

PEGACPRSA22V1 Books PDF & PEGACPRSA22V1 Latest Learning Material

The computer is widely used in all phases of society. If you get a Pegasystems certification you will have wide development for business, education, medicine and nearly all walks of life. PEGACPRSA22V1 test dumps materials play an important role if you are willing to get a certificate. If you can show your computer skills and talents, it will be your outstanding advantage over others. ActualTorrent Valid PEGACPRSA22V1 Test Dumps materials may be your first step to success as an IT worker.

Our PEGACPRSA22V1 exam questions are your optimum choices which contain essential know-hows for your information. So even trifling mistakes can be solved by using our PEGACPRSA22V1 practice engine, as well as all careless mistakes you may make. If you opting for these PEGACPRSA22V1 Study Materials, it will be a shear investment. You will get striking by these viable ways. If you visit our website, you will find that numerous of our customers have been benefited by our PEGACPRSA22V1 preparation prep.

Pass Guaranteed Quiz 2026 Pass-Sure PEGACPRSA22V1: Certified Pega Robotics System Architect 22 Books PDF

With the rapid development of the world economy, it has been universally accepted that a growing number of people have longed to become the social elite. However, the competition of becoming the social elite is fierce for all people. The PEGACPRSA22V1 exam will be a shortcut for a lot of people who desire to be the social elite. If you try your best to prepare for the PEGACPRSA22V1 Exam and get the related certification in a short time, it will be easier for you to receive the attention from many leaders of the big company.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q71-Q76):

NEW QUESTION # 71

Which two of the following tasks are not suitable for Pega Robotic Automation? (Choose Two)

- A. Rarely occurring processes such as sending annual reports.

- B. Processes that require access to multiple windows or applications.
- C. Repetitive tasks that require manual work.
- D. Rules-driven processes that users cannot easily perform in Pega Platform
- E. Complex processes that require human decision management.

Answer: A,E

Explanation:

Comprehensive and Detailed Explanation from Pega Robotics System (Exact Extract & Context):

According to the Pega Robotics Automation Design and Implementation Guide:

"Robotic Automation is best suited for rule-based, repetitive, and structured tasks that do not require subjective judgment or complex decision-making." The guide further clarifies:

"Tasks that involve human decision-making, subjective evaluation, or business judgment are not suitable for automation through RPA, as these require contextual understanding and cognitive reasoning." It also specifies:

"Processes that occur infrequently, such as quarterly or annual events, are not ideal candidates for automation due to low execution frequency and limited ROI from automation development and maintenance." Therefore:

* Option A: Complex processes that require human decision management - # Not suitable, as they depend on human reasoning.

* Option D: Rarely occurring processes such as sending annual reports - # Not suitable, since they do not provide sufficient automation value or frequency.

* Options B, C, and E describe processes that are well-suited for Pega Robotics (they are repetitive, multi-application, or rules-driven).

NEW QUESTION # 72

Consider the following figure of an automation:

What is the value of firstDateToCompare and secondDateToCompare after the the automation runs?

- A. firstDateToCompare: 12/31/2022, secondDateToCompare: 1/15/2023
- B. firstDateToCompare: 1/15/2023, secondDateToCompare: 1/1/2022
- C. firstDateToCompare: 12/31/2022, secondDateToCompare: 1/15/2022
- D. firstDateToCompare: 12/31/2023, secondDateToCompare: 1/15/2022

Answer: B

Explanation:

According to Pega Robotics Studio - DateTime Utilities and Comparison Logic (Automation Components Reference Guide):

"The DateTimeUtil component provides functionality for manipulating and comparing date and time values.

The component can return the result of comparing two DateTime variables as Before, Equal, or After, depending on whether the first date occurs earlier, is the same, or occurs later than the second date." In this automation:

* firstDateToCompare = 12/31/2022

* secondDateToCompare = 1/1/2022

As per Pega Robotics internal logic (based on .NET DateTime structure used within the platform):

"When two DateTime values are compared, if the first value represents a later point in time than the second value, the comparison returns 'After'. The automation then executes the path corresponding to that result." Since 12/31/2022 occurs after 1/1/2022, the "After" branch executes.

That branch contains the following operation:

"The AddDays method adds the specified number of days to the current DateTime value and returns a new DateTime object that represents the resulting date and time." The automation adds 15 days to firstDateToCompare, resulting in:

* firstDateToCompare = 1/15/2023

* secondDateToCompare remains 1/1/2022 (unchanged)

Finally, the automation displays both values using the MessageDialog component.

"Use the MessageDialog component to display messages or variable values during runtime execution for verification or interaction with the user." Final Verified Outcome firstDateToCompare = 1/15/2023 secondDateToCompare = 1/1/2022 Therefore, the correct answer is Option D.

NEW QUESTION # 73

Which two statements are valid for the given automation? (Choose two.)

- A. Assign Main|b|NearestStore with the new value only if the value changed belongs to an active key.
- B. The automation is initiated when the value of the NearestStore changes.
- C. The value of the NearestStore changes when the automation is initiated.
- D. Assign Main|b|NearestStore with the new value when the value of the NearestStore changes.

Answer: A,C

NEW QUESTION # 74

An attended automation sources a data page to populate properties in your Pega application. Though several debugging tests show the automation executing fully, the automation does not properly source the data page in time to return the values to the Pega application.

This issue may be a result of which one of the options below?

- A. The automation does not return the proper SetCompletionStatus.
- B. The automation runs longer than the default data page timeout of 60 seconds.
- C. The robot activity ClassName property value is incorrect.
- D. The automation runs faster than the data page can perform a data transform.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega, when a data page is configured with a Robotic Desktop Automation (RDA) as its source, the automation must complete execution and return its response within a predefined timeout period. The default timeout value for data pages calling robotic automations is 60 seconds.

According to the Pega Robotics System Design and Implementation Guide, section "Data Page Integration with Robotic Desktop Automations":

"When a Pega data page calls a robotic automation as its data source, the automation must complete and return its data within the timeout threshold.

If the automation's execution time exceeds the timeout period (default 60 seconds), the data page fails to receive the response, resulting in an empty or incomplete data return to Pega Platform." Detailed Reasoning:

* If the automation executes successfully but takes longer than the defined timeout, the Pega Platform assumes the call failed and releases the data page before the response arrives.

* This causes the data page not to be populated, even though the Robot Studio logs show successful automation completion.

* Increasing the timeout value or optimizing automation performance typically resolves this issue.

Option Analysis:

* A. The automation runs longer than the default data page timeout of 60 seconds.

* Correct. Exceeding the timeout prevents the data page from capturing the automation's response.

* B. The robot activity ClassName property value is incorrect.

* Incorrect. This would prevent the automation from running entirely, not delay the response.

* C. The automation runs faster than the data page can perform a data transform

* Incorrect. Pega manages data transforms synchronously after data retrieval, so this is not applicable.

* D. The automation does not return the proper SetCompletionStatus.

* Incorrect. If completion status were missing, the automation would fail altogether, not time out.

Therefore, the issue occurs because the automation execution exceeds the default 60-second data page timeout.

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Robotic Desktop Automation (RDA) Data Page Timeout and Synchronization Settings section (Pega Robotics 19.1 and later).

NEW QUESTION # 75

After setting up Start My Day, the end user makes some changes in the Manage Applications window to prioritize and manage the applications configured to launch using the Start My Day functionality.

□ Which of the following applications does the user see on the desktop after using the Start My Day functionality?

- A. ACMESearchSystem, CRM, Notepad++, BankerInsight
- B. **ACMESearchSystem, Notepad++, BankerInsight**
- C. CRM, BankerInsight
- D. CRM, Notepad++, BankerInsight

Answer: B

NEW QUESTION # 76

.....

We also have dedicated staffs to maintain updating PEGACRSA22V1 practice test every day, and you can be sure that compared to other test materials on the market, PEGACRSA22V1 quiz guide is the most advanced. With PEGACRSA22V1 exam torrent, there will not be a situation like other students that you need to re-purchase guidance materials once the syllabus has changed. Even for some students who didn't purchase PEGACRSA22V1 Quiz guide, it is impossible to immediately know the new contents of the exam after the test outline has changed. PEGACRSA22V1 practice test not only help you save a lot of money, but also let you know the new exam trends earlier than others.
