Our 156-583 study materials can bring you so many benefits because they have the following features. I hope you can use a cup of coffee to learn about our 156-583 training engine. Perhaps this is the beginning of your change.

CheckPoint Check Point Certified Troubleshooting Administrator - R82 (CCTA) Sample Questions (Q61-Q66):

NEW QUESTION # 61
VPN performs full tunnel with Office Mode IPs. Internet browsing fails. What's missing?

- A. Split tunnel
- B. Domain-based routing
- C. Route back to Office Mode pool
- D. Manual NAT rule

Answer: C

Explanation:
Return path must point to gateway. Most common mistake in OM deployments.

NEW QUESTION # 62
UserCenter/PartnerMAP access is based on what criteria?

- A. The certification level achieved by employees of an organization.
- B. The level of Support purchased by a company manager.
- C. The certification level achieved by the partner.
- D. User permissions assigned to company contacts.

Answer: D

Explanation:
Access to UserCenter and PartnerMAP is primarily based on the user permissions assigned to company contacts. These permissions dictate what information and functionalities users can access within the portals, ensuring that only authorized personnel can view or manage specific aspects of the Check Point services and products.

NEW QUESTION # 63
Which command displays a summary of accelerated versus non-accelerated traffic statistics on a gateway?

- A. fwaccel stat
- B. fwaccel stats -s

- C. fwaccel conns
- D. fw ctl multik stat

Answer: B

Explanation:
The fwaccel stats -s command shows the percentage of packets handled by the accelerated path, the medium path, and the firewall path. A very low acceleration percentage points to rules, blades, or connection types that prevent offloading.

NEW QUESTION # 64
Which is the correct "fw monitor" syntax for creating a capture file for loading it into Wireshark?

- A. This cannot be accomplished as it is not supported with R80.10
- B. fw monitor -e "accept <FILTER EXPRESSION*;" > Output.cap
- C. fw monitor -e "accept <FILTER EXPRESSION*;" -file Output.cap
- D. fw monitor -e "accept <FILTER EXPRESSION
