1 / 4

SAP certification C_S4CPB_2602 exams has a pivotal position in the IT industry, and I believe that a lot of IT professionals agree with it. Passing SAP certification C_S4CPB_2602 exam has much difficulty and needs to have perfect IT knowledge and experience. Because after all, SAP certification C_S4CPB_2602 exam is an authoritative test to inspect examinees' IT professional knowledge. If you have got a SAP C_S4CPB_2602 Certification, your IT professional ability will be approved by a lot of IT company. BraindumpQuiz also has a pivotal position in IT training industry. Many IT personnels who have passed SAP certification C_S4CPB_2602 exam used BraindumpQuiz's help to pass the exam. This explains why BraindumpQuiz's pertinence training program is very effective. If you use the training material we provide, you can 100% pass the exam.

C_S4CPB_2602 exam dumps are so comprehensive that you do not need any other study material. The C_S4CPB_2602 study material is all-inclusive and contains straightaway questions and answers comprising all the important topics in the actual C_S4CPB_2602 demo vce. C_S4CPB_2602 latest download demo is available for all of you. You can know the exam format and part questions of our Complete C_S4CPB_2602 Exam Dumps. Besides, we can ensure 100% passing and offer the Money back guarantee when you choose our C_S4CPB_2602 pdf dumps.

>> C_S4CPB_2602 Actual Test Pdf <<

Valid C_S4CPB_2602 Test Voucher - C_S4CPB_2602 Sure Pass

In addition to the advantages of high quality, our C_S4CPB_2602 study materials also provide various versions. In order to meet

your personal habits, you can freely choose any version within PDF, APP or PC version. Among them, the PDF version is most suitable for candidates who prefer paper materials, because it supports printing. If you want to use our C_S4CPB_2602 Study Materials on your phone at any time, then APP version is your best choice as long as you have browsers on your phone.

SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Sample Questions (Q17-Q22):

NEW QUESTION # 17

SIMULATION

Business Scenario You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a new business user with the following information by importing the new user's data:

□ Import Name: Project Manager Test User #####

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a test user in SAP S/4HANA Cloud for demonstrating professional services business processes to project managers during a Fit-to-Standard workshop.

This task is completed by importing:

worker data

work agreement data

The import must use the exact values provided in the task.

Business Scenario Explanation

In this scenario, you need a test user that represents a Project Manager.

This user is needed so that project-management-related professional services processes can later be demonstrated in the system.

Instead of creating every record manually, SAP asks you to use the import process.

This is faster and also ensures the worker and agreement data are loaded in the correct structure.

□ **Important Notes**

Always replace ##### with the last 6 digits of your group number.

Use the values exactly as provided.

Do not change spaces, punctuation, or capitalization unless the task explicitly tells you to.

A wrong value, extra space, or missing number can cause task validation failure.

□ If your suffix is 000013, then the values become:

Worker ID = 1000013

User Name = PM000013

First Name = Project

Last Name = Manager 000013

Email = PM000013@dummy.sap.com

Step 1: Open the app used for importing users/workers

From the SAP S/4HANA Cloud launchpad:

Log in to the system.

Open the relevant import app used in your simulation for importing worker and work agreement data.

Start creation of a new import.

Explanation:

This task is not done by manual user creation only.

The scenario specifically says to create the new business user by importing the new user's data.

The import will load the basic worker and work agreement records that are required before the business user is fully usable.

Step 2: Enter the import name

When creating the import:

In the field Import Name, enter:

Project Manager Test User #####

Replace ##### with your own 6-digit group suffix.

Example

For suffix 000013, enter:

Project Manager Test User 000013

Explanation:

The import name identifies your import package and should be entered exactly as required by the task.

Step 3: Prepare the worker data

In the worker import structure, enter these values:

Worker ID = 1#####

User Name = PM#####

Worker Type = BUP003

First Name = Project

Last Name = Manager #####

Email = PM#####@dummy.sap.com

Language = EN

Company Code = 1010

Cost Center = 10101501

Example for 000013

Worker ID = 1000013

User Name = PM000013

Last Name = Manager 000013

Email = PM000013@dummy.sap.com

Explanation:

These values define the person as a project manager test worker and connect the worker to:

the company code,

the cost center,

the default language,

and the worker type required by the scenario.

Step 4: Prepare the work agreement data

In the work agreement import structure, enter:

Start Date = today's date in YYYYMMDD format

End Date = 99991231

Example

If today's date is March 30, 2026:

Start Date = 20260330

End Date = 99991231

Explanation:

The end date 99991231 is used to indicate an open-ended validity.

This is common in SAP for a record that should remain valid indefinitely.

Step 5: Upload or enter the import data

Depending on the app behavior in your exercise:

Upload the prepared import file or

Enter the values into the import structure manually if the system provides inline entry.

Explanation:

The business scenario says the business user must be created by importing worker and work agreement data.

This means the relevant master data must be loaded into the system first before the user is fully available.

Step 6: Start the import

After all values are entered:

Validate the data if the system provides a validation option.

Start the import.

Explanation:

Validation checks whether:

required fields are filled,

date formats are correct,

codes like BUP003, 1010, and 10101501 are valid,

and the import structure is complete.

Step 7: Wait for the import to complete

Monitor the import process.

Wait until the import shows success or completed status.

Explanation:

Only after the import is complete will the worker and work agreement records exist in the system and be usable for further user setup and role assignment.

Step 8: Verify the imported worker/business user

After the import finishes:

Open the relevant business user / worker maintenance app.

Search using:

Worker ID

or User Name

Confirm that the imported user exists.

Explanation:

This step ensures the imported data was actually created and is available for later process demonstrations.

Expected Result

After the import is completed successfully:

a new test worker/user exists in the system,

the worker has the required professional-services identity,

the work agreement is valid,

the user can be used in later project manager demonstrations.

□

NEW QUESTION # 18

SIMULATION

Create a Business User and Assign a Business Role

Business Scenario

You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the HR Administrator (BR_ADMINISTRATOR_HRINFO) business role to your user.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR_ADMINISTRATOR_HRINFO

Business Role Description: Administrator - HR Info

Task 3: Assign the HR Administrator Business Role to Your User

Objective

The purpose of this task is to assign the HR Administrator business role to your own business user so you can continue the worker, work agreement, and business user setup activities required for the professional services scenario.

The required business role is:

Business Role ID: BR_ADMINISTRATOR_HRINFO

Business Role Description: Administrator - HR Info

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search or launchpad search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to maintain user master data and assign business roles.

All business role assignments for your own user are done here.

Step 2: Search for your own user

In Maintain Business Users:

In the filter/search area, enter your own user name or user ID.

Click Go.

Explanation:

You need to open your own user because the HR Administrator role must be assigned to your own account before continuing the simulation.

Step 3: Open your user record

After the search results appear:

Click your own user in the result list.

Open the detail page.

Explanation:

This opens the business user detail screen where all assigned roles can be reviewed and maintained.

Step 4: Switch to Edit mode

On the user detail page:

Click Edit.

Explanation:

Edit mode is required before you can add or remove business roles.

Without edit mode, the Assigned Business Roles tab is display-only.

Step 5: Open the "Assigned Business Roles" tab

Inside your user record:

Click the tab:

Assigned Business Roles

Explanation:

This tab lists all current roles assigned to your user and is the correct place to add BR_ADMINISTRATOR_HRINFO.

Step 6: Click "Add"

In the Assigned Business Roles section:

Click Add

This opens the dialog:

Add Business Roles

Explanation:

This popup allows you to search for standard SAP business roles by ID or description.

Step 7: Search for the HR Administrator role

In the Add Business Roles popup:

In Business Role ID, enter:

BR_ADMINISTRATOR_HRINFO

Click Go

Select the role:

Administrator - HR Info

Business Role ID: BR_ADMINISTRATOR_HRINFO

Explanation:

This is the exact role required by the task.

It gives you the workforce / HR information administration permissions needed for the later simulation steps.

Step 8: Add the role to the user

After selecting the role:

Click OK or Apply

The role should now appear in your assigned roles list.

Explanation:

At this stage, the role is added to the user in draft mode, but it is not yet permanently stored until you save.

Step 9: Save the business user

Back on the business user detail page:

Click Save

Explanation:

Saving is mandatory.

If you do not save, the role assignment remains incomplete and later tasks may fail because your user will not actually have the HR Administrator authorization.

Step 10: Verify the role assignment

After saving, verify that the role appears in the assigned roles list:

BR_ADMINISTRATOR_HRINFO

Administrator - HR Info

Explanation:

This is your proof that the task is complete.

You should see the HR role together with your other assigned roles.

Expected Result

After completing this task successfully:

your user has the HR Administrator role assigned,

the role appears in Assigned Business Roles,

the user is saved successfully,

later worker/business-user creation steps can be performed.

Why this role matters

The role BR_ADMINISTRATOR_HRINFO is required because the scenario involves:

worker information,

work agreement information,

user creation for workshop demonstration,

HR-related administration steps.

In SAP S/4HANA Cloud, access is always role-based, so assigning this role is an authorization prerequisite for later tasks.

NEW QUESTION # 19

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Use the correct app to verify your data has been migrated successfully (see the documentation for the Bank migration object).

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to use the correct SAP app to verify that the bank master data migrated in the previous task was created successfully in the target system.

The correct verification app is:

Manage Banks - Master Data

SAP's documentation for bank maintenance assigns this app to the bank master data role and uses it for maintaining and checking bank records, which matches the verification step after migration.

Business Scenario Explanation

In the previous migration tasks, you:

created the migration project,

selected the Bank migration object,

prepared and uploaded the bank data,

validated and transferred it to staging tables,

completed mapping tasks,

migrated the two bank records.

However, a migration is not considered complete until the data is verified in the target application used for ongoing business maintenance.

For the Bank migration object, that target verification app is:

Manage Banks - Master Data

This app allows you to search for the migrated banks and confirm that the data now exists in SAP S/4HANA Cloud Public Edition.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact bank values that were migrated.

Verification must be done in the correct app, not only in the migration cockpit.

The expected bank records are the two banks from the previous task.

Correct Verification App

Purpose

App

Verify migrated bank master data

Manage Banks - Master Data

SAP documents that bank master maintenance is handled through the bank master data application and the associated bank maintenance role/catalog, which is why this is the correct end-user verification app after bank migration.

Data to Verify

You should verify the two migrated banks:

Bank 1

Bank Country/Region = US

Bank Key = A#####

Bank Name = Bank of A#####

Bank 2

Bank Country/Region = US

Bank Key = Z#####

Bank Name = Bank of Z#####

Example

If your suffix is 000013, verify:

US / A000013 / Bank of A000013

US / Z000013 / Bank of Z000013

Detailed Step-by-Step Procedure

Step 1: Return to the SAP Fiori launchpad

After finishing the migration:

Go back to the SAP S/4HANA Cloud homepage.

Explanation:

The verification must be performed in the target business app, not only from the migration results screen.

Step 2: Open the app "Manage Banks - Master Data"

From the launchpad search:

Search for:

Manage Banks - Master Data

Open the app.

Explanation:

This is the correct app for checking whether the migrated bank master records now exist in the target system.

Step 3: Search for the first migrated bank

In Manage Banks - Master Data:

In Bank Country/Region, enter:

US

In Bank Key, enter:

A#####

Click Go

Example

If your suffix is 000013, search for:

Bank Country/Region = US

Bank Key = A000013

Explanation:

This checks whether the first migrated bank was created successfully.

Step 4: Verify the first bank details

Confirm that the search result shows the correct bank record:

Bank Country/Region = US

Bank Key = A#####

Bank Name = Bank of A#####

You can also verify address data if visible, such as:

Street = West Chester Pike

City = Newtown Square

Explanation:

This confirms that the first bank master record exists in the target system after migration.

Step 5: Search for the second migrated bank

Clear or update the search criteria and enter:

Bank Country/Region = US

Bank Key = Z#####

Click Go

Example

If your suffix is 000013, search for:

Bank Country/Region = US

Bank Key = Z000013

Explanation:

This checks whether the second migrated bank was created successfully.

Step 6: Verify the second bank details

Confirm that the second search result shows:

Bank Country/Region = US

Bank Key = Z#####

Bank Name = Bank of Z#####

You can also verify address data if visible, such as:

Street = Lenox Road

City = Atlanta

Explanation:

This confirms that the second bank master record exists in the target system after migration.

Step 7: Confirm successful verification

If both banks are visible in Manage Banks - Master Data, the migration verification is successful.

Explanation:

This is the final proof that the migration did not only complete technically in the cockpit, but also posted the expected business data into the target application.

Expected Result

After this task is completed successfully:

the app Manage Banks - Master Data is used for verification,

Bank 1 is visible:

US / A##### / Bank of A#####

Bank 2 is visible:

US / Z##### / Bank of Z#####

the migrated bank data is confirmed as successfully created in the target system.

NEW QUESTION # 20

SIMULATION

Note: In this practical certification exam, you will only be given high-level instructions. The step descriptions are complete and tested to work. They are not detailed, as this is a test of your knowledge of navigating the system on your own.

Caution: Please make sure you are always using your assigned group number. The last 6 digits are denoted as ##### in the following tasks. Your results will not be recorded if you are not using your own group number. To find your group number: Select your user in the top right corner. You will see your user name with a series of numbers. Use the last 6 digits as your group number.

Caution: To keep the system running smoothly and avoid unnecessary costs, please follow the assigned exercises carefully when using the SAP Landscape. Avoid going beyond the exercise scope and only use your group number to help maintain a stable and efficient environment for everyone.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Purpose: Identify your own six-digit suffix and use it consistently in every task.

Open the user menu at the top-right of SAP S/4HANA Cloud.

Read your user name and note the last six digits.

Use those last six digits in every place the task PDF shows #####.

Example used in this guide: 000013

NEW QUESTION # 21

SIMULATION

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (1EG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication User with the information listed below and save.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a new Communication User for the integration scenario Bank Integration with File Interface (1EG).

This communication user will later be used in the integration setup, especially when defining the communication system and communication arrangement.

Business Scenario Explanation

In this scenario, you are setting up the integration for:

Bank Integration with File Interface (1EG)

In SAP S/4HANA Cloud, technical communication between systems is usually handled through:

a Communication User

a Communication System

a Communication Arrangement

This task is the first step in that chain.

The communication user acts as the technical user that the system uses for integration-related authentication.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values shown in the task.

Do not change spaces, underscores, or capitalization.

The password should not be typed manually if the task says:

Have the system propose a password

Required Values

Use the following values exactly as shown in the task image.

Example

If your suffix is 000013, then the values become:

User Name = 1EG_COMM_USER_000013

Description = 1EG Communication User

Step 1: Open the app "Communication Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Users

or

Maintain Communication Users

Open the app.

Explanation:

This app is used to create and maintain technical communication users for integration scenarios.

This is the correct starting point because the task explicitly says to create a Communication User.

Step 2: Start creating a new communication user

Inside the Communication Users app:

Click:

New

Explanation:

This starts the creation of a new communication user record.

Step 3: Enter the User Name

In the new communication user screen, enter:

User Name = 1EG_COMM_USER_#####

Example

If your suffix is 000013, enter:

1EG_COMM_USER_000013

Explanation:

This is the technical identifier for the communication user.

It must match the task exactly.

Step 4: Enter the Description

In the Description field, enter exactly:

1EG Communication User

Explanation:

This is the functional description of the technical integration user.

It should be entered exactly as written in the task to avoid validation issues.

Step 5: Let the system propose the password

In the password section:

Do not manually type a password.

Click:

Propose Password

Explanation:

The task explicitly says:

Password = Have the system propose a password

So the correct action is to use the SAP-generated password instead of entering your own value manually.

Step 6: Review the generated password

After clicking Propose Password:

The system generates a password automatically.

If the system displays the password, note it down if needed for later integration steps.

Explanation:

In some cases, the proposed password may later be needed during communication setup or documentation.

Even if not needed later in the simulation, this confirms the correct procedure was followed.

Step 7: Save the Communication User

Click:

Save

Explanation:

This finalizes the creation of the communication user.

Without saving, the technical user will not exist and the later integration steps will fail.

Step 8: Verify the Communication User

After saving, confirm that the communication user exists in the list and displays the correct values:

User Name = 1EG_COMM_USER_#####

Description = 1EG Communication User

Explanation:

This confirms the task is complete and the user is ready to be used in the next integration setup tasks.

Expected Result

After this task is completed successfully:

the communication user exists,

the user name matches the required naming convention,

the description is correct,

the password was proposed by the system,

the user is saved successfully.

□

NEW QUESTION # 22

.....

To make sure that our candidates can learn the C_S4CPB_2602 preparation materials in the least time with the least efforts, they have compiled all of the content to be contained in the shortest possible number of C_S4CPB_2602 exam questions. Additionally,

the C_S4CPB_2602 exam questions and answers have been designed on the format of the real exam so that the candidates learn it without any extra effort. We have carefully considered every aspects for our customers. And our C_S4CPB_2602 Practice Braindumps are perfect in every detail.

Valid C_S4CPB_2602 Test Voucher: https://www.braindumpquiz.com/C_S4CPB_2602-exam-material.html
