If you prefer to study by your mobile phone, our 312-38 study materials also can meet your demand, because our learning system can support all electronic equipment. You just need to download the online version of our 312-38 preparation questions, and you can use our products by any electronic equipment. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our 312-38 Study Materials.

## EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q387-Q392):

### NEW QUESTION # 387

Which of the following protocols is used to exchange encrypted EDI messages via email?

- A. S/MIME
- B. MIME

- C. HTTP
- D. HTTPS

**Answer: A**

#### NEW QUESTION # 388

Which of the following is an open source implementation of the syslog protocol for Unix?

- A. syslog Unix
- B. syslog-os
- C. syslog-ng
- D. Unix-syslog

**Answer: C**

#### NEW QUESTION # 389

You are an IT security consultant working on a contract for a large manufacturing company to audit their entire network. After performing all the tests and building your report, you present a number of recommendations to the company and what they should implement to become more secure. One recommendation is to install a network-based device that notifies IT employees whenever malicious or questionable traffic is found. From your talks with the company, you know that they do not want a device that actually drops traffic completely, they only want notification. What type of device are you suggesting?

- A. You are suggesting a NIPS device
- B. A NIDS device would work best for the company
- C. A HIPS device would best suite this company
- D. The best solution to cover the needs of this company would be a HIDS device.

**Answer: B**

Explanation:

The device suggested is a Network Intrusion Detection System (NIDS). A NIDS monitors network traffic for suspicious activity and alerts the system or network administrator. Unlike a Network Intrusion Prevention System (NIPS), which actively blocks traffic deemed malicious, a NIDS does not interfere with the flow of traffic, thus fulfilling the company's requirement for a device that only notifies rather than drops traffic.

References: The information aligns with the Certified Network Defender (CND) course's focus on network security, which includes understanding and implementing devices that protect, detect, respond, and predict network security incidents. The CND course emphasizes the importance of network traffic monitoring and analysis, which is a key function of a NIDS12.

#### NEW QUESTION # 390

Eric is receiving complaints from employees that their systems are very slow and experiencing odd issues including restarting automatically and frequent system hangs. Upon investigating, he is convinced the systems are infected with a virus that forces systems to shut down automatically after period of time. What type of security incident are the employees a victim of?

- A. Malicious Code
- B. Denial of service
- C. Scans and probes
- D. Distributed denial of service

**Answer: A**

#### NEW QUESTION # 391

The GMT enterprise is working on their internet and web usage policies. GMT would like to control internet bandwidth consumption by employees. Which group of policies would this belong to?

- A. Network Services Specific Security Policy
- B. Issue Specific Security Policy

- C. Enterprise Information Security Policy
- D. System Specific Security Policy

**Answer: A**

Explanation:

The control of internet bandwidth consumption by employees falls under the Network Services Specific Security Policy. This category of policy is designed to manage and secure the services that are provided over the network, which includes internet access and usage. It encompasses the rules and procedures that govern how network services, such as bandwidth, are allocated and used within an organization. By implementing such policies, GMT enterprise aims to ensure that the network's bandwidth is utilized effectively and in alignment with the company's operational requirements and objectives.

References: The answer is derived from the understanding of network security policies as outlined in the Certified Network Defender (CND) course by EC-Council, which emphasizes the importance of specific policies for managing network services and resources.

## NEW QUESTION # 392

.....

If you really want to pass the real test and get the EC-COUNCIL certification? At first, you should be full knowledgeable and familiar with the 312-38 certification. Even if you have acquired the knowledge about the 312-38 actual test, the worries still exist. You do not know what questions you may be faced with when attending the real test. Now, you need the 312-38 practice dumps which can simulate the actual test to help you. Our 312-38 training dumps can ensure you pass at first attempt.
