

Pass Guaranteed Quiz Oracle - Authoritative 1Z0-1072-25 - Visual Oracle Cloud Infrastructure 2025 Architect Associate Cert Test

BONUS!!! Download part of ITdumpsfree 1Z0-1072-25 dumps for free: <https://drive.google.com/open?id=1-FmA9IKqzYjxaTulTw2lErbtpFdr3fme>

Each user's situation is different. 1Z0-1072-25 simulating exam will develop the most suitable learning plan for each user. We will contact the user to ensure that they fully understand the user's situation, including their own level, available learning time on 1Z0-1072-25 Training Questions. Our experts will fully consider the gradual progress of knowledge and create the most effective learning plan on the 1Z0-1072-25 exam questions for you.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 2	<ul style="list-style-type: none"> Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 3	<ul style="list-style-type: none"> Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 4	<ul style="list-style-type: none"> Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block File Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.

1Z0-1072-25 Certification Test Answers, 1Z0-1072-25 PDF VCE

Our 1Z0-1072-25 test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our 1Z0-1072-25 exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our 1Z0-1072-25 Latest Exam torrent to prepare for the exam can successfully pass the exam and get 1Z0-1072-25 certification. As long as you decide to choose our 1Z0-1072-25 exam questions, you will have an opportunity to prove your abilities, so you can own more opportunities to embrace a better life.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q28-Q33):

NEW QUESTION # 28

You can attach resources to a Dynamic Routing Gateway (DRG). Select THREE of these resources.

- A. Local Peering Connection
- B. Remote Peering Connections
- C. VNIC
- D. IPSec Tunnel
- E. Virtual Circuits
- F. Subnet

Answer: B,D,E

Explanation:

A Dynamic Routing Gateway (DRG) in Oracle Cloud Infrastructure (OCI) is a virtual router that provides a path for private traffic between your on-premises network and your VCN, or between your VCN and other VCNs. The resources that can be attached to a DRG include:

A . Virtual Circuits: Used to establish a private connection between your on-premises data center and your VCN via Oracle's FastConnect service.

D . Remote Peering Connections: Enables peering between VCNs located in different regions (Remote VCN Peering).

E. IPSec Tunnel: Facilitates secure VPN connections between your on-premises network and your OCI VCN.

NEW QUESTION # 29

Which TWO are key benefits of setting up Site-to-Site VPN on Oracle Cloud Infrastructure (OCI)?

- A. When setting up Site-to-Site VPN, customers can expect bandwidth above 2 Gbps.
- B. When setting up Site-to-Site VPN, it creates a private connection that provides consistent network experience.
- C. When setting up Site-to-Site VPN, OCI provisions redundant VPN tunnels.
- D. When setting up Site-to-Site VPN, customers can configure it to use static or dynamic routing (BGP).

Answer: C,D

Explanation:

Setting up a Site-to-Site VPN on Oracle Cloud Infrastructure offers several key benefits related to connectivity and reliability:

Static or Dynamic Routing (BGP): OCI allows customers to configure Site-to-Site VPN with either static routing or dynamic routing using Border Gateway Protocol (BGP). This flexibility enables customers to choose the routing method that best suits their network configuration and requirements.

Redundant VPN Tunnels: OCI automatically provisions redundant VPN tunnels when you set up a Site-to-Site VPN. These redundant tunnels ensure high availability and fault tolerance, so if one tunnel fails, traffic can continue to flow through the other tunnel without interruption.

Bandwidth Considerations: While the VPN provides a reliable connection, it typically does not exceed 2 Gbps in bandwidth. Higher bandwidth connections usually require FastConnect.

Private Connection: The VPN does create a secure and private connection between on-premises data centers and OCI, but it does not inherently provide a consistent network experience in the way that a dedicated connection like FastConnect does.

Relevant OCI Documentation:

Site-to-Site VPN Overview

Configuring Routing for VPNs

These references detail the benefits and technical specifications of setting up Site-to-Site VPNs on OCI.

NEW QUESTION # 30

What would be the total meteredBytes shown by the File Storage service after the hourly update cycle is complete when you overwrite 0.5 GB of a 1 GB file?

- A. 1 GB
- B. 0.5 GB
- C. 1.5 GB
- D. 2.5 GB

Answer: C

Explanation:

In Oracle Cloud Infrastructure (OCI) File Storage, when you overwrite a portion of a file, the service does not immediately reclaim the space occupied by the previous version of the file. The total meteredBytes reflects both the original data and the new data written.

Scenario Explanation: You start with a 1 GB file. When you overwrite 0.5 GB of this file, the file system retains both the 0.5 GB of the original file and the new 0.5 GB you wrote.

Calculation: The original 1 GB file contributes 1 GB to meteredBytes. When 0.5 GB is overwritten, the total usage becomes 1.5 GB (1 GB original + 0.5 GB new).

Thus, after the hourly update cycle, the total meteredBytes shown by the File Storage service will be 1.5 GB.

NEW QUESTION # 31

How would you allow access to FSS for a DB System with read-only permissions?

- A. Modify the security list to allow stateful ingress rules.
- B. Create an instance principal for the DB System.
- C. Create an NFS export option that allows READ_ONLY access.
- D. Modify the security list to allow stateless ingress rules.

Answer: C

Explanation:

To allow access to Oracle Cloud Infrastructure (OCI) File Storage Service (FSS) for a Database (DB) System with read-only permissions, you should create an NFS export option that specifies READ_ONLY access.

NFS Export Options: These options define the access permissions (read/write or read-only) for clients connecting to the file system. By setting the export option to READ_ONLY, you ensure that the DB System can only read from the FSS and cannot modify or delete files.

Oracle Cloud Infrastructure Documentation: File Storage Service Export Options

NEW QUESTION # 32

Which statement is true about File System Replication in Oracle Cloud Infrastructure (OCI)?

- A. You can replicate the data in one file system to another file system in the same region or a different region.
- B. Only a file system that has been exported can be used as a target file system.
- C. You can replicate the data in one file system to another file system only in the same region.
- D. You cannot specify a replication interval when you create the replication resource.

Answer: A

Explanation:

File System Replication in Oracle Cloud Infrastructure (OCI) allows you to replicate data from one file system to another either within the same region or across different regions. This capability is particularly useful for disaster recovery, data protection, and global data distribution scenarios.

Cross-Region Replication: The replication feature enables you to create a copy of your file system in a different region, ensuring that your data is available even in the event of a regional failure.

Same-Region Replication: You also have the option to replicate data within the same region, which can be useful for scenarios such as high availability and local backups.

NEW QUESTION # 33

.....

We all know that Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam dumps are an important section of the 1Z0-1072-25 exam that is purely based on your skills, expertise, and knowledge. So, we must find quality 1Z0-1072-25 Questions that are drafted by industry experts who have complete knowledge regarding the 1Z0-1072-25 Certification Exam and can share the same with those who want to clear the 1Z0-1072-25 exam. The best approach to finding Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam dumps is to check the ITdumpsfree that is offering the 1Z0-1072-25 practice questions.
