

# Free PDF Quiz ISO-IEC-42001-Lead-Auditor - Efficient ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam Valid Test Vce Free

P.S. Free 2026 PECB ISO-IEC-42001-Lead-Auditor dumps are available on Google Drive shared by DumpsFree: [https://drive.google.com/open?id=1aFZWwhrzXGyV8mO\\_PnHrZI9\\_tNzF4pkh](https://drive.google.com/open?id=1aFZWwhrzXGyV8mO_PnHrZI9_tNzF4pkh)

To give you an idea about the top features of DumpsFree ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam questions, a free demo of DumpsFree ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam dumps is being offered free of cost. Just download DumpsFree ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam questions demo and check out the top features of DumpsFree ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam dumps. If you feel that DumpsFree PECB ISO-IEC-42001-Lead-Auditor exam questions work for you then buy the full and final DumpsFree ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam dumps at an affordable price and start ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam preparation.

## PECB ISO-IEC-42001-Lead-Auditor Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Conducting an ISO</li> <li>• IEC 42001 audit: This section of the exam measures the skills of a Lead Auditor and focuses on executing the audit according to ISO</li> <li>• IEC 42001 guidelines. It includes collecting evidence, interviewing relevant staff, and evaluating compliance with the AI management system standards.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Closing an ISO</li> <li>• IEC 42001 audit: This section of the exam measures the skills of an AI Compliance Officer and explains how to complete the audit process. It includes reporting findings, managing nonconformities, and conducting follow-ups to ensure continuous improvement and compliance.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• Fundamental audit concepts and principles: This section of the exam measures the skills of a Lead Auditor and outlines essential audit concepts such as evidence collection, impartiality, objectivity, and ethical conduct. It introduces the core principles that form the foundation of a reliable and consistent auditing process.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Managing an ISO</li> <li>• IEC 42001 audit program: This section of the exam measures the skills of an AI Compliance Officer and deals with overseeing an entire audit program. It involves managing multiple audits, tracking audit performance, and aligning audit outcomes with broader organizational goals related to AI governance.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Preparing an ISO</li> <li>• IEC 42001 audit: This section of the exam measures the skills of a Lead Auditor and covers how to plan and prepare for an AI management system audit. It includes creating audit plans, selecting team members, and setting clear objectives to ensure a smooth audit process.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• AI management system requirements: This section of the exam measures the skills of a Lead Auditor and focuses on understanding the key requirements outlined in ISO</li> <li>• IEC 42001. It explains how organizations should structure their AI-related activities and processes to meet compliance standards effectively.</li> </ul>

## 100% ISO-IEC-42001-Lead-Auditor Correct Answers, Latest Test ISO-IEC-42001-Lead-Auditor Experience

Moreover, you do not need an active internet connection to utilize DumpsFree PECB ISO-IEC-42001-Lead-Auditor practice exam software. It works without the internet after software installation on Windows computers. The DumpsFree web-based PECB ISO-IEC-42001-Lead-Auditor Practice Test requires an active internet and it is compatible with all operating systems. You can conveniently test your performance by checking your score each time you use our PECB ISO-IEC-42001-Lead-Auditor practice exam software.

### PECB ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam Sample Questions (Q135-Q140):

#### NEW QUESTION # 135

Question:

While auditing a company's AIMS, the audit team reviewed policies, objectives, and communications to evaluate the involvement of top management. They also conducted interviews with staff to assess the engagement of leaders at various levels in ensuring the system's effectiveness.

Based on this approach, what level of management should the auditors prioritize when assessing leadership and commitment?

- A. They should focus on leadership at the top management level
- **B. They should focus on leadership at all levels of management**
- C. They should focus on the leadership of department heads

**Answer: B**

Explanation:

ISO/IEC 42001 emphasizes that leadership is a shared responsibility that must be demonstrated at all management levels.

\* Clause 5.1 (Leadership and commitment) states: "Top management shall demonstrate leadership and commitment... and ensure that roles, responsibilities, and authorities are assigned, communicated, and understood."

\* The Lead Auditor Guide also emphasizes evaluating leadership engagement across hierarchical levels, not just the top.

Reference: ISO/IEC 42001:2023 Clause 5.1; Lead Auditor Training Manual - Module 5 ("Leadership and Engagement").

#### NEW QUESTION # 136

Scenario 9:

Scenario 9: Securisai, located in Tallinn, Estonia, specializes in the development of automated cybersecurity solutions that utilize AI systems. The company recently implemented an artificial intelligence management system AIMS in accordance with ISO/IEC 42001. In doing so, the company aimed to manage its AI-driven systems' capabilities to detect and mitigate cyber threats more efficiently and ethically. As part of its commitment to upholding the highest standards of AI use and management, Securisai underwent a certification audit to demonstrate compliance with ISO/IEC 42001.

The audit process comprised two main stages: the initial or stage 1 audit focused on reviewing Securisai's documentation, policies, and procedures related to its AIMS. This review laid the groundwork for the stage 2 audit, which involved a comprehensive, on-site evaluation of the actual implementation and effectiveness of the AIMS within Securisai's operations. The goal was to observe the AIMS in operation, ensuring that it not only existed on paper but was effectively integrated into the company's daily activities and cybersecurity strategies.

After the audit, Roger, Securisai's internal auditor, addressed the action plans devised to rectify nonconformities identified during the certification audit. He developed a long term strategy, highlighting key AIMS processes for triennial audits. Roger's internal audits play a key role in advancing Securisai's goals by employing a systematic and disciplined method to assess and boost the efficiency of risk management, governance processes, and strategic decision-making. Roger reported his findings directly to Securisai's top management.

Following the successful rectification of nonconformities, Securisai was officially certified against ISO/IEC 42001.

Recently, the company decided to transfer its ISO/IEC 42001 certification registration from one certification body to another despite being initially bound by a long-term agreement with the current certification body.

This decision was motivated by the desire to partner with a certification body that offers deeper insights and expertise in the rapidly evolving field of artificial intelligence in cybersecurity.

To ensure a smooth transition and uphold its certification status, Securisai is diligently compiling the required documentation for submission to the new certification body. This includes a formal request, the most recent audit report underscoring its adherence to ISO/IEC 42001, the latest corrective action plan that highlights its continuous efforts toward improvement, and a copy of its current valid certification registration.

A year following Securisai's initial certification audit, a subsequent audit was carried out by the certification body on its AIMS. The purpose of this audit was to assess compliance with ISO/IEC 42001 and verify the ongoing improvement of the AIMS. The audit team concluded that Securisai's AIMS consistently meets the requirements set by ISO/IEC 42001.

Question:

Roger followed up on action plans resulting from external audits. Is this acceptable?

- A. Yes, the internal auditor should follow up on action plans submitted during internal and external audits
- B. No, the internal auditor should follow up on action plans submitted in response to nonconformities resulting only from internal audits
- C. No, it is the responsibility of the external auditor to follow up on action plans resulting from external audits

**Answer: A**

Explanation:

It is acceptable and even advisable for internal auditors to monitor both internal and external audit findings to ensure the system's ongoing effectiveness.

\* ISO/IEC 42001:2023 Clause 9.2.2 states: "Internal audits shall ensure the AIMS conforms to both the organization's own requirements and the requirements of the standard, including actions arising from external audits."

\* ISO 19011:2018 Clause 5.5 allows internal auditors to verify that corrective actions from all sources (internal and external audits) are implemented effectively.

Reference: ISO/IEC 42001:2023 Clause 9.2.2; ISO 19011:2018 Clause 5.5.

## NEW QUESTION # 137

Scenario 7 (continued):

Scenario 7: ICure, headquartered in Bratislava, is a medical institution known for its use of the latest technologies in medical practices. It has introduced groundbreaking AI-driven diagnostics and treatment planning tools that have fundamentally transformed patient care.

ICure has integrated a robust artificial intelligence management system AIMS to manage its AI systems effectively. This holistic management framework ensures that ICure's AI applications are not only developed but also deployed and maintained to adhere to the highest industry standards, thereby enhancing efficiency and reliability.

ICure has initiated a comprehensive auditing process to validate its AIMS's effectiveness in alignment with ISO/IEC 42001. The stage 1 audit involved an on-site evaluation by the audit team. The team evaluated the site-specific conditions, interacted with ICure's personnel, observed the deployed technologies, and reviewed the operations that support the AIMS. Following these observations, the findings were documented and communicated to ICure, setting the stage for subsequent actions.

Unforeseen delays and resource allocation issues introduced a significant gap between the completion of stage 1 and the onset of stage 2 audits. This interval, while unplanned, provided an opportunity for reflection and preparation for upcoming challenges.

After four months, the audit team initiated the stage 2 audit. They evaluated AIMS's compliance with ISO/IEC 42001 requirements, paying special attention to the complexity of processes and their documentation. It was during this phase that a critical observation was made:

ICure had not fully considered the complexity of its processes and their interactions when determining the extent of documented information. Essential processes related to AI model training, validation, and deployment were not documented accurately, hindering effective control and management of these critical activities. This issue was recorded as a minor nonconformity, signaling a need for enhanced control and management of these vital activities.

Simultaneously, the auditor evaluated the appropriateness and effectiveness of the "AIMS Insight Strategy," a procedure developed by ICure to determine the AIMS internal and external challenges. This examination identified specific areas for improvement, particularly in the way stakeholder input was integrated into the system. It highlighted how this could significantly enhance the contribution of relevant parties in strengthening the system's resilience and effectiveness.

The audit team determined the audit findings by taking into consideration the requirements of ICure, the previous audit records and conclusions, the accuracy, sufficiency, and appropriateness of evidence, the extent to which planned audit activities are realized and planned results achieved, the sample size, and the categorization of the audit findings. The audit team decided to first record all the requirements met; then they proceeded to record the nonconformities.

Based on the scenario above, answer the following question:

Question:

Did the audit team consider all the necessary aspects when determining audit findings?

- A. Yes, the audit team considered all the necessary aspects for determining audit findings
- B. No, the audit team overlooked the importance of the auditee's feedback in shaping the audit findings
- C. No, audit team did not consider the findings exceeding normal practices or opportunities for improvement

**Answer: A**

Explanation:

The scenario states that the audit team considered:

- \* audit objectives
  - \* audit criteria
  - \* planned results
  - \* sample size
  - \* conformity to requirements
  - \* and previous records - all key elements of audit evidence analysis.
  - \* ISO/IEC 17021-1:2015 Clause 9.4.5 and ISO 19011:2018 Clause 6.6 confirm that audit findings must be based on objective evidence, conformity criteria, and audit scope. This matches what the audit team did, confirming full compliance.
- Reference: ISO/IEC 17021-1:2015 Clause 9.4.5; ISO 19011:2018 Clause 6.6.

### NEW QUESTION # 138

During the audit planning phase, what is the primary activity an auditor should focus on?

- A. Conducting interviews with staff
- B. Issuing corrective actions
- C. Reviewing the final report
- D. Preparing checklists and audit plans

**Answer: D**

Explanation:

During the audit planning phase, the auditor's key responsibility is to prepare audit plans, checklists, and resource allocations to ensure an effective and efficient audit.

According to ISO 19011:2018 - Clause 6.4.1, planning includes preparing the audit plan, defining the audit schedule, and ensuring that required documents, tools, and team members are ready.

The PECB Lead Auditor Guide - Domain 4 further emphasizes preparing tailored audit checklists based on ISO/IEC 42001 clauses and relevant organizational processes.

Reference: ISO 19011:2018 - Clause 6.4.1 (Planning the audit)

PECB Lead Auditor Guide - Domain 4: "Audit Planning Activities and Tools"

### NEW QUESTION # 139

Question:

Which of the following examples depicts frequent analysis?

- A. The auditor conducts a yearly review of the company's financial statements to assess long-term financial stability
- **B. The auditor selects a sample of employees to determine if they are aware of their roles and responsibilities relevant to AI**
- C. The auditor observes the AI system's performance during its initial deployment to ensure it meets operational standards

**Answer: B**

Explanation:

Frequent analysis involves ongoing or regularly performed assessments, such as interviews with employees regarding their role awareness.

\* ISO 19011:2018 Clause 6.5.5 discusses auditor sampling and analysis, and frequent analysis refers to repeated testing of a process over time.

\* Periodic financial reviews (annual) or one-time deployment checks don't qualify as frequent - but ongoing interviews and awareness checks do.

Reference: ISO 19011:2018 Clause 6.5.5; ISO/IEC 42001:2023 Clause 7.3 (Awareness).

### NEW QUESTION # 140

.....

To help people pass exam easily, we bring you the latest ISO-IEC-42001-Lead-Auditor exam prep for the actual test which enable you get high passing score easily in test. Our study materials are the up-to-date and all ISO-IEC-42001-Lead-Auditor Test Answers you practiced are tested by our professional experts. Once you have well prepared with our ISO-IEC-42001-Lead-Auditor dumps collection, you will go through the formal test without any difficulty.
