C-BCBTM-2509시험준비자료 - C-BCBTM-2509유효한 인증공부자료

PassTIP는 저희 제품을 구매한 분들이 100%통과율을 보장해드리도록 최선을 다하고 있습니다. PassTIP를 선택한것은 시험패스와 자격증취득을 예약한것과 같습니다. PassTIP의 믿음직한 SAP인증 C-BCBTM-2509덤프를 공부해보세요.

SAP C-BCBTM-2509 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Understanding WalkMe: This section of the exam evaluates the competencies of Digital Adoption Specialists and covers the role of WalkMe within the SAP ecosystem. It focuses on how WalkMe enhances user experience, drives digital adoption, and simplifies workflows across SAP solutions. Candidates learn how WalkMe guidance and automation tools support end-users in navigating complex SAP applications, ultimately improving productivity, engagement, and system utilization.
주제 2	<ul style="list-style-type: none"> Understanding Business Transformation: This section of the exam evaluates the abilities of Business Transformation Advisors and covers the fundamental principles of business transformation in the digital age. It emphasizes recognizing transformation drivers, defining strategic objectives, and integrating technological innovations into organizational change processes. Candidates are expected to understand how SAP tools and methodologies enable efficient transformation planning, execution, and sustainability across various industries.

주제 3	<ul style="list-style-type: none"> Positioning SAP Business Transformation Management Solutions: This section of the exam measures the skills of SAP Solution Consultants and focuses on understanding how to position SAP Business Transformation Management solutions within diverse enterprise environments. It covers identifying the value proposition of these solutions, aligning them with customer transformation strategies, and demonstrating how they support business agility and operational excellence through data-driven insights and process optimization.
주제 4	<ul style="list-style-type: none"> Understanding SAP Signavio and SAP LeanIX Solutions: This section of the exam measures the expertise of Enterprise Architects and focuses on the core concepts of SAP Signavio and SAP LeanIX. It includes understanding how these solutions enhance enterprise architecture management, process intelligence, and business process transformation. Learners explore how SAP Signavio provides visibility into business processes and how SAP LeanIX supports IT landscape transparency, allowing organizations to improve alignment between business goals and IT systems.

최신 SAP Certified Associate C-BCBTM-2509 무료 샘플문제 (Q24-Q29):

질문 # 24

What is the SAP Signavio Process Manager?

- A. A software for managing customer relationships and sales pipelines.
- B. A tool for automating financial transactions in ERP systems.
- C. An analytics solution for process mining and data analysis.
- D. A cloud-based tool for designing, modeling, and improving business processes.

정답: D

설명:

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:

"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively using BPMN 2.0." Reference:

Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):

"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:

"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:

"Process Manager provides process modeling and governance, not CRM pipeline management."

질문 # 25

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. The tools only provide visualization without actionable insights.
- B. The integration allows linking of business applications to business processes.
- C. Business processes are directly controlled by SAP LeanIX applications.
- D. Integration solely enhances reporting capabilities.

정답: B

설명:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise

architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

질문 # 26

What benefit does the combined WalkMe-SAP solution offer to enterprises?

- A. Streamlined user adoption and seamless process integration
- B. Enhanced physical supply chain management
- C. Increased hiring efficiency
- D. Lower software maintenance costs

정답: A

설명:

The partnership between SAP and WalkMe integrates WalkMe's Digital Adoption Platform (DAP) directly into SAP applications (such as SAP S/4HANA, SAP SuccessFactors, and SAP Ariba) to improve user engagement and digital process execution.

"The combined SAP-WalkMe solution helps organizations streamline user adoption and simplify process integration, ensuring users can easily navigate SAP systems and execute digital workflows correctly." Reference:

This integration provides contextual, real-time assistance to users within SAP interfaces, enabling faster onboarding, fewer errors, and improved productivity - all critical for successful transformation under the SAP Business Transformation Management (BTM) framework.

"WalkMe for SAP reduces complexity by guiding users in real time, supporting end-to-end process integration, and driving adoption across the SAP ecosystem." Incorrect Options:

A: Lower maintenance costs are a secondary effect, not the core benefit.

B: WalkMe is not a hiring solution.

D: It does not manage supply chains directly.

Verified Correct answer: C: Streamlined user adoption and seamless process integration.

질문 # 27

How does SAP Signavio Process Manager help with business transformations?

- A. By generating automated financial reports for management.
- B. By eliminating the need for human oversight in process execution.
- C. By allowing organizations to model processes.
- D. By replacing existing ERP systems with a new workflow engine.

정답: C

설명:

SAP Signavio Process Manager is the core process modeling and design component of the SAP Signavio Business Transformation Suite. It allows organizations to visualize, document, and optimize processes as part of transformation initiatives.

"SAP Signavio Process Manager enables organizations to model, analyze, and document business processes in a collaborative environment to support transformation and continuous improvement." Reference:

Through its BPMN 2.0-based process modeling, businesses can capture current (as-is) processes, simulate new (to-be) designs, and align stakeholders for change management.

"Organizations use Process Manager to design and optimize processes before implementation in ERP systems, ensuring standardization and efficiency." Incorrect Options:

A: It does not remove human oversight; it supports collaboration and governance.

C: It does not replace ERP systems but complements them by providing modeling and process documentation.

D: Financial reporting is handled by ERP systems, not Signavio.

Verified Correct answer: B: By allowing organizations to model processes.

질문 # 28

What does WalkMe Discovery help organizations achieve?

- A. Translates all tools into multiple languages automatically
- B. Enhances employee satisfaction scores by 50%
- C. Automates training development processes
- **D. Identifies underutilized tools and compliance risks**

정답: D

설명:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM²) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.

Therefore, the correct answer - verified from SAP's official transformation documentation and WalkMe integration materials - is B: Identifies underutilized tools and compliance risks.

질문 # 29
