

# Workday-Prism-Analytics Exam Quick Prep, Workday-Prism-Analytics Sample Questions Pdf

P.S. Free 2026 Workday Workday-Prism-Analytics dumps are available on Google Drive shared by TrainingDump:  
<https://drive.google.com/open?id=1eO3pQGx5zVwlsBQBtHWZHIW7EeeBTRYU>

Do you feel bored about current jobs and current life? Go and come to obtain a useful certificate! Workday-Prism-Analytics study guide is the best product to help you achieve your goal. If you pass exam and obtain a certification with our Workday-Prism-Analytics study materials, you can apply for satisfied jobs in the large enterprise and run for senior positions with high salary and high benefits. Excellent Workday Workday-Prism-Analytics Study Guide make candidates have clear studying direction to prepare for your test high efficiently without wasting too much extra time and energy.

For a long time, high quality is our Workday-Prism-Analytics exam torrent constantly attract students to participate in the use of important factors, only the guarantee of high quality, to provide students with a better teaching method, and at the same time the Workday-Prism-Analytics practice materials bring more outstanding teaching effect. And with the three different versions of our Workday-Prism-Analytics Exam Questions on the web, so high-quality Workday-Prism-Analytics learning guide help the students know how to choose suitable for their own learning method, our Workday-Prism-Analytics study materials are a very good option for you to pass the exam.

## Workday-Prism-Analytics Sample Questions Pdf, Workday-Prism-Analytics Reliable Exam Pdf

Nowadays the competition in the job market is fiercer than any time in the past. If you want to find a good job, you must own good competences and skillful major knowledge. So owning the Workday-Prism-Analytics certification is necessary for you because we will provide the best study materials to you. Our Workday-Prism-Analytics exam torrent is of high quality and efficient, and it can help you pass the test successfully. The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the Workday-Prism-Analytics Study Materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase.

### Workday Pro Prism Analytics Exam Sample Questions (Q48-Q53):

#### NEW QUESTION # 48

You have a number of Workday reports that use a Prism data source. When are the values of the Prism calculated fields in the Workday reports calculated?

- A. At the calculated field creation time.
- B. At report run time.
- **C. At time of publishing.**
- D. At dataset creation time.

**Answer: C**

### NEW QUESTION # 49

A Prism data administrator is ready to create a Prism data source. As data is updated in Prism, the goal is to update the data in the Prism data source concurrently, enabling immediate incremental updates. How should the administrator create the Prism data source?

- A. Publish a derived dataset with the Prism: Default to Dataset Access Domain.
- B. Create a table and select Publish.
- **C. Create a table and select the Enable for Analysis checkbox.**
- D. Set Data Source Security on a derived dataset and select Publish.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, creating a Prism data source that supports immediate incremental updates as data is updated in Prism requires a specific configuration. According to the official Workday Prism Analytics study path documents, the administrator should create a table and select the Enable for Analysis checkbox (option A). The "Enable for Analysis" option, when selected during table creation, allows the table to be used directly as a Prism data source with real-time updates. This setting ensures that as data in the table is updated (e.g., through a Data Change task), the changes are immediately reflected in the Prism data source, enabling incremental updates without the need for republishing. This is particularly useful for scenarios requiring near- real-time data availability in reporting or analytics.

The other options do not achieve the goal of immediate incremental updates:

- \* B. Create a table and select Publish: Publishing a table creates a static Prism data source, but updates to the table require republishing, which does not support immediate incremental updates.
- \* C. Publish a derived dataset with the Prism: Default to Dataset Access Domain: Publishing a derived dataset creates a data source, but updates to the underlying data require republishing the dataset, which is not concurrent or incremental.
- \* D. Set Data Source Security on a derived dataset and select Publish: Setting security and publishing a derived dataset follows the same process as option C, requiring republishing for updates, which does not meet the requirement for immediate updates. Selecting the "Enable for Analysis" checkbox when creating a table ensures the Prism data source supports concurrent, incremental updates as data changes in Prism.

### NEW QUESTION # 50

You are a new Prism customer and you want to ensure the correct set of fields is brought into a derived dataset. When should you apply a Manage Fields stage?

- A. At the beginning of the primary pipeline of the Base Dataset.
- **B. At the beginning of the Primary Pipeline of the derived dataset.**
- C. At the end of the Primary Pipeline of a published dataset.
- D. After the dataset is published.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Manage Fields stage is used to control the fields in a dataset by renaming, hiding, or changing field types, among other actions. According to the official Workday Prism Analytics study path documents, to ensure the correct set of fields is brought into a derived dataset (DDS), the Manage Fields stage should be applied at the beginning of the Primary Pipeline of the derived dataset (option C).

Placing the Manage Fields stage early in the pipeline—right after the initial import stage (Stage 1)—allows you to define the field structure upfront, ensuring that subsequent transformation stages (e.g., Join, Filter, Calculate Field) operate on the desired set of fields. This approach helps maintain consistency and avoids unnecessary processing of fields that are not needed in later stages.

The other options are not optimal:

- \* A. After the dataset is published: You cannot add transformation stages like Manage Fields after a dataset is published; transformations must be applied during the dataset's creation or editing.
- \* B. At the end of the Primary Pipeline of a published dataset: Similar to option A, you cannot modify a published dataset's pipeline,

and placing Manage Fields at the end would not prevent unnecessary fields from being processed in earlier stages.

\* D. At the beginning of the primary pipeline of the Base Dataset: A Base Dataset does not have a transformation pipeline; it is a direct import of a table, so Manage Fields stages can only be applied in a Derived Dataset.

Applying the Manage Fields stage at the beginning of the derived dataset's Primary Pipeline ensures efficient data preparation and transformation.

### NEW QUESTION # 51

In a Prism project, you have a dataset containing customer purchase transactions, including the customer ID, purchase amount, and purchase date. You want to analyze the total purchase amount for each customer over the entire period. What transformation stage should you apply to calculate the total purchase amount for each customer?

- A. Union
- B. Join
- C. Explode
- **D. Group By**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, calculating the total purchase amount for each customer requires aggregating data by customer ID.

According to the official Workday Prism Analytics study path documents, the appropriate transformation stage for this task is a Group By stage (option D). The Group By stage allows you to group the dataset by a specific field (e.g., customer ID) and apply aggregation functions, such as SUM, to calculate the total purchase amount for each customer. For example, you would group by customer ID and use SUM(purchase\_amount) to compute the total. This stage reduces the dataset to one row per customer, with the aggregated total purchase amount, enabling the desired analysis over the entire period.

The other options are incorrect:

\* A. Join: A Join stage combines data from two datasets based on a matching condition, but it does not aggregate data to calculate totals.

\* B. Union: A Union stage appends rows from one dataset to another, which does not help with calculating totals per customer.

\* D. Explode: An Explode stage transforms multi-instance fields into multiple rows, which is unrelated to aggregating purchase amounts.

The Group By stage is the correct choice to aggregate purchase amounts by customer, facilitating the analysis of totals over the entire period.

### NEW QUESTION # 52

A Prism data writer needs to create a new Prism calculated field on a derived dataset using the CASE function. When creating a calculated field, what symbol do you use to view a list of fields that you can select from in the dataset?

- A. #
- B. (
- **C. [**
- D. {

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when creating a calculated field in a derived dataset, users often need to reference existing fields in the dataset within their expressions, such as in a CASE function. According to the official Workday Prism Analytics study path documents, to view and select from a list of available fields in the dataset while building a calculated field expression, the user types

the [ symbol (left square bracket). This symbol triggers a dropdown list of all fields in the dataset, allowing the user to select the desired field without manually typing its name, reducing the risk of errors. For example, typing [ and selecting a field like "Employee\_ID" will insert [Employee\_ID] into the expression, which can then be used in the CASE function logic.

The other symbols do not serve this purpose:

\* B. (: Parentheses are used for grouping expressions or defining function parameters, not for field selection.

\* C. #: The hash symbol is not used in Prism Analytics for field selection; it may be associated with other functionalities in different contexts.

\* D. {: Curly braces are not used for field selection in Prism Analytics; they may be used in other systems for different purposes, such as templating.

The use of the [ symbol ensures an efficient and accurate way to reference fields in a calculated field expression, streamlining the creation process in Prism Analytics.
