Salesforce Plat-Dev-201 Questions PDF From Actualtests4sure

Additionally, all operating systems also support this format. The third format is the desktop Plat-Dev-201 Practice Exam software. It is ideal for users who prefer offline Plat-Dev-201 exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

Salesforce Certified Platform Developer Sample Questions (Q17-Q22):

NEW QUESTION # 17

A developer needs to make a custom Lightning Web Component available in the Salesforce Classic user interface. Which approach can be used to accomplish this?

- A. Use the Lightning Out JavaScript library to embed the Lightning Web Component in a Visualforce page and add to the page layout.
- B. Use a Visualforce page with a custom controller to invoke the Lightning Web Component using a call to an Apex method.
- C. Embed the Lightning Web Component is a Visualforce Component and add directly to the page layout.

- D. Wrap the Lightning Web Component In an Aura Component and surface the Aura Component as a Visualforce tab.

Answer: A

NEW QUESTION # 18

Which statement should be used to allow some of the records in a list of records to be inserted if others fail to be inserted?

- A. insert (records, false)
- B. Database.insert (records, true)
- C. insert records
- D. Database.insert (records, false)

Answer: D

NEW QUESTION # 19

A developer deployed a trigger to update the status__c of Assets related to an Account when the Account's status changes and a nightly integration that updates Accounts in bulk has started to fail with limit failures.

What should the developer change about the code to address the failure while still having the code update all of the Assets correctly?

- A. Move all of the logic to a Queueable class that queries for and updates the Assets and call it from the trigger.
- B. Add a LIMIT clause to the SOQL query on line 16 to limit the number of Assets queried for an Account.
- C. Add List<Asset> assets = [SELECT Id, Status__c FROM Asset WHERE AccountId = :acctId] to line 14 and iterate over the assets list in the for loop on line 15.
- D. Change the getAssetsToUpdate= method to process all Accounts in one call and call it outside of the for loop that starts on line 03.

Answer: D

NEW QUESTION # 20

A developer is tasked to perform a security review of the ContactSearch Apex class that exists in the system. Within the class, the developer identifies the following method as a security threat:

```
List<Contact> performSearch(String lastName){ return Database.query('Select Id, FirstName, LastName FROM Contact WHERE LastName Like %'+lastName+'%'); }
```

What are two ways the developer can update the method to prevent a SOQL injection attack? Choose 2 answers

- A. Use variable binding and replace the dynamic query with a static SOQL.
- B. Use the @ReadOnly annotation and the with sharing keyword on the class.
- C. Use a regular expression on the parameter to remove special characters.
- D. Use the escapeSingleQuote method to sanitize the parameter before its use.

Answer: A,D

NEW QUESTION # 21

A developer is creating a Lightning web component to show a list of sales records.

The Sales Representative user should be able to see the commission field on each record. The Sales Assistant user should be able to see all fields on the record except the commission field.

How should this be enforced so that the component works for both users without showing any errors?

- A. Use WITH SECURITY_ENFORCED in the SOQL that fetches the data for the component.
- B. Use Lightning Data Service to get the collection of sales records.
- C. Use Security.stripInaccessible to remove fields inaccessible to the current user.
- D. Use Lightning Locker Service to enforce sharing rules and field-level security.

Answer: C
