exam, we will give you refund. You can try free demo before buying GH-200 Exam Materials, so that you can have deeper understanding of what you are going to buy. Free update for one year is available, the update version for GH-200 exam braindumps will be sent to your email automatically.

Microsoft GH-200 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage GitHub Actions in the Enterprise: This section measures the expertise of Enterprise Administrators and Platform Engineers in distributing and managing GitHub Actions and workflows at the organizational level. It includes reuse and sharing of templates, strategies for managing reusable components via repositories and naming conventions, controlling access to actions, setting organization-wide usage policies, and planning maintenance to ensure efficient enterprise-wide deployment of GitHub Actions.

Topic 2	• Author and Maintain Workflows: This section of the exam measures skills of DevOps Engineers and Automation Specialists and covers building and managing workflows triggered by events such as pushes, scheduled times, manual triggers, and webhooks. It includes understanding workflow components like jobs, steps, actions, and runners, syntax correctness, environment variables, secrets management, and dependencies between jobs. Candidates will also demonstrate practical abilities to create workflows for various purposes, including publishing packages, using service containers, routing jobs, and deploying releases to cloud providers.
Topic 3	• Consume Workflows: This domain targets Software Developers and Quality Assurance Engineers and focuses on interpreting workflow runs and their outcomes. It covers identifying triggering events, reading workflow configurations, troubleshooting failures by analyzing logs, enabling debug logging, managing environment variables, caching dependencies, and passing data between jobs. Candidates also manage workflow runs, artifacts, approvals, and status badges, as well as locating workflows within repositories and leveraging organizational templated workflows.
Topic 4	• Author and Maintain Actions: This domain evaluates the abilities of Action Developers and Automation Engineers to select and create suitable types of GitHub Actions, such as JavaScript, Docker containers, or run steps. It emphasizes troubleshooting action code, understanding the components and file structures of actions, and using workflow commands within actions to communicate with runners, including exit code management.

Microsoft GitHub Actions Sample Questions (Q88-Q93):

NEW QUESTION # 88
As a developer, you need to integrate a GitHub Actions workflow with a third-party code quality provider that uses the Checks API. How should you trigger a follow-up workflow?

- A. Add the deployment webhook event as a trigger for the workflow when the code quality integration is completed
- B. Add the pull_request webhook event as a trigger for the workflow when the code quality integration is synchronized
- C. Add the workflow_run webhook event as a trigger for the workflow for the code quality integration name
- D. Add the check_run webhook event as a trigger for the workflow when the code quality integration is completed

Answer: D

Explanation:
The check_run event is triggered when a check (such as a code quality check) completes, including when the status of a check changes. By adding this event as a trigger, you can initiate a follow-up workflow when the code quality integration finishes its checks.
Reference:
https://docs.github.com/en/actions/reference/workflows-and-actions/events-that-trigger-workflows

NEW QUESTION # 89
In a workflow triggered by a pull request comment, which GitHub Actions context property contains the event payload used to access the comment text and the pull request number?

- A. github.event_path
- B. github.repository
- C. github.event
- D. github.job

Answer: C

Explanation:
In a workflow that runs on a pull request comment the event context contains the webhook payload. With github.event you can read the structured fields for the comment text and the pull request number. The comment text is available under the comment body field and the pull request number is available under the issue number for comment events or under the pull request number for pull request events. This makes github.event the direct and convenient source for these values.

NEW QUESTION # 90

Which default GitHub environment variable indicates the owner and repository name?

- A. GITHUB_REPOSITORY
- B. REPOSITORY_NAME
- C. ENV_REPOSITORY
- D. GITHUB_WORKFLOW_REPO

Answer: A

Explanation:
Variables reference
Find information for supported variables, naming conventions, limits, and contexts in GitHub Actions workflows.
Variables include:
* GITHUB_REPOSITORY
The owner and repository name. For example, octocat/Hello-World
* Etc.
Reference:
https://docs.github.com/en/actions/reference/workflows-and-actions/variables

NEW QUESTION # 91

As a developer, you are configuring GitHub Actions to deploy VMs to production. A member of the VMOps team must provide approval before the deployment occurs. Which of the following steps should you take? (Each correct answer presents part of the solution. Choose two.)

- A. Specify the environment named Production in the workflow jobs that deploy to the VMs.
- B. Navigate to the repository settings and create a Production environment with the VMOps team as a required reviewer.
- C. Specify the VMOps team as the owner of the environment.
- D. Add the VMs to the environment.
- E. Navigate to the organization settings and create a Production environment with the VMOps team as a required reviewer.

Answer: B

Explanation:
Creating an environment
To configure an environment in a personal account repository, you must be the repository owner.
To configure an environment in an organization repository, you must have admin access.
On GitHub, navigate to the main page of the repository.
Under your repository name, click Settings. ...
In the left sidebar, click Environments.
Click New environment.
Enter a name for the environment, then click Configure environment.
Etc.
Reference:
https://docs.github.com/en/actions/how-tos/deploy/configure-and-manage-deployments/manage- environments

NEW QUESTION # 92

You are a DevOps engineer working on custom Actions development. You need to handle the errors or exceptions as part of the JavaScript based action code. What should be added to the following code block to handle errors?
const core = require('@actions/core');
try {
// action code
} catch (error) {
<< insert snippet here >>
}

- A. core.setException(error.message);
- B. action.setError(error.message);
- C. core.action.setException(error.message);

- D. core.setFailed(error.message);

Answer: D

Explanation:
Setting a failure exit code in a JavaScript action
If you are creating a JavaScript action, you can use the actions toolkit @actions/core package to log a message and set a failure exit code. For example:
try {
// something
} catch (error) {
core.setFailed(error.message);
}
Reference:
https://docs.github.com/en/actions/how-tos/create-and-publish-actions/set-exit-codes

NEW QUESTION # 93
......

Our GH-200 study materials are written by experienced experts in the industry, so we can guarantee its quality and efficiency. The content of our GH-200 learning guide is consistent with the proposition law all the time. We can't say it's the best reference, but we're sure it won't disappoint you. This can be borne out by the large number of buyers on our website every day. A wise man can often make the most favorable choice, I believe you are one of them. If you are not at ease before buying our GH-200 Actual Exam, we have prepared a free trial for you. Just click on the mouse to have a look, giving you a chance to try. Perhaps this choice will have some impact on your life.
