

JN0-460공부문제 - JN0-460최고덤프샘플

BONUS!!! KoreaDumps JN0-460 시험 문제집 전체 버전을 무료로 다운로드하세요: <https://drive.google.com/open?id=1XRlaVr5zHJy1mjfX8n3q0RLxIIxbF1nT>

경쟁율이 심한 IT시대에 Juniper JN0-460인증시험을 패스하여 자격증을 취득함으로써 IT업계 관련 직종에 종사하고자 하는 분들에게는 아주 큰 가산점이 될수 있고 자신만의 위치를 보장할수 있으며 더욱이는 한층 업된 삶을 누릴수 있을수도 있습니다. Juniper JN0-460 덤프로 Juniper JN0-460 시험에서 실패하면 덤프비용을 보상해드리기에 안심하고 시험준비하셔야 합니다.

Juniper JN0-460 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
주제 2	<ul style="list-style-type: none"> • Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
주제 3	<ul style="list-style-type: none"> • Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
주제 4	<ul style="list-style-type: none"> • Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.

주제 5	<ul style="list-style-type: none"> • Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.

시험패스 가능한 JN0-460공부문제 덤프데모문제

KoreaDumps에서는 시장에서 가장 최신버전이자 적용율이 가장 높은 Juniper인증 JN0-460덤프를 제공해드립니다. Juniper인증 JN0-460덤프는 IT업종에 몇십년간 종사한 IT전문가가 실제 시험문제를 연구하여 제작한 고품질 공부자료로서 시험패스율이 장난 아닙니다. 덤프를 구매하여 시험에서 불합격성적표를 받으시면 덤프비용 전액을 환불해드립니다.

최신 JNCIS-MistAI-Wired JN0-460 무료샘플문제 (Q67-Q72):

질문 # 67

Which two statements are correct about adding CLI commands to the "Additional CLI Commands" input box on the switch configuration page? (Choose two.)

- A. The commands are applied to the switch every time the configuration is saved.
- B. The commands are only applied the first time the configuration is saved.
- C. To remove the command from the switch, delete the command from the input box.
- D. To remove the command you must change the actual command from 'set' to 'delete'

정답: A,D

질문 # 68

You want to create a copy of a running configuration on a switch, what's the recommended way to accomplish this using Mist's built-in switch utilities?

- A. Create a template
- B. Apply Default Templates
- C. Download Junos Config
- D. Snapshot Device

정답: D

질문 # 69

You are planning to deploy a new campus fabric. This campus will have a significant amount of east-west traffic. All access switches will only be operating at Layer 2. In this scenario, which architecture should you deploy?

- A. campus fabric IP Clos
- B. campus EVPN multihoming
- C. campus fabric core-distribution with centrally-routed bridging (CRB)
- D. campus fabric core-distribution with edge-routed bridging (ERB)

정답: D

설명:

According to Juniper Networks' validated designs for campus fabrics, the campus fabric core-distribution with edge-routed bridging (ERB) is the optimal architecture when high volumes of east-west traffic are present and access switches are restricted to Layer 2 operations. In an ERB design, the EVPN-VXLAN fabric extends from the core switches to the distribution switches. The critical differentiator is the placement of the default gateways (Integrated Routing and Bridging or IRB interfaces). In the ERB model, these

gateways are moved from the core to the distribution layer, which effectively acts as the "edge" of the EVPN fabric. By placing the Layer 3 gateways at the distribution layer, inter-VLAN (east-west) traffic is routed closer to the endpoints.² This prevents the "hairpinning" effect found in Centrally-Routed Bridging (CRB) architectures, where traffic must travel all the way to the core layer to be routed between subnets before returning down to the distribution and access layers. This reduction in latency and core-link utilization is essential for modern campus environments with high server-to-server or client-to-client traffic patterns. Furthermore, this architecture specifically accommodates Layer 2 access switches. In the ERB core- distribution model, the access switches are not part of the EVPN-VXLAN overlay; instead, they connect to the distribution tier using standard Link Aggregation Control Protocol (LACP) or ESI-LAG. This allows organizations to leverage existing legacy or lower-tier access switches that do not support advanced VXLAN capabilities while still benefiting from a robust, scalable EVPN-VXLAN fabric at the distribution and core layers.⁵ In contrast, while the campus fabric IP Clos also excels at handling east-west traffic, it requires the access switches themselves to perform VXLAN encapsulation/decapsulation (acting as VTEPs), which contradicts the requirement for access switches to operate only at Layer 2.

질문 # 70

Which of the following are features of managing switches with MistAI Wired Assurance? (Select two)

- A. Automatic switch configuration rollback
- B. Manual switch discovery
- C. AI-driven insights for switch health
- D. Real-time gaming

정답: A,C

질문 # 71

Which two devices support Group Based policy?

- A. EX9200
- B. EX4400
- C. EX4100
- D. EX4300

정답: B,C

질문 # 72

.....

학원다니면서 많은 지식을 장악한후 Juniper JN0-460시험보시는것도 좋지만 회사다니느라 야근하랴 시간이 부족한 분들은 Juniper JN0-460덤프만 있으면 엄청난 학원수강료 필요없이 20~30시간의 독학만으로도 Juniper JN0-460시험패스가 충분합니다. 또한 취업생분들은 우선 자격증으로 취업문을 두드리고 일하면서 실무를 익혀가는방법도 좋지 않을까 생각합니다.
