

Reliable AZ-800 Test Pattern & AZ-800 Instant Access

The purpose of our product is to let the clients master the AZ-800 quiz torrent and not for other illegal purposes. Our system is well designed and any person or any organization has no access to the information of the clients. So please believe that we not only provide the best AZ-800 test prep but also provide the best privacy protection. Take it easy. If you really intend to pass the AZ-800 Exam, our software will provide you the fast and convenient learning and you will get the best study materials and get a very good preparation for the exam. The content of the AZ-800 guide torrent is easy to be mastered and has simplified the important information.

Our Administering Windows Server Hybrid Core Infrastructure test torrent was designed by a lot of experts in different areas. You will never worry about the quality and pass rate of our study materials, it has been helped thousands of candidates pass their exam successful and helped them find a good job. If you choose our AZ-800 study torrent, we can promise that you will not miss any focus about your exam. There are three different versions to meet customers' needs you can choose the version that is suitable for you to study. If you buy our Administering Windows Server Hybrid Core Infrastructure test torrent, you will have the opportunity to make good use of your scattered time to learn whether you are at home, in the company, at school, or at a metro station.

Microsoft Reliable AZ-800 Test Pattern: Administering Windows Server Hybrid Core Infrastructure - TestPassed Updated Download

You can alter the duration and quantity of Microsoft AZ-800 questions in these Microsoft AZ-800 practice exams as per your

training needs. For offline practice, our AZ-800 desktop practice test software is ideal. This AZ-800 software runs on Windows computers. The AZ-800 web-based practice exam is compatible with all browsers and operating systems.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q114-Q119):

NEW QUESTION # 114

You have an Azure virtual machine named Server1 that runs a network management application. Server1 has the following network configurations:

- * Network interface: Nic1
- * IP address: 10.1.1.1/24
- * Connected to: VnetVSubnet1

You need to connect Server1 to an additional subnet named Vnet1/Subnet2.

What should you do?

- A. Add an IP configuration to Nic1.
- **B. Add a network interface to Server1.**
- C. Create a private endpoint on Subnet2
- D. Modify the IP configurations of Nic1.

Answer: B

NEW QUESTION # 115

You have a Windows server named Server1.

You add two 4-TB hard drives named Disk1 and Disk2 to Server1.

You need to format the drives. The solution must meet the following requirements:

- * Disk1 must support disk level quotas.
- * Disk2 must support Data Deduplication.

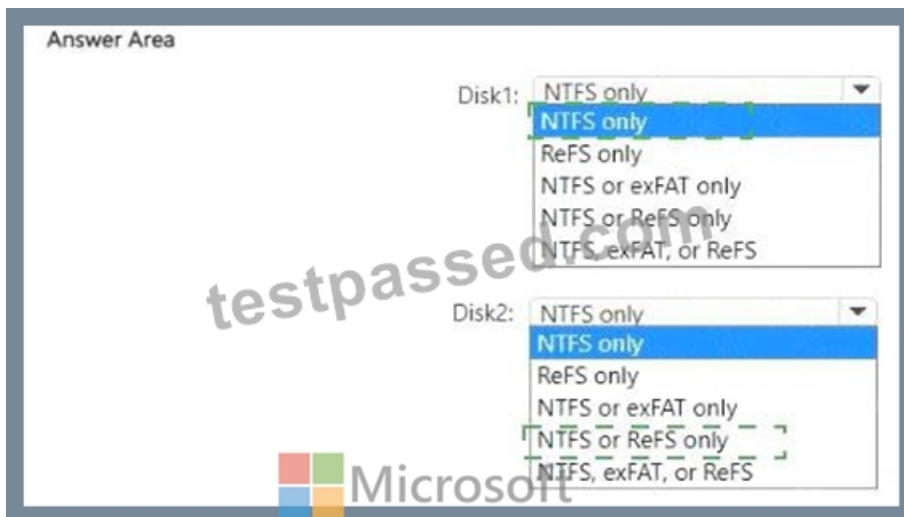

Which type of file system should you use for each drive? To answer, select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Disk1: NTFS only

Disk2: NTFS or ReFS only

The Windows Server Hybrid Core Infrastructure objectives specify that disk (volume) quotas—the classic per-user/per-volume quota feature exposed in the volume's properties—are a capability of NTFS. The guidance states that "NTFS supports user and volume quotas that can be configured per volume; ReFS does not implement the legacy NTFS disk-quota mechanism." Therefore, to meet the requirement that Disk1 must support disk-level quotas, the volume must be formatted as NTFS.

For Data Deduplication, the storage module explains that Data Deduplication is a file-system feature available on modern Windows Server versions and that it is "supported on NTFS volumes and on ReFS volumes beginning with Windows Server 2019/2022 scenarios." The same materials emphasize that exFAT doesn't support Windows Server features such as quotas or dedup.

Consequently, to satisfy the requirement that Disk2 must support Data Deduplication, you can format Disk2 as NTFS or ReFS; both file systems are valid for dedup workloads on current Windows Server releases, while exFAT is not.

Thus:

* Disk1 # NTFS only (to enable disk-level quotas).

* Disk2 # NTFS or ReFS only (to enable Data Deduplication).

NEW QUESTION # 116

Your network contains an Active Directory Domain Services (AD DS) domain named conioso.com.

You need to identify which server is the PDC emulator for the domain.

Solution: from Active Directory Users and Computers, you right-click contoso.com in the console tree, and then select Operations Master Does this meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 117

Your on-premises network contains a server named Server1 and uses an IP address space of 192.168.10.0/24.

You have an Azure virtual network that contains a subnet named Subnet1. Subnet1 uses an IP address space of 192.168.10.0/24.

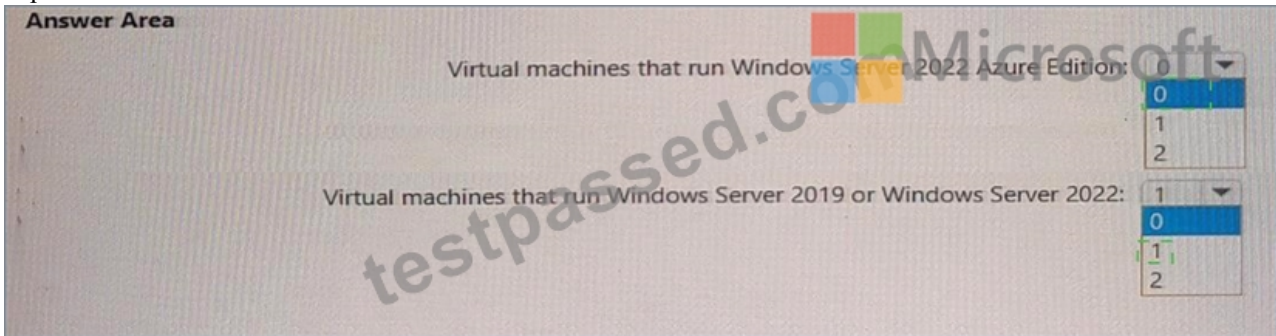

You need to migrate Server1 to Subnet1. You must use Azure Extended Network to maintain the existing IP address of Server1. What is the minimum number of virtual machines that you should deploy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

Explanation:

NEW QUESTION # 118

Your network contains an Active Directory Domain Services (AD DS) domain named adatum.com. The domain contains a file server named Server1 and three users named User1, User2, and User3.

Server1 contains a shared folder named Share1 that has the following configurations:

ShareState	Microsoft	Online
AvailabilityType		NonClustered
FolderEnumerationMode		AccessBased
CachingMode		Manual
LeasingMode		Full
SmbInstance		Default
CompressData		False
ContinuouslyAvailable		False
EncryptData		False
Name		Share1
Path		E:\Share1
ShadowCopy		False

The share permissions for Share1 are configured as shown in the Share Permissions exhibit.

Share1 contains a file named File1.txt. The advanced security settings for File1.txt are configured as shown in the File Permissions exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
