Which of the following can the project manager infer about the current project status?

- A. The project is behind schedule and over budget
- B. The project is ahead of schedule and under budget.
- C. The project is ahead of schedule and over budget.
- D. The project is behind schedule and under budget

Answer: C

NEW QUESTION # 297

A stakeholder works in a remote location and has not been replying to emails. The Internet service in that location is intermittent, and the stakeholder prefers to be contacted by telephone. Which of the following artifacts should the project manager have prepared to avoid this situation?

- A. Responsibility assignment matrix
- B. Staff directory
- C. Risk registry
- D. Acceptable communication channels

Answer: D

Explanation:

The project manager should have prepared acceptable communication channels to avoid the situation of a stakeholder not replying to emails due to intermittent Internet service. Acceptable communication channels are methods or modes of communication that are agreed upon by all parties involved in a project. They may include aspects such as email, phone call, text message, video conference, instant message, or face-to-face meeting. Acceptable communication channels can help to ensure that messages are delivered and received effectively and efficiently and that communication preferences and limitations are respected.

NEW QUESTION # 298

A project team was instructed to refurbish old desktops. The following provides the details of the issues observed:

Which of the following issues should be addressed FIRST?

- A. Replace missing peripherals because this process can be easy and less costly.
- B. An old operating system issue has the most amount of occurrences.
- C. Damage to the monitor has the highest percentage.
- D. Address each issue as discovered to avoid rework.

Answer: C

Explanation:

The project manager should address the issue of damage to the monitor first because it has the highest percentage (40%) among the issues observed. This means that it is the most frequent and severe issue that affects the quality and functionality of the refurbished desktops. Addressing this issue first can help to improve customer satisfaction, reduce rework, and avoid waste!
