Don't miss practicing the H19-341\_V1.0 mock exams and score yourself honestly. You have all the time to try Huawei H19-341\_V1.0 practice exams and then be confident while appearing for the final turn. The desktop software works on Windows and the web-based format works on all operating systems. With PDF questions, you can prepare for the H19-341\_V1.0 Certification Exam while sitting back at our place.

## Huawei H19-341\_V1.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Typical Networking of Huawei Video Conferencing Solution: Covers the standard network architectures and topologies used to deploy Huawei video conferencing solutions.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Huawei Video Conferencing Endpoint Product Training (Box, Bar, Camera, Mic, Soft Clients): Covers the hardware and software endpoints such as Box, Bar, cameras, microphones, and soft clients used in video conferencing deployments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• HUAWEI Smart Office Solution Introduction: Covers Huawei's integrated smart office solution designed to enhance workplace collaboration and efficiency.</li></ul>

- HUAWEI Digital Classroom Solution Introduction: Covers Huawei's solution for enabling technology-driven smart digital classroom environments.

## &gt;&gt; H19-341\_V1.0 Practice Guide &lt;&lt;

**Guide H19-341\_V1.0 Torrent | H19-341\_V1.0 PDF VCE**

Users don't need to install any plugins or software to attempt the Huawei H19-341\_V1.0 practice exam. All operating systems support this format. The third and last format is HCSA-Field-Intelligent Collaboration V1.0 (H19-341\_V1.0) desktop software that can be used on Windows computers. The customers that have Windows laptops or computers can attempt the practice exam and prepare for it efficiently. These formats are in use by a lot of applicants currently and they are preparing for their best future on daily basis. Even the customers who have used it in the past for the preparation of Huawei H19-341\_V1.0 Certification Exam have rated our product as one of the best.

**Huawei HCSA-Field-Intelligent Collaboration V1.0 Sample Questions (Q37-Q42):****NEW QUESTION # 37**

Huawei SMC provides different roles (common user, conference administrator, and system administrator) with functions such as conference control and visualized O & M, etc.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

The Huawei Service Management Center (SMC) is designed with a role-based access control (RBAC) model to ensure secure and efficient management.

\* System Administrator: Responsible for global configurations, NE (Network Element) management, and system-wide maintenance.

\* Conference Administrator: Focuses on scheduling, managing, and controlling conferences, as well as managing organizational resources.

\* Common User: Typically has access to personal conference scheduling and joining functions.

The SMC also provides a "Visualized O & M" dashboard that allows administrators to monitor the health of the entire CloudVC network, including MCU status and participant line quality, in real-time.

**NEW QUESTION # 38**

Which multimedia communication protocols does the Huawei Bar 310 support? (Select all that apply)

- A. H.239
- B. SIP
- C. BFCP
- D. H.323

**Answer: A,B,C,D**

Explanation:

The Huawei CloudLink Bar 310 is an industry-standard terminal designed for maximum interoperability. It supports the two primary signaling protocols: H.323 (B) and SIP (D) .

To facilitate content sharing (dual-stream) during a call, it supports the corresponding data protocols for each signaling type:

\* H.239 (A): The standard for dual-streaming within H.323 calls.

\* BFCP (C): The Binary Floor Control Protocol used for dual-streaming within SIP calls.

This ensures the Bar 310 can share presentations and video simultaneously regardless of the infrastructure it is connected to.

**NEW QUESTION # 39**

Which of the following noises can be suppressed by the intelligent noise reduction algorithm of Huawei Box terminals? (Select all that apply)

- A. High-heeled heels
- B. Keyboard sound
- C. Coughing sounds
- D. Speaking voice
- E. Teacup crashing

**Answer: A,B,C,E**

Explanation:

Huawei's Intelligent Noise Reduction (AI Noise Cancellation) technology is built on deep learning models trained on millions of hours of audio data. Its primary goal is to distinguish between human speech and non-human background noise.

\* Suppressed Noises: The algorithm identifies and filters out over 30 types of common office noises, including keyboard typing (E), coughing (A), shuffling of papers, teacup or pen clatter (B), and the clacking of high-heeled shoes (D).

\* Preserved Sound: The Speaking voice (C) is specifically identified as the target signal. The AI ensures that while background "garbage" is removed, the human voice remains natural, clear, and undistorted.

#### NEW QUESTION # 40

Which function does the Huawei MCU web portal NOT support?

- A. Power on
- B. Hardware status
- C. Logs collection
- D. One-click information collection

**Answer: A**

Explanation:

The MCU (Multipoint Control Unit) web portal is a software management interface accessible via a browser once the device is already running.

\* One-click information collection (A): This is a standard O & M feature used to gather system data for troubleshooting.

\* Hardware status (B): The portal displays real-time data such as CPU usage, memory, and temperature.

\* Logs collection (C): Administrators can download operation and system logs directly from the web UI.

\* Power on (D): This is not supported because the web portal is a service provided by the MCU's operating system. If the device is powered off, the web service is not running and cannot be accessed.

To power on the device remotely, an out-of-band management tool like the Huawei iBMC (Intelligent Baseboard Management Controller) must be used.

#### NEW QUESTION # 41

Which of the following scenarios can Huawei IdeaHub S2 use for? (Select all that apply)

- A. Replacing traditional whiteboards
- B. Replacing Projector
- C. Enterprise information display window
- D. Office computers/PADs in public areas
- E. Used as a video conference terminal/camera/mic/sound

**Answer: A,B,C,D,E**

Explanation:

The Huawei IdeaHub S2 is a versatile "6-in-1" smart office device that covers almost all meeting room and public space needs:

\* Whiteboard (A): Features 16ms ultra-low latency writing to replace traditional ink boards.

\* Information Display (B): Can be used for digital signage, corporate culture bulletins, or welcome screens.

\* VC Terminal (C): Includes a built-in 4K camera, 8-meter pickup mic array, and high-quality speakers for native or BYOM (Bring Your Own Meeting) video calls.

\* Public Area Kiosk (D): Its touchscreen and built-in browser/apps allow it to function as an interactive kiosk or shared computer.

\* Projector Replacement (E): Offers 4K wireless projection with high brightness and contrast, eliminating the need for bulky
