## **E-S4CPE-2405 Reliable Braindumps Files - E-S4CPE-2405 Latest Exam Duration**

ActualVCE E-S4CPE-2405 practice test has real E-S4CPE-2405 exam questions. You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your SAP E-S4CPE-2405 Exam Dumps. Here we listed some of the most important benefits you can get from using our SAP E-S4CPE-2405 practice questions.

## **SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q28-Q33):**

### **NEW QUESTION # 28**

Which activity in situation handling is exclusively available for the extended framework?

- A. Develop custom situation handling templates
- B. Adapt predelivered situation handling templates to business requirements
- C. SAP Fiori application extensions
- D. Navigate from notification to the app where the situation occurred to get more info and resolve
- E. Collect situation data to prepare the automated r

**Answer: A**

### **NEW QUESTION # 29**

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this

question.

- A. Known integration requirements
- B. Business role requirements
- C. SAP Fiori application extensions
- D. Target customer go-live date

**Answer: A,B**

Explanation:

The Digital Discovery Assessment (DDA) is a pivotal tool in the SAP S/4HANA Cloud implementation process, designed to align a customer's business requirements with the appropriate SAP solutions. It captures various critical aspects to ensure a successful deployment.

Option A: Business role requirements

This option is correct. The DDA involves identifying the specific business roles within an organization to tailor the SAP solution accordingly. Understanding these roles ensures that the system supports the necessary functions and responsibilities of each user group.

Option B: Known integration requirements

This option is correct. The assessment captures existing integration points with other systems, which is crucial for seamless data flow and process efficiency. Documenting these requirements helps in planning and executing necessary integrations during implementation.

Option C: Target customer go-live date

This option is incorrect. While the go-live date is essential for project planning, it is typically determined during the project management phase rather than being a primary focus of the DDA.

Option D: SAP Fiori application extensions

This option is incorrect. The DDA primarily focuses on assessing current business processes and integration needs. Specifics like SAP Fiori application extensions are usually addressed later in the implementation process, during the design and customization phases.

In summary, the Digital Discovery Assessment captures business role requirements and known integration requirements to ensure that the SAP S/4HANA Cloud Private Edition solution aligns with the organization's operational needs.

## NEW QUESTION # 30

Which technologies should you use to integrate SAP S/4HANA Cloud Private Edition with an SAP public cloud solution? Note: There are 2 correct answers to this question.

- A. SAP Integration Suite
- B. SAP HANA Cloud
- C. SAP Connectivity service
- D. SAP Process Orchestration

**Answer: A,D**

## NEW QUESTION # 31

Through which tools can you launch the Cloud Integration Automation service? Note: There are 2 correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM
- C. SAP for Me
- D. SAP Solution Manager

**Answer: B,C**

Explanation:

The Cloud Integration Automation service facilitates the integration of SAP cloud solutions. It can be launched through the following tools:

Option A: SAP for Me

This option is correct. SAP for Me is a customer portal that provides access to various SAP services, including the Cloud Integration Automation service.

Option B: SAP Solution Manager

This option is incorrect. SAP Solution Manager is primarily used for application lifecycle management and does not directly launch the Cloud Integration Automation service.

Option C: SAP Business Accelerator Hub

This option is incorrect. SAP Business Accelerator Hub is a repository for APIs and does not provide access to the Cloud Integration Automation service.

Option D: SAP Cloud ALM

This option is correct. SAP Cloud ALM is an application lifecycle management tool for cloud solutions and provides access to the Cloud Integration Automation service.

The Cloud Integration Automation Service (CIAS) is a tool within the RISE with SAP framework that automates the setup and configuration of integrations between SAP S/4HANA Cloud Private Edition and other SAP solutions (e.g., SAP SuccessFactors, SAP Ariba). It simplifies integration tasks by providing guided workflows. Let's evaluate the options:

\* A. SAP for Me: This is correct. SAP for Me is a customer portal that provides access to various SAP services, including tools like the Cloud Integration Automation Service. It serves as a central entry point for managing licenses, systems, and integration workflows, especially under RISE with SAP.

\* B. SAP Solution Manager: This is incorrect. SAP Solution Manager is an on-premise tool for managing SAP implementations, primarily for traditional systems like ECC. While it supports integration monitoring, it is not a launch point for CIAS, which is cloud-focused and tied to newer SAP platforms.

\* C. SAP Business Accelerator Hub: This is incorrect. The SAP Business Accelerator Hub (formerly SAP API Business Hub) provides access to APIs, integration content, and accelerators, but it does not directly launch CIAS. It's a resource for discovering integration options, not executing them.

\* D. SAP Cloud ALM: This is also correct. SAP Cloud ALM (Application Lifecycle Management) is a cloud-based tool for managing the lifecycle of SAP solutions, including SAP S/4HANA Cloud Private Edition. It integrates with CIAS to launch and execute integration workflows, particularly during implementation and operations phases.

In summary, SAP for Me and SAP Cloud ALM are the tools through which you can launch the Cloud Integration Automation Service.
