New Launch Data-Architect Questions [2026] - Salesforce Data-Architect Exam Dumps

If you choose the test Data-Architect certification and then buy our Data-Architect study materials you will get the panacea to both

get the useful certificate and spend little time. Passing the test certification can help you stand out in your colleagues and have a bright future in your career. If you buy our Data-Architect Study Materials your odds to pass the test will definitely increase greatly.

Salesforce Certified Data Architect Sample Questions (Q185-Q190):

NEW QUESTION # 185

Northern Trail Outfitters (NTO) wants to capture a list of customers that have bought a particular product. The solution architect has recommended to create a custom object for product, and to create a lookup relationship between its customers and its products. Products will be modeled as a custom object (NTO_Product__c) and customers are modeled as person accounts. Every NTO product may have millions of customers looking up a single product, resulting in a lookup skew. What should a data architect suggest to mitigate issues related to lookup skew?

- A. Select Clear the value of this field option while configuring the lookup relationship.
- B. Create a custom object to maintain the relationship between products and customers.
- C. Create multiple similar products and distribute the skew across those products.
- D. Change the lookup relationship to master-detail relationship.

Answer: C

NEW QUESTION # 186

Universal Containers is establishing a call center that will use Salesforce. UC receives 10 million calls and creates 100 million cases every month. Cases are linked to a custom call object using lookup relationship. UC would like to run reports and dashboard to better understand different case types being created on calls to better serve customers. What solution should a data architect recommend to meet the business requirement?

- A. Archive records to a data warehouse and run analytics on the data warehouse.
- B. Leverage big objects to archive records and Einstein Analytics to run reports.
- C. Leverage out-of-the-box reports and dashboard on case and interactive voice response (IVR) custom object.
- D. Leverage custom objects to store aggregate data and run analytics.

Answer: B

Explanation:

According to this article, big objects can store and manage massive amounts of data on the Salesforce platform. This can help UC to archive records from other objects or bring massive datasets from outside systems into a big object. According to this article, Einstein Analytics can be used to create dashboards and lenses to analyze big object data and get insights from advanced AI-driven analytics.

NEW QUESTION # 187

What 2 data management policies does the data classification feature allow customers to classify in Salesforce? Choose 2 answers:

- A. Reference data policy.
- B. Data governance policy.
- C. Data sensitivity policy.
- D. Compliance categorization policy.

Answer: C,D

NEW QUESTION # 188

Universal Containers has implemented Salesforce for its operations. In order for customers to be created in their MDM solution, the customer record needs to have the following attributes:

1. First Name
2. Last Name
3. Email

Which option should the data architect recommend to mandate this when customers are created in Salesforce?

- A. Configure Page Layout marking attributes as required fields.

- B. Build validation in Integration with MDM to check required attributes.
- **C. Create validation rules to check if the required attributes are entered.**
- D. Mark Fields for the attributes as required under Setup.

Answer: C

Explanation:

Creating validation rules to check if the required attributes are entered is the best option to mandate this when customers are created in Salesforce. Validation rules allow you to specify criteria that must be met before a record can be saved. You can use validation rules to ensure that customers have a first name, last name, and email when they are created in Salesforce. This way, you can prevent incomplete or invalid data from being sent to your MDM solution.

NEW QUESTION # 189

During the implementation of Salesforce, a customer has the following requirements for Sales Orders:

1. Sales Order information needs to be shown to users in Salesforce.
2. Sales Orders are maintained in the on-premises enterprise resource planning (ERP).
3. Sales Order information has more than 150 million records.
4. Sales Orders will not be updated in Salesforce.

What should a data architect recommend for maintaining Sales Orders in Salesforce?

- **A. Use external objects to maintain Sales Order in Salesforce.**
- B. Use Standard order object to maintain Sale Orders in Salesforce
- C. Use custom objects to maintain Sales Orders in Salesforce.
- D. Use custom big objects to maintain Sales Orders in Salesforce.

Answer: A

NEW QUESTION # 190

.....

Based on the research results of the examination questions over the years, the experts give more detailed explanations of the contents of the frequently examined contents and difficult-to-understand contents, and made appropriate simplifications for infrequently examined contents. Data-Architect test questions make it possible for students to focus on the important content which greatly shortens the students' learning time. With Data-Architect Exam Torrent, you will no longer learn blindly but in a targeted way. Data-Architect exam torrent will also help you count the type of the wrong question, so that you will be more targeted in the later exercises and help you achieve a real improvement. Data-Architect exam guide will be the most professional and dedicated tutor you have ever met, you can download and use it with complete confidence.
