Salesforce Salesforce-Media-Cloud valid exam questions and answers give an excellent beginning for your dream. If you pass exams and get a certification, you can obtain a high-salary job and realize your goal. Salesforce-Media-Cloud Valid Exam Questions and answers help you pass exam certainly. We have a series of products for IT certification exams.

Salesforce Media Cloud Accredited Professional (AP) Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15

Users receive an "Apex CPU limit exceeded" error when running the Advertising Sales Management (ASM) flow OmniScript in a Salesforce Experience site. The OmniScript includes an Integration Procedure that contains multiple Data Raptors. In which two areas within OmniStudio should a Consultant check to troubleshoot this issue?
Choose 2 answers

- A. OmniScript Debugger
- B. OmniStudio Logs
- C. Action Debugger
- D. DataRaptor Configuration

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To troubleshoot Apex CPU limit errors in OmniStudio, checking the OmniScript Debugger helps identify heavy operations in the flow. OmniStudio Logs provide detailed execution logs that can reveal inefficient or repeated processing. DataRaptor configurations could contribute to CPU use but are not directly traceable like logs and debugger tools. Action Debugger focuses on runtime user actions rather than script performance.

NEW QUESTION # 16

Which two objects in the Media Cloud data model hold specific Ad Sales information within the Advertising Sales Management (ASM) application?
Choose 2 answers

- A. Contract Line Item
- B. Media Plan Placement
- C. Quote
- D. Ad Creative Size Type

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Media Plan Placement holds detailed ad sales planning data, and Contract Line Item captures sales contract specifics in ASM. Quote is a standard sales object, but Media Cloud extends sales data primarily into placement and contract line item objects. Ad Creative Size Type relates to creative attributes but is less focused on sales information.

NEW QUESTION # 17

During proposal line item creation, a Consultant needs to be able to select a value for a picklist type attribute. Which non-overrideable behavior must the Consultant select during the assignment to the parent object type?

- A. Is Not Assetizable
- B. Is Not Translatable
- C. Is Encrypted
- D. Run-time Configurable

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Run-time Configurable behavior allows the picklist values to be determined dynamically during runtime rather than being statically

assigned. This is critical in proposal line items to select picklist values that may change or depend on other variables dynamically. The other options either disable functionality (Is Not Assetizable), restrict translations, or encrypt values but do not allow dynamic selection.

NEW QUESTION # 18

A publishing company has an existing media plan creation process that was setup using OmniStudio a few months ago. A new requirement has come up where the user will be required to enter a new secondary budget field and this field should be stored with the rest of the media plan details.

On which object should a Consultant add this field so that it is stored with the rest of the media plan and can be added to the appropriate OmniScript?

- A. Opportunity
- **B. Media Plan Placement**
- C. Quote
- D. Order

Answer: B

NEW QUESTION # 19

A publisher needs to check ad server inventory as part of the media plan creation process.

Which ad server is supported by standard Media Cloud Advertising Sales Management (ASM) features?

- A. Sizmek
- **B. Google Ad Manager**
- C. Openx
- D. Campaign Manager 360

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Google Ad Manager (GAM) is the only ad server with out-of-the-box integration supported in Media Cloud ASM. This enables inventory checks, campaign booking, and reporting directly through Media Cloud interfaces. Other servers require custom integrations.
