

# 2026 NCP-MCI-6.10 Exam Sample Online : Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Realistic NCP-MCI-6.10 100% Pass

What's more, part of that Pass4Test NCP-MCI-6.10 dumps now are free: [https://drive.google.com/open?id=1\\_mpstSx98dilCEo5\\_\\_whO5nqXMiM1JEQ](https://drive.google.com/open?id=1_mpstSx98dilCEo5__whO5nqXMiM1JEQ)

If you want to know the latest information for the exam timely, you can choose us, we can do that for you. We offer you free update for one year for NCP-MCI-6.10 learning materials, so that you can obtain the latest information for the exam. Our system will send you the latest version automatically, and you just need to examine your email for the latest version. In addition, NCP-MCI-6.10 Exam Materials are high-quality, and you can improve your efficiency by using them. We have online and offline service, and if you have any questions for NCP-MCI-6.10 exam braindumps, you can contact us, and we will give you reply as quickly as we can.

## Nutanix NCP-MCI-6.10 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>• Configure Disaster Recovery and Data Protection within a Nutanix Multicloud Environment: This section of the exam measures the skills of Disaster Recovery Specialists and Cloud Engineers and covers configuring protection policies and domains for data security and recovery. Candidates need to identify the right entities for protection, schedule backups, define retention policies, and set up replication to remote sites. Recovery plans must be configured and executed with proper scripting, network mapping, and failover strategies. Metro replication requires understanding failover methodologies, comparing solutions on different hypervisors, and preventing split-brain scenarios. Effective disaster recovery planning ensures minimal downtime and data integrity across environments.</li></ul> |
|         |  |

|         |   |
|---------|---|
| Topic 2 | <ul style="list-style-type: none"> <li>• <b>Manage Clusters within a Nutanix Multicloud Environment:</b> This section of the exam measures the skills of Infrastructure Engineers and Systems Administrators and covers the administration of Nutanix clusters. Storage management includes creating, reading, updating, and deleting storage containers and volume groups. Configuring AOS and Prism Central settings involves authentication, SSL certificate management, IAM role-based access control, and configuring network segmentation. Network administration procedures focus on creating VLAN-backed subnets, virtual switches, and load-balancing policies while monitoring NIC usage. Lifecycle management includes performing hardware and software updates and maintaining firmware. Hardware maintenance involves adding or removing nodes and physical disks while ensuring proper upgrades and replacements. Intelligent operations require configuring capacity policies, discovering application relationships, and simulating scenarios to optimize performance.</li> </ul> |
| Topic 3 | <ul style="list-style-type: none"> <li>• <b>Troubleshoot a Nutanix Multicloud Environment:</b> This section of the exam measures the skills of Technical Support Engineers and IT Operations Specialists and covers diagnosing and resolving common issues within a Nutanix multi-cloud environment. Troubleshooting protection policies and recovery plans requires identifying network mapping failures, vNIC issues, script execution problems, and connectivity failures. Metro replication troubleshooting involves addressing naming conventions, network limitations, and replication states. Security issues in AOS and Prism Central must be resolved by managing CVM communications, security warnings, and log analysis. LCM operations require diagnosing failures in inventory updates and version upgrades. Performance troubleshooting involves analyzing logs, reading performance charts, and adjusting VM configurations to meet performance needs.</li> </ul>  |
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Conduct Custom Monitoring within a Nutanix Multicloud Environment:</b> This section of the exam measures the skills of Cloud Analysts and Systems Engineers and covers custom monitoring for optimized performance management. Candidates must analyze performance charts, set retention policies, create custom service level agreements (SLAs), and manage storage based on policies. Creating reports involves identifying the required type, selecting generation frequency, determining retention properties, and customizing report formats for different monitoring needs. Effective monitoring ensures better resource utilization, system efficiency, and proactive issue resolution within the multi-cloud environment.</li> </ul>  |
| Topic 5 | <ul style="list-style-type: none"> <li>• <b>Manage VMs within a Nutanix Multicloud Environment:</b> This section of the exam measures the skills of Cloud Administrators and Virtualization Engineers and covers managing virtual machines (VMs) within a Nutanix multicloud environment. It includes creating and updating VMs by determining hardware requirements, boot modes, sizing, and configuration based on application needs. Candidates must understand how to deploy VMs using templates, snapshots, and image configurations, ensuring the correct formats for importing and exporting VMs. Migration processes require knowledge of prerequisites, storage, network settings, and software compatibility. Additionally, configuring VM categories and attributes is essential for proper organization and management within the environment, ensuring alignment with labels, storage policies, and security settings.</li> </ul>  |

## Nutanix NCP-MCI-6.10 Reliable Exam Bootcamp | NCP-MCI-6.10 Latest Dumps Free

With the aid of our Nutanix NCP-MCI-6.10 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our Nutanix NCP-MCI-6.10 learning questions. Our Nutanix NCP-MCI-6.10 training questions are the accumulation of professional knowledge worthy practicing and remembering.

## Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q108-Q113):

### NEW QUESTION # 108

Which storage attributes do Storage Policies manage?

- A. Data Protection and Security
- B. Shares and Object Stores

- C. Storage Containers and Volume Groups
- **D. Replication Factor and Encryption**

**Answer: D**

Explanation:

Storage Policies in Nutanix allow administrators to configure data protection and performance settings at the storage container level.

- \* Replication Factor (RF) defines the number of copies of data stored across nodes for fault tolerance.
- \* Encryption ensures that data at rest is protected via Nutanix-native encryption methods.
- \* Option A (Storage Containers and Volume Groups) refers to storage organization, not policies.
- \* Option C (Shares and Object Stores) applies to file and object storage services, not VM storage policies.
- \* Option D (Data Protection and Security) is a broad term but does not define specific policy attributes.

References:

- \* Nutanix Prism Element #Storage Policies and Replication Factor (RF)
- \* Nutanix Bible #Storage Fabric and Data Resiliency
- \* Nutanix KB #Enabling Encryption in Storage Policies

### NEW QUESTION # 109

Per organizational requirements, an administrator has uploaded a signed SSL certificate to Prism for Common Access Card (CAC) authentication.

Once the certificate has been uploaded successfully, the certificate appears to be valid but CAC authentication is not functional. What is a potential cause of this problem?

- A. Signature Algorithm is incorrect.
- B. RSA key size is incorrect.
- **C. There is no Certificate Revocation List (CRL) configured.**
- D. Online Certificate Status Protocol (OCSP) is not enabled.

**Answer: C**

### NEW QUESTION # 110

A company is evaluating Nutanix DR to protect some business critical applications and tasked an administrator to find an optimal configuration providing highest resiliency and lowest RPO to the production environment.

The company's production environment is deployed on two physical sites with each hosting one AHV-based cluster.

What configuration will meet the company's requirements?

- A. Deploy one Prism Central instance on each site and configure synchronous replication using Protection Policy.
- B. Deploy Prism Central instance on each site. Configure Metro Availability using Protection Domains.
- **C. Deploy Prism Central instance on one of the sites. Configure NearSync replication using Protection Domains.**
- D. Deploy Prism Central instance on one of the sites, configure Prism Central Disaster Recovery, and setup Metro AHV

**Answer: C**

### NEW QUESTION # 111

An administrator has received complaints about VM performance.

After reviewing the VM's CPU Ready Time data shown in the exhibit, which step should the administrator take to diagnose the issue further?

- A. Check the number of CPUs assigned to each CVM
- B. Enable VM memory oversubscription
- **C. Review host CPU utilization**
- D. Assess cluster SSD capacity

**Answer: C**

Explanation:

Nutanix performance troubleshooting guidelines highlight CPU Ready Time as a key indicator of CPU contention. The documentation explains:

"High CPU Ready Time indicates that vCPUs are waiting to be scheduled on physical cores due to host CPU saturation or CPU overcommitment." CPU Ready Time does not relate to storage issues or CVM sizing. Instead, it indicates that the hypervisor cannot schedule VM CPU operations promptly.

Internal extracts clearly describe the next diagnostic step:

"When CPU ready metrics rise, the first step is to check physical host CPU utilization to confirm whether the host is oversubscribed or running at high CPU usage." If the host is overloaded, remediation includes distributing VMs across hosts, reducing vCPU count on oversized VMs, or adding compute resources.

Other options are irrelevant:

\* Memory oversubscription is unrelated to CPU Ready Time.

\* SSD capacity affects storage latency, not CPU scheduling.

\* CVM CPU counts do not cause VM CPU Ready Time; CVM resource misconfiguration affects cluster services, not guest VM scheduling.

Thus, reviewing host CPU utilization is the correct next step.

### NEW QUESTION # 112

Which Nutanix feature predicts future resource utilization and capacity needs?

- A. Xi IoT
- B. Nutanix Beam
- **C. Prism Pro Capacity Planning**
- D. Nutanix Move

**Answer: C**

### NEW QUESTION # 113

.....

Pass4Test is here to help of you to make your NCP-MCI-6.10 certification dream true by providing the best valid and latest exam Nutanix NCP-MCI-6.10 study reference. If you still have doubt about our NCP-MCI-6.10 exam dumps. Please pay attention to our NCP-MCI-6.10 free demo on the product page. You can download the free demo and have a try. Then I believe you can make the decision. Generally, there are explanations along with the questions, which will make you learn more about the knowledge about NCP-MCI-6.10 Actual Test. Please prepare well with the NCP-MCI-6.10 study material we provide for you. We guarantee you can pass the NCP-MCI-6.10 actual test with a high score.
