NEW QUESTION # 207
The sales team at Cloud Kicks is noticing that sales reps are misusing the new Screen Flow tool for data entry, since they are viewed the initial screen after clicking finish.
What should the administrator do to fix this?

- A. Use a lightning action to redirect the user
- B. Update the flow with a local redirect action.
- C. Add a trigger to redirect the user to a new page.
- D. Create a new flow to redirect the user when the other flow finishes.

Answer: A

Explanation:
Explanation
A lightning action is a type of quick action that can invoke a Lightning component, a Visualforce page, or a URL. The administrator can use a lightning action to redirect the user to a different page after they finish the screen flow. This way, the user will not see the initial screen again and will not misuse the flow tool.

NEW QUESTION # 210
The sales manager at Cloud Kicks (CK) wants to make sure the accounts that CK serves are happy. One way they track this is by how many open cases an account has with CK. The sales manager asks CK's administrator to build a report to show Accounts with Open Cases.
What report type would this be?

- A. Joined Report

- B. Matrix Report
- C. Summary Report
- D. Bucket Report

Answer: A

Explanation:
A joined report is a type of report that allows you to create multiple report blocks that provide different views of your data. Each report block can have its own fields, columns, sorting, and filtering. A joined report can only be created from summary or matrix reports. You can use a joined report to show data from different report types or data sources on a single report. In this case, you can use a joined report to show Accounts with Open Cases by creating two report blocks: one for accounts and one for cases with a filter for open status.
You can then join the two blocks by a common field such as Account ID or Account Name. References:
