2026 High-quality Latest Sustainable-Investing Exam Practice | 100% Free Latest Sustainable-Investing Exam Format

Many candidates find the Sustainable Investing Certificate (CFA-SIC) Exam (Sustainable-Investing) exam preparation difficult. They often buy expensive study courses to start their Sustainable Investing Certificate (CFA-SIC) Exam (Sustainable-Investing)

certification exam preparation. However, spending a huge amount on such resources is difficult for many CFA Institute Sustainable-Investing Exam applicants. The latest CFA Institute Sustainable-Investing exam dumps are the right option for you to prepare for the Sustainable Investing Certificate (CFA-SIC) Exam (Sustainable-Investing) certification test at home.

CFA Institute Sustainable-Investing Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Social Factors: Focused on Social Analysts and Corporate Social Responsibility (CSR) Professionals, this domain reviews social factors impacting investments. It includes systemic relationships and material impacts related to labor practices, diversity, equity, inclusion, and social opportunities at multiple levels.
Topic 2	<ul style="list-style-type: none"> • Introduction to ESG Investing: This section of the exam measures skills of Investment Analysts and Portfolio Managers and covers the foundational concepts of environmental, social, and governance (ESG) investing. It focuses on defining ESG investment, different responsible investment approaches, sustainability concepts, benefits and challenges of ESG integration, and key global initiatives in ESG.
Topic 3	<ul style="list-style-type: none"> • ESG Analysis, Valuation, and Integration: This domain measures the capabilities of Portfolio Managers and Equity Analysts to integrate ESG factors into investment decision-making. It addresses challenges of integration, the impact on industry and company performance, security valuation, and approaches to ESG data analysis across asset classes.
Topic 4	<ul style="list-style-type: none"> • Governance: This section assesses skills of Governance Analysts and Compliance Officers concerning governance structures. It covers key characteristics and models of governance, material impacts, diversity, equity, and inclusion considerations, and shareholder rights.
Topic 5	<ul style="list-style-type: none"> • Integrated Portfolio Construction and Management: Targeting Portfolio Managers and Investment Strategists, this section discusses ESG integration into portfolio construction. It covers ESG screening approaches, benchmarking, the effect on risk-return profiles, and managing ESG portfolios across various asset classes.

CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sample Questions (Q314-Q319):

NEW QUESTION # 314

An emission trading system is best described as a:

- A. jurisdictional limit on the total volume of greenhouse gases that can be emitted.
- B. policy to balance residual carbon emissions by using natural carbon sinks.
- C. fixed price that a government sets for carbon emissions.

Answer: A

Explanation:

An emissions trading system (ETS)-or cap-and-trade scheme-sets an overall emissions cap for a jurisdiction and then allocates emissions allowances to regulated entities. This creates a market price for emissions and incentivizes reductions where they are most cost-effective. CFA materials confirm that this market-based policy directly limits the total volume of emissions (option C).

NEW QUESTION # 315

Brown divestment:

- A. Screens out fossil fuels from portfolios
- B. Invests only in companies with a positive environmental impact
- C. Involves publicly traded firms exiting polluting businesses by sales to third parties

Answer: C

Explanation:

Brown divestment refers to publicly traded firms selling off polluting assets (e.g., coal mines, oil refineries) to third parties rather than shutting them down.

Screening out fossil fuels (A) is part of exclusionary ESG investing but does not define brown divestment.

Investing only in positive-impact firms (B) is more aligned with green or impact investing.

NEW QUESTION # 316

Which of the following statements about ESG integration in fixed income is most accurate?

- A. Credit rating agencies attempt to capture the risk of contingent liabilities in their sovereign credit ratings.
- B. Municipal bonds cannot be used for ESG integration.
- C. Equity investors typically place greater emphasis on ESG factors that affect balance sheet strength compared to fixed-income investors.

Answer: A

Explanation:

The OTM discusses fixed-income integration extensively, stating:

"Credit rating agencies increasingly consider contingent liabilities such as environmental remediation, pension deficits, and sovereign guarantees in their rating methodologies." These liabilities represent ESG-related risks that can affect a sovereign's debt-servicing capacity. The manual clarifies that while equity investors emphasize profitability and growth, credit analysts focus on downside protection, balance sheet strength, and cash flow resilience—making ESG particularly relevant in sovereign ratings.

Municipal bonds (option A) are, in fact, widely used in ESG integration (especially green and social bonds), while option C reverses the emphasis between asset classes. Thus, option B accurately reflects the OTM guidance.

NEW QUESTION # 317

For engagement strategies to deliver meaningful results in a cost-effective and time-effective manner, investors must:

- A. identify which company in their portfolio is most in need of engagement
- B. frame the engagement topic into a broader discussion around strategy and avoid discussing long-term financial performance with a company's board
- C. raise all possible concerns with the company which has the most risk in their portfolios

Answer: A

Explanation:

Effective Engagement Strategies:

For engagement to be meaningful and cost-effective, investors need to prioritize and identify which companies in their portfolio require the most attention.

Targeted Engagement:

By focusing on the companies most in need of engagement, investors can allocate their resources more efficiently.

This targeted approach helps in addressing significant ESG risks and opportunities that can materially impact the company's performance.

Broader Discussion:

While it is important to frame the engagement topic within the company's broader strategy, discussing long-term financial performance and risks is crucial for holistic engagement.

References:

Identifying the company most in need of engagement is a recommended strategy in the 2021 ESG investing documentation.

NEW QUESTION # 318

The change that occurs when new digital technologies and business models affect the value proposition of existing goods and services best describes:

- A. artificial intelligence.
- B. automation.
- C. digital disruption.

Answer: C

Explanation:

This definition directly aligns with the CFA's explanation of digital disruption—the process where new digital innovations or business models challenge and displace existing market players or product/service value propositions. Automation and AI are specific tools within digital disruption but do not encompass the broader concept.

NEW QUESTION # 319
