HPE7-A06 Training Courses | Reliable HPE7-A06 Test Price

Nowadays, so many internet professionals agree that HP exam certificate is a stepping stone to the peak of our life. HPE7-A06 exam is an exam concerned by lots of internet professionals. Close to 100% passing rate is the best gift that our customers give us. We also hope our HPE7-A06 exam materials can help more and more ambitious people pass the HPE7-A06 exam. Our professional team checks the update of exam materials every day, so please rest assured that the HPE7-A06 Exam software you are using must contain the latest and most information. We are a team of the exam questions providers HPE7-A06 exam in internet that ensured you can pass actual test 100%. We have experienced and professional experts to create the latest HPE7-A06 exam questions and answers many times which are approach to the HPE7-A06 exam.

In the era of rapid changes in the knowledge economy, do you worry that you will be left behind? Let's start by passing the HPE7-A06 exam. Getting a HPE7-A06 certificate is something that many people dream about and it will also bring you extra knowledge and economic benefits. The HPE7-A06 latest question we provide all candidates that that is compiled by experts who have good knowledge of exam, and they are very experience in compile study materials. Not only that, our team checks the update every day, in order to keep the latest information of HPE7-A06 Exam Question.

Reliable HPE7-A06 Test Price, HPE7-A06 Valid Exam Cram

Before you place orders, you can download the free demos of HPE7-A06 practice test as experimental acquaintance. Once you decide to buy, you will have many benefits like free update lasting one-year and convenient payment mode. We will inform you immediately once there are latest versions of HPE7-A06 Test Question released. And if you get any questions, please get contact with us, our staff will be online 24/7 to solve your problems all the way.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31
To ensure device redundancy in an HPE Campus Access network, which configurations should be applied?

- A. DHCP Snooping
- B. Active-Active Failover
- C. VRRP
- D. Link Aggregation

Answer: C,D

NEW QUESTION # 32

Drag and Drop Question
Based on the configuration below, identify the correct sequence of events for wired DHCP profiling for IoT devices with HPE Aruba Networking ClearPass.

Answer:

Explanation:

Explanation:
1. The client device is connected to the switch and the port is now up.
2. MAC address is learned on the port and MAC auth is triggered.
3. ClearPass processes the MAC authentication and sends RADIUS Accept with Aruba-User- Role=PROFILING VSA.
4. The switch assigns a role with the PROFILING VLAN to the client device.
5. The client device sends DHCP DISCOVER which is relayed to ClearPass and used to update the endpoint database.
6. ClearPass sends a Change of Authorization to the switch.
7. The device is re-authenticated and the final role is assigned using the Aruba-User-Role=IoT VSA.
8. The device has network access on the IoT VLAN.

The sequence starts with the device connecting and MAC authentication triggering. ClearPass provides a profiling role, the switch assigns it, then DHCP profiling occurs. ClearPass updates its endpoint database, triggers a Change of Authorization (CoA), and re-authenticates the device with the IoT role, granting final network access.

NEW QUESTION # 33
Exhibit.

VSX cluster is already configured. Your task is to validate a correct configuration for the Edge-1 switch that is connected to a CCTV provider that will install its switching infrastructure. The CCTV switches do not support STP.
What needs to be configured on the Edge-1 switch ports connecting to CCTV-SW1 and CCTV-SW2 to prevent loop problems with the existing setup with automatic recovery features?

- A. configure spanning-tree and TCN-guard timeout for CCTV switch ports
- B. configure spanning-tree with udld for CCTV switch ports
- C. configure lag with lacp fallback for CCTV switch ports
- D. configure spanning-tree with bpdu-guard timeout values for CCTV switch ports

Answer: D

Explanation:
The requirement is to prevent loops on Edge-1 switch ports connected to third-party CCTV switches that do not support STP. The solution must also include an automatic recovery feature if a port gets disabled.
* Loop Prevention without STP:When connecting to non-STP devices, standard STP loop prevention (like BPDU Guard) might not work if the connected device doesn't send BPDUs. AOS-CX offers a feature called loop-protect which sends probes to detect loops in non-STP environments.
* Automatic Recovery:Features that disable ports (like BPDU Guard or Loop Protect) often have a timeout or auto-recovery option (port-disable-timer for Loop Protect) allowing the port to automatically re-enable after a configured period.
* Analysis of Options:
* A: LACP fallback applies to LAGs, not general loop prevention.
* B: TCN-guard is an STP feature, irrelevant here.
* C: Suggests spanning-tree with bpdu-guard timeout. BPDU Guard detects loops by listening for BPDUs, which these CCTV switches don't send. However, the timeout featuredoesprovide the required automatic recovery mechanism if the portweredisabled by BPDU Guard.
* D: UDLD detects unidirectional links, not typically bridging loops caused by topology.
* Re-evaluation:The ideal AOS-CX feature is loop-protect with port-disable-timer. Since this isn't explicitly an option, we must evaluate the given choices. Option C is theonlyone that mentions a mechanism(bpdu-guard timeout) providing automatic recovery from a disabled state. While BPDU Guard isn't the right detection mechanism here, it's the closest fit regarding the auto-recoveryrequirement. It's possible the question implicitly assumes some stray BPDUs might trigger it or that it's the intended "best fit" answer despite the detection mechanism mismatch.
* Conclusion:Given the options, Option C is the most plausible because it includes the timeout feature associated with bpdu-guard, fulfilling the automatic recovery requirement, even though BPDU guard itself is not the ideal detection method for loops involving non-STP devices.
References:AOS-CX Spanning Tree Protocol Guide (BPDU Guard, Timeout), AOS-CX Interface Configuration Guide (loop-protect feature). This relates to "Switching" (19%) and "Network Resiliency and virtualization" (8%) objectives.

NEW QUESTION # 34

A network administrator is implementing a new VoIP solution. They want the AOS-CX switches to advertise the correct DSCP priority for the physical IP phones.

Which switch features are needed to implement this solution? (Choose two.)

- **A. LLDP med network-policy**
- B. Priority-Flow Control (PFC)
- C. LLDP dot3 mfs
- D. LLDP med DSCP
- **E. Voice VLAN**

Answer: A,E

Explanation:

To ensure IP phones receive the correct QoS settings, the switch must use Voice VLAN to separate VoIP traffic and apply appropriate QoS policies. Additionally, LLDP-MED network-policy is required to advertise voice-related parameters (such as VLAN ID, priority, and DSCP values) to the IP phones so they can mark traffic correctly.

NEW QUESTION # 35

An IT administrator wants to set up an HPE Aruba Networking User Experience Insight (UXI) sensor. During the initiation process, the administrator sees that the color of the LED is orange.

What does the orange LED mean?

- A. This is a G6E UXI sensor and does not have enough PoE power
- B. The sensor needs multi-rate port but this port is only standard 1G port
- **C. The sensor cannot connect to the UXI cloud**
- D. The sensor is still booting

Answer: C

Explanation:

On an HPE Aruba Networking UXI sensor, an orange LED indicates that the sensor cannot connect to the UXI cloud. This typically points to network connectivity, DNS, or firewall issues blocking communication between the sensor and the cloud service.

NEW QUESTION # 36

......

Our HPE7-A06 training materials make it easier to prepare exam with a variety of high quality functions. We are committed to your achievements, so make sure you try preparation exam at a time to win. Our HPE7-A06 exam prep is of reasonably great position from highly proficient helpers who have been devoted to their quality over ten years to figure your problems out. Their quality function of our HPE7-A06 learning quiz is observably clear once you download them.

Reliable HPE7-A06 Test Price: https://www.exam-killer.com/HPE7-A06-valid-questions.html

HP HPE7-A06 Training Courses There has no delay time of the grading process, Our questions are edited based on vast amounts of original data, and the quantities and quality of HPE7-A06 practice dumps are strictly controlled and checked by our senior professionals, You will gain the HPE7-A06 study guide soon after you pay, Our company has been built since the year of 2006, our HPE7-A06:HPE Campus Access Switching Expert Written Exam study guide PDF will serve more than 2,030 candidates, we sincerely want to help more and more candidates pass exam, we want to do business for long time in this field.

A country must have a system of establishment and heritage scale, Reliable HPE7-A06 Test Price Discover the five factors that consistently tell you where to invest, There has no delay time of the grading process.

Our questions are edited based on vast amounts of original data, and the quantities and quality of HPE7-A06 practice dumps are strictly controlled and checked by our senior professionals.
