#### NEW QUESTION # 62

What are some characteristics of private cloud? Note: There are 2 correct answers to this question.

- A. Perpetual license
- B. Software installation on customer site
- C. Single-tenant server
- D. Lower total cost of ownership than on premise

**Answer: B,C**

#### NEW QUESTION # 63

Which of the following are workshop design principles/guidelines? Note: There are 2 correct answers to this question.

- A. Active participation
- B. Fit-to-standard
- C. Expert configuration definitions
- D. Validation by end users

**Answer: A,D**

Explanation:

Step 1 - Understanding the question

This question focuses on workshop design principles/guidelines used in SAP S/4HANA Cloud, Private Edition projects - especially during Fit-to-Standard and other key workshops guided by SAP Activate.

SAP defines a set of principles to ensure workshops are efficient, collaborative, and outcome-driven.

Step 2 - Evaluate each option

Option A: Expert configuration definitions

This is incorrect.

Workshops are not meant for technical configuration or expert-only activities. The goal is to validate business processes, not to perform expert configuration definitions.

Option B: Active participation

This is correct.

SAP's workshop design guidelines emphasize active participation of both customer key users and consultants.

Participants are expected to engage in discussions, validate processes, and provide business insights.

Workshops are collaborative sessions, not presentations.

Example 1:

In a Finance Fit-to-Standard workshop, finance key users actively discuss how SAP standard processes align with their current processes.

Example 2:

During a Procurement workshop, purchasing managers provide feedback on the purchase requisition process and share real-world challenges.

Option C: Validation by end users

This is correct.

Workshops aim to validate SAP standard processes and ensure that end users confirm whether the proposed solution meets their business needs.

This ensures that the solution design is grounded in actual business operations.

Example 1:

End users confirm during the workshop that SAP's three-way match process fits their purchasing workflow.

Example 2:

In a sales workshop, sales representatives test standard order-to-cash flows and validate that required steps and fields are available.

Option D: Fit-to-standard
