B2C-Commerce-Architect 100% 시험패스 덤프문제 100% 합격 보장 가능한 인증시험자료

Fast2test는 유일하게 여러분이 원하는 Salesforce인증B2C-Commerce-Architect시험관련자료를 해결해드릴 수 있는 사이트입니다. 여러분이 다른 사이트에서도 관련덤프자료를 보셨을 경우 페이지 아래를 보면 자료출처는 당연히 Fast2test 일 것입니다. Fast2test의 자료만의 제일 전면적이고 또 최신 업데이트일 것입니다.

최신 Salesforce Architect B2C-Commerce-Architect 무료샘플문제 (Q38-Q43):

질문 # 38

During load testing, a third party service is constantly failing to respond in a timely manner on the Product Listing Page. The page is not affected at it is collecting data with the server side call, however the loading time b increasing.

Which two recommendations should the developer take in order to minimize the risk and Improve the loading time?

Choose 2 answers

- A. Remove the service.
- B. Load the data asynchronously after the page is loaded
- C. Ask the third party to improve the reliability of the service.
- D. Enable the Circuit Breaker.

- E. Decrease the service timeout.

정답: B,D

질문 # 39

The following promotions are configured with no exclusivity (can be combined with any other promotion) in a - 1 month campaign:

- * Free correct- in -store shipping
- * 20% accessories products discount, applies for all customers
- * \$5 off coupon based discount, sent to a selected group of customers

The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.

What solutions should the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- B. Disable the coupon code. Restart the production instance from control Center to clear existing baskets.
- **C. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets**
- D. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.

정답: C

설명:

Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon. This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

질문 # 40

During code review, the Architect found that there is a service call on every visit of the product detail page (PDP).

What best practices should the Architect ensure are followed for the service configuration?

Choose 2 answers

- A. Service mock up call is configured.
- B. Service logging is disabled.
- **C. Circuit breaker is enabled.**
- **D. Service timeout is set.**

정답: C,D

질문 # 41

A developer is remotely fetching the reviews for a product.

Assume that it's an HTTP GET request and caching needs to be implemented, what consideration should the developer keep in mind for building the caching strategy?

- A. Cache the HTTP service request
- B. Remote include with caching only the reviews
- C. Use custom cache
- **D. Cached remote include with cache of the HTTP service**

정답: D

설명:

For efficient caching of HTTP GET requests used to fetch product reviews, the best practice is to use a cached remote include combined with caching of the HTTP service itself (Answer D). This method involves caching the output of the remote service call at the service layer and reusing it for subsequent requests. This approach minimizes the number of calls to the remote service, reduces load times, and ensures that the displayed reviews are up-to-date as per the cache's freshness settings. It optimally balances the performance benefits of caching with the need to keep content like reviews current.

질문 # 42

Which two activities should an Architect encourage the replication team to follow based on S2C Commerce best practices?
Choose 2 answers

- A. Use the undo replication process to roll back code replications only, not data replications.
- B. Use the undo replication process to roll back to the previous replication if necessary.
- C. Replicate the latest data to Production during periods of increased site use to ensure freshness.
- D. Wait 15 minutes after the recreation process completes for the cache to clear automatically.

정답: A,B

설명:

Option A (Use the undo replication process to roll back to the previous replication if necessary): This best practice ensures that if a replication introduces errors or issues, there is a way to quickly revert to a previous state without impacting the ongoing operations of the commerce site.

Option C (Use the undo replication process to roll back code replications only, not data replications): Focusing undo operations on code replication rather than data ensures that functional issues caused by code changes can be quickly addressed without affecting the integrity or consistency of the data within the system.

These practices help maintain the stability and reliability of the production environment by providing mechanisms to manage and mitigate risks associated with updates and changes.

질문 # 43
