Salesforce Platform Developer II Sample Questions (Q160-Q165):

NEW QUESTION # 160

A company represents their customers as Accounts in Salesforce. All customers have a unique Customer_Number__c that is unique across all of the company's systems. They also have a custom Invoice__c object, with a Lookup to Account, to represent invoices that are sent out from their external system. This company wants to integrate invoice data back into Salesforce so Sales Reps can see when a customer is paying their bills on time.

What is the optimal way to implement this?

- **A. Ensure Customer_Number__c is an External ID and that a custom field Invoice_Number__c is an External ID and Upsert invoice data nightly.**
- B. Use Salesforce Connect and external data objects to seamlessly import the invoice data into Salesforce without custom code.
- C. Create a cross-reference table in the custom invoicing system with the Salesforce Account ID of each Customer and insert invoice data nightly.
- D. Query the Account Object upon each call to insert invoice data to fetch the Salesforce ID corresponding to the Customer Number on the invoice.

Answer: A

NEW QUESTION # 161

Refer to the test method below:

```

@isTest
static void testIncrement() {
    Account acct = new Account(Name = 'Test');
    acct.Number_Of_Times_Viewed__c = 0;
    insert acct;

    AuditUtil.incrementViewed(acct.Id);

    Account acctAfter = [SELECT Number_Of_Times_Viewed__c FROM Account
WHERE Id = :acct.Id][0];

    System.assertEquals(1, acctAfter.Number_Of_Times_Viewed__c);
}

```

The test method calls an @future method that increments the Number_of_Times_Viewed__c value. The assertion is failing because the Number of Times Viewed__c equals 0. What is the optimal way to fix this?

- A. Add Test.startTest() before and Test.stopTest() after insert acct.
- B. Change the assertion to system.assertEquals(0, acctAfter.Number_Of_Times_Viewed__c).
- C. Change the initialization to acct.Number_Of_Times_Viewed__c = 1.
- **D. Add Test.startTest() before and Test.stopTest() after AuditUtil.incrementViewed.**

Answer: D

Explanation:

When a test method calls an @future method that performs DML operations, the changes made by the @future method won't be visible until after the Test.stopTest() is called. This method ensures that all asynchronous processes are completed before the test execution continues. Therefore, Test.startTest() should be before the call to the @future method and Test.stopTest() immediately after. References: Apex Developer Guide - Testing Asynchronous Apex

NEW QUESTION # 162

Refer to the code snippet below:

```

import fetchOpps from '@salesforce/apex/OpportunitySearch.fetchOpportunities';
@wire(fetchOpps)
opportunities;

```

When a Lightning web component is rendered, a list of opportunity that match certain criteria should be retrieved from the database and displayed to the end-user.

Which three considerations must the developer implement to make the fetchOpps method available within the Lightning web component?

- **A. The fetchOpps method cannot mutate the result set retrieved from the database.**
- B. The fetchOpps method must be annotated with the @InvocableMethod annotation.
- **C. The fetchOpps method must be annotated with the @AuraEnabled annotation.**
- D. The fetchOpps method must specify the (continuation=true) attribute
- **E. The fetchOpps method must specify the (cacheable=true) attribute**

Answer: A,C,E

NEW QUESTION # 163

Within the System.Limit class, what would you call to get the total limit you can call in a single transaction?

- A. `getLimit[typeOfLimit] --> (Ex. getLimitDMLStatements())`
- B. `get[typeOfLimit] --> (Ex. getDMLStatements())`

Answer: A

NEW QUESTION # 164
