YOU can also free download the demos of our PSM-I learning materials to have a check.

Scrum Professional Scrum Master I Sample Questions (Q173-Q178):

NEW QUESTION # 173

Which two activities will a Product Owner engage in during a Sprint? (Choose two.)

- A. Answer questions from the Development Team about items in the current Sprint.
- B. Update management on what is being worked on.
- C. Prioritize the Development Team's work on the Sprint Backlog.
- D. Run the Daily Scrum.

Answer: A,B

Explanation:

According to the Scrum Guide, two activities that a Product Owner may engage in during a Sprint are updating management on what is being worked on and answering questions from the Development Team about items in the current Sprint. These activities are part of the Product Owner's responsibilities to manage and prioritize the Product Backlog, communicate with stakeholders, and collaborate with the Development Team. The other options are not activities that a Product Owner should engage in during a Sprint, as they are either done by the Scrum Master (such as running the Daily Scrum) or by the Development Team (such as prioritizing their work on the Sprint Backlog).

NEW QUESTION # 174

What are two good ways for a Scrum Team to ensure security concerns are satisfied? (Choose two.)

- A. Postpone the work until a specialist can perform a security audit and create a list of security-related Product Backlog items.
- B. Add security concerns to the definition of "Done".
- C. Add a Sprint to specifically resolve all security concerns.
- D. Have the Scrum Team create Product Backlog items for each concern.
- E. Delegate the work to the concerned department.

Answer: B,D

Explanation:

According to the Scrum Guide 1, the definition of "Done" is a formal description of the state of the Increment when it meets the quality measures required for the product. The definition guides the Development Team in creating a "Done" Increment. The definition of "Done" is created by the development organization (or Development Team if none is available from the development organization). The definition of "Done" may vary significantly per Scrum Team, depending on the context. One aspect of Scrum Teams inspecting how they work toward their Product Goal is that they improve their definition of "Done" over time. Therefore, one good way for a Scrum Team to ensure security concerns are satisfied is to add security concerns to the definition of "Done". Another good way is to have the Scrum Team create Product Backlog items for each concern, as they are responsible for managing and refining the Product Backlog.

NEW QUESTION # 175

Every Scrum team must have a Product Owner and Scrum Master.

- A. True. Outcomes affected by their participation and availability.
- B. False. A Product Owner can be replaced by a business analyst in the Development Team.
- C. True. Each must be 100% dedicated to the Scrum Team.
- D. False. A Scrum Master is only required when asked for by the Development Team.

Answer: A

Explanation:

According to the Scrum Guide¹, there are three roles in a Scrum Team:

The Product Owner

The Developers

The Scrum Master

The Product Owner is accountable for maximizing value resulting from work by Developers. Developers are accountable for creating a plan for the Sprint, the Sprint Backlog. The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. They do this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization. Every Scrum team must have a Product Owner and Scrum Master, as outcomes are affected by their participation and availability. The other options are false, as they imply that the Product Owner and Scrum Master roles are optional or interchangeable.

NEW QUESTION # 176

During a Sprint Retrospective, the Development Team proposes moving the Daily Scrum to only occur on Tuesdays and Thursdays. Which two are the most appropriate responses for the Scrum Master? (Choose two.)

- A. Consider the request and decide on which days the Daily Scrum should occur.
- B. Have the developers vote.
- C. Learn why the Development Team wants this and work with them to improve the outcome of the Daily Scrum.
- D. Coach the team on why the Daily Scrum is important as an opportunity to update the plan.
- E. Acknowledge and support the self-organizing team's decision.

Answer: C,D

Explanation:

The correct answers are B and D, because these are the most appropriate responses for the Scrum Master. The Scrum Master should coach the team on why the Daily Scrum is important as an opportunity to update the plan, inspect the progress, and synchronize the activities of the Development Team. The Scrum Master should also learn why the Development Team wants this and work with them to improve the outcome of the Daily Scrum, rather than imposing a decision or accepting their request without question.

NEW QUESTION # 177

Which of the following are true about the Product Owner role? (Choose two.)

- A. The Product Owner role can be played by a committee or a team of people.
- B. The Product Owner is accountable for ordering the Product Backlog.
- C. Multiple people can share the Product Owner role on a Scrum Team.
- D. The Product Owner is one person.

Answer: B,D

NEW QUESTION # 178

.....
