

Fantastic Test OGEA-101 Pass4sure by CertkingdomPDF

P.S. Free & New OGEA-101 dumps are available on Google Drive shared by CertkingdomPDF: https://drive.google.com/open?id=1_mBzwpEuEaQnH6uhwuVv9BNKtC9PY2Vo

We are quite confident that all these The Open Group OGEA-101 exam dumps feature you will not find anywhere. Just download the The Open Group OGEA-101 and start this journey right now. For the well and quick OGEA-101 exam dumps preparation, you can get help from The Open Group OGEA-101 which will provide you with everything that you need to learn, prepare and pass the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) certification exam.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Topic 2	<ul style="list-style-type: none">• Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Topic 3	<ul style="list-style-type: none">• ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 4	<ul style="list-style-type: none">• Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 Exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.
Topic 5	<ul style="list-style-type: none">• Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.

Reliable OGEA-101 Exam Labs | Latest OGEA-101 Test Guide

Though our OGEA-101 study guide has three formats which can meet your different needs, PDF version, software version and online version, i love the PDF version to the best. If you choose the PDF version, you can download our OGEA-101 exam material and print it for studying everywhere. And you can take notes on them as long as any new thoughts come to you. If a new version of the OGEA-101 learning guide comes out, we will send you a new link to your E-mail box and you can download it again.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

Complete the sentence The Architecture Landscape is divided into levels known as _____.

- A. Segment Strategic and Capability Architectures
- B. Gaps Plateaus, and Target Architectures
- C. Transitional Complete and incremental Architectures
- D. Baseline. Transition and To Be Architectures

Answer: A

Explanation:

The Architecture Landscape is divided into levels known as Segment Strategic and Capability Architectures. These levels correspond to different scopes and purposes of architectures within an enterprise. Segment Architectures are architectures that address specific business units, functions, or processes within an enterprise. Strategic Architectures are architectures that provide a high-level view of the enterprise's vision, goals, and direction. Capability Architectures are architectures that address specific business capabilities or services that span multiple segments or domains. Reference: The TOGAF Standard | The Open Group Website, Section 2.4 Architecture Repository.

NEW QUESTION # 11

Which of the following is a responsibility of an Architecture Board?

- A. Establishing targets for re-use of components
- B. Allocating resources for architecture projects
- C. Conducting assessments of the maturity level of architecture discipline within the organization
- D. Creating the Statement of Architecture Work

Answer: A

Explanation:

An Architecture Board is an executive-level group responsible for the review and maintenance of the strategic architecture and all of its sub-architectures¹. It is a key element in a successful Architecture Governance strategy².

An Architecture Board is typically made responsible, and accountable, for achieving some or all of the following goals²:

Providing the basis for all decision-making with regard to the architectures
Consistency between sub-architectures
Establishing targets for re-use of components
Flexibility of the Enterprise Architecture: To meet changing business needs
To leverage new technologies
Enforcement of Architecture Compliance
Improving the maturity level of architecture discipline within the organization
Ensuring that the discipline of architecture-based development is adopted
Supporting a visible escalation capability for out-of-bounds decisions
Therefore, the correct answer is option D, which captures one of the goals of an Architecture Board as stated in the TOGAF Standard, Version 9.22.

Option A is incorrect, because conducting assessments of the maturity level of architecture discipline within the organization is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Capability Framework³.

Option B is incorrect, because allocating resources for architecture projects is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Governance Framework⁴.

Option C is incorrect, because creating the Statement of Architecture Work is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Development Method⁵. References:

1: Architecture Board - The Open Group³

2: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Board

3: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Capability Framework

4: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Governance Framework

5: TOGAF Standard, Version 9.2 - Part II: Architecture Development Method - Phase A: Architecture Vision

NEW QUESTION # 12

Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Architecture Landscape
- B. Reference Library
- C. Architecture Metamodel
- D. Governance Log

Answer: A

Explanation:

The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture.

NEW QUESTION # 13

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

- A. 1 Architecture Principles -2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification
- B. 1 Architecture Principles -2 Architecture Contracts - 3 Architecture Requirements Specification-4 Request for Architecture Work
- C. 1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles
- D. 1 Architecture Requirements Specification -2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts

Answer: A

Explanation:

According to the TOGAF standard, the deliverables that match the descriptions are as follows:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission¹. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions¹.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture². They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards².

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle³. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project³.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture⁴. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them⁴.

NEW QUESTION # 14

Which of the following is the application of the concepts of risk assessment and risk analysis in the decision-making process?

- A. Risk Management
- B. Security Architecture
- C. Security Governance
- D. Information Security Management

Answer: A

Explanation:

The correct answer is Risk Management because risk assessment and risk analysis are core parts of the risk management process. In TOGAF, risk management is used to support architectural and implementation decision-making by identifying risks, evaluating their likelihood and impact, and determining appropriate responses. This allows stakeholders and architects to make informed choices about architecture options, transition paths, implementation timing, and governance actions.

Risk assessment focuses on understanding the nature of identified risks and estimating their significance. Risk analysis examines those risks in more detail to determine consequences, priorities, and possible treatments.

These activities are not stand-alone disciplines in TOGAF; they are applied as part of Risk Management, which provides the structured method for using risk information in decisions.

The other options are related but not as precise. Information Security Management focuses on managing security controls and policies. Security Governance is concerned with oversight and accountability. Security Architecture defines structural security capabilities and controls. While all may use risk-related information, the direct application of risk assessment and risk analysis in decision-making belongs to Risk Management.

Therefore, according to TOGAF terminology and governance practice, the best answer is C.

NEW QUESTION # 15

.....

The education level of the country has been continuously improved. At present, there are more and more people receiving higher education, and even many college graduates still choose to continue studying in school. Getting the test OGEA-101 certification maybe they need to achieve the goal of the learning process, have been working for the workers, have more qualifications can they provide wider space for development. The OGEA-101 Study Materials can provide them with efficient and convenient learning platform so that they can get the certification as soon as possible in the shortest possible time.
