NEW QUESTION # 27

A system administrator receives an app that was developed using Qlik Sense Desktop. The app must be published to stream A and stream B.

Which steps should the system administrator take to meet this requirement?

- A. - Import the app using the QMC;
- B. - Import the app using the hub;
- C. - Import the app using the hub;
- D. - Import the app using the QMC;

Answer: A

NEW QUESTION # 28

In a Qlik Sense environment a poor performance has been reported. Users are losing connectivity and are able to access only after many attempts. When accessing, there is an excessive delay when navigating and performing filters.

In conjunction with the IT area, they gather the following information:

the network is stable, Qlik Sense is installed on a virtual machine with high end CPUs, the number of users has not increased, the data model has not changed. The number and size of applications have increased over time.

What tools can be used to diagnose the problem?

- A. Governance Dashboard, ipconfig, tracert, Wireshark, and the System Monitor app
- B. Process Explorer from Sysinternals, Windows Task Manager, Windows Event Viewer, and the Operations Monitor app
- C. Wireshark, Disk Usage from Sysinternals, Windows Task Manager, and the Operations Monitor app
- D. Windows Task Manager, Windows Event Viewer, Windows Explorer, and Process Monitor from Sysinternals

Answer: C

NEW QUESTION # 29

A system administrator must make sure that only members of the "Dev" Active Directory group have the Work stream and are able to create Qlik Sense apps.

The administrator creates a security rule that only allows members of the "Dev" group to create apps, but other users can still see the Personal Work area and are able to create apps.

What is the cause of this issue?

- A. Security rules do NOT impact the Work stream
- B. The Create app functionality is disabled for "Dev" group
- C. The default security rule for app creation is enabled
- D. The security rules are corrupted

Answer: C
