우리Itexamdump 에서 제공하는 학습가이드에는 IT전문가들이 만들어낸 시험대비 자료들과EXIN CITM인증시험의 완벽한 문제와 답들입니다. 그리고 우리Itexamdump에서는 IT업계에서의 높은 신뢰감으로 여러분들한테 100%보장을 드립니다. 우리에게 믿음을 드리기 위하여EXIN CITM관련자료의 일부분 문제와 답 등 샘플을 무료로 다운받아 체험해볼수 있게 제공합니다.

## EXIN CITM 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>• IT Strategy: This section of the exam measures the skills of an IT Strategy Manager and covers the development and alignment of IT strategy with business objectives. It emphasizes creating strategic plans to support organizational goals, understanding emerging technologies, and ensuring that IT investments contribute to competitive advantage and operational efficiency.</li> </ul>

주제 2	<ul style="list-style-type: none"> <li>• Risk Management: This domain evaluates the capabilities of an IT Risk Manager and involves identifying, assessing, and mitigating IT-related risks. It addresses developing risk frameworks, compliance management, and proactive measures to safeguard IT assets and operations.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>• Information Security Management: This section targets an Information Security Manager and focuses on protecting information assets from threats. It covers policy development, security controls implementation, incident response, data protection, and compliance with legal and regulatory requirements to maintain confidentiality, integrity, and availability.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>• Project Management: This domain is aimed at an IT Project Manager and encompasses planning, executing, and controlling IT projects. It includes managing scope, time, cost, quality, and risks, applying project methodologies, engaging stakeholders, and delivering projects that meet business requirements.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>• Business Continuity Management: This section measures the skills of a Business Continuity Manager and covers planning and implementing strategies to ensure IT availability and resilience during disruptions. It includes risk assessment, disaster recovery planning, backup procedures, and testing to minimize business impact.</li> </ul>

## CITM시험문제집 - CITM인증덤프문제

Itexamdump의EXIN CITM인증시험의 자료 메뉴에는EXIN CITM인증시험실기와EXIN CITM인증시험 문제집으로 나누어져 있습니다.우리 사이트에서 관련된 학습가이드를 만나보실 수 있습니다. 우리 Itexamdump의EXIN CITM인증 시험자료를 자세히 보시면 제일 알맞고 보장도가 높으며 또한 제일 전면적인 것을 느끼게 될 것입니다.

### 최신 EPI IT Management CITM 무료샘플문제 (Q49-Q54):

#### 질문 # 49

Before signing the contract with the proposed vendor, concerns have been raised over future price increases. The internal business units, however, insist that the agreement with the vendor must take place as a result of the vendor evaluation process. What is the likely action to take?

- A. Ignore the business units and change vendor
- B. Include contractual terms
- C. Sign the contract
- D. Re-tender the project

**정답: B**

#### 설명:

Concerns about future price increases can be addressed by including contractual terms(B) in the agreement to limit or regulate price escalations (e.g., fixed pricing, escalation clauses, or review mechanisms). This approach balances the business units' insistence on proceeding with the selected vendor (based on a thorough evaluation) while mitigating financial risks. According to vendor management best practices, contracts should include clear terms to protect against unforeseen cost increases, ensuring alignment with business objectives.

\* Ignore the business units and change vendor (A):Contradicts the evaluation process and business units' decision, risking misalignment.

\* Sign the contract (C):Ignores the price increase concern, potentially exposing the organization to financial risk.

\* Re-tender the project (D):Unnecessary, as the vendor was selected through evaluation; contractual terms can address the concern without restarting the process.

Reference:EPI CITM study guide, under Vendor Selection/Management, likely discusses contract negotiation strategies, emphasizing risk mitigation through contractual terms. Check sections on vendor contracts or procurement.

#### 질문 # 50

In vendor selection, what is the most important reason for a reference check?

- A. To identify customers not mentioned on the reference list
- B. To obtain financial information for vendor negotiation
- C. To verify products by other customers
- **D. To independently verify and validate a vendor's claim**

**정답: D**

**설명:**

The most important reason for a reference check in vendor selection is to independently verify and validate a vendor's claim (A). Reference checks involve contacting the vendor's previous or current clients to confirm claims about performance, reliability, and service quality, ensuring the vendor can meet contractual obligations. This aligns with vendor management best practices to mitigate risks by validating vendor credibility.

\* Verify products by other customers (B): Too narrow; reference checks focus on overall performance, not just products.

\* Obtain financial information (C): Financial data is obtained through financial due diligence, not reference checks.

\* Identify customers not mentioned (D): Not a primary goal; the focus is on validating provided references.

Reference: EPI CITM study guide, under Vendor Selection/Management, likely covers due diligence processes, emphasizing reference checks for validation. Check sections on vendor evaluation or due diligence.

**질문 # 51**

The organization's online retail system popularity has resulted in global demand. To provide customers with a 24x7 option for support in regard to returning products, a virtual assistant is designed providing simple instructions based on pre-defined questions which are commonly asked by customers. Which type of Machine Learning (ML) is applied?

- A. Reinforcement learning
- B. Unsupervised
- C. Deep learning
- **D. Supervised**

**정답: D**

**설명:**

The scenario describes a virtual assistant designed to provide simple instructions for product returns based on pre-defined questions commonly asked by customers. This indicates the use of supervised machine learning (B), where the system is trained on a labeled dataset (e.g., questions paired with correct responses) to predict appropriate answers. Supervised learning is ideal for applications like chatbots or virtual assistants that rely on predefined input-output pairs to handle customer queries efficiently.

\* Unsupervised (A): Involves finding patterns in unlabeled data (e.g., clustering), not suitable for predefined question-response tasks.

\* Reinforcement learning (C): Focuses on learning through trial and error with rewards, used in dynamic environments (e.g., robotics), not for static question answering.

\* Deep learning (D): A subset of supervised or unsupervised learning using neural networks, but the question doesn't specify complex architectures, making supervised learning the broader, correct choice.

Supervised learning aligns with IT strategy for deploying AI-driven customer support tools, as it ensures accurate, predictable responses based on trained data, enhancing user experience in a global retail system.

Reference: EPI CITM study guide, under IT Strategy, likely discusses emerging technologies like AI and machine learning, emphasizing supervised learning for customer-facing applications. Refer to sections on artificial intelligence or customer support technologies.

**질문 # 52**

Users (customers) are complaining about the quality of how problems are being solved. What is the most likely cause?

- A. Lack of budget to manage problems
- B. Wrong allocation of problems
- **C. Poor registration of problems**
- D. Errors in priority

**정답: C**

**설명:**

In TIL's problem management process, poor registration of problems (A) is the most likely cause of low-quality problem resolution. Effective problem management requires accurate logging of incidents and problems, including detailed descriptions, to enable proper

root cause analysis and resolution. If problems are poorly registered (e.g., incomplete or inaccurate data), it hinders diagnosis and resolution, leading to customer dissatisfaction.

\* Wrong allocation of problems (B): Incorrect assignment to teams can delay resolution but is less fundamental than poor registration, which affects the entire process.

\* Errors in priority (C): Incorrect prioritization may delay urgent issues, but poor registration impacts resolution quality more directly.

\* Lack of budget (D): May limit resources, but the scenario points to process quality, not resource constraints.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's problem management, emphasizing accurate problem logging. Check sections on ITIL problem management or service operation.

### 질문 # 53

Your organization considers a job rotation program. What is the main objective?

- A. Train staff on a range of activities common in daily operations
- **B. Support the long-term continuity of the organization**
- C. Allow staff a diversity in their daily responsibilities
- D. Increase staff job satisfaction

정답: B

설명:

The main objective of a job rotation program in an IT organization is to support the long-term continuity of the organization (A). Job rotation ensures that multiple staff members are trained across various roles and tasks, reducing dependency on specific individuals and mitigating risks associated with staff turnover or absences. This approach enhances organizational resilience by creating a flexible, cross-trained workforce capable of maintaining operations, aligning with IT organization principles for workforce planning and business continuity.

\* Train staff on a range of activities (B): While training is a benefit, it is a means to achieve continuity, not the primary objective.

\* Increase staff job satisfaction (C): Job satisfaction may be a secondary benefit, but it's not the main goal in an IT context.

\* Allow staff a diversity in responsibilities (D): Diversity in tasks is a byproduct, not the primary focus, which is organizational continuity.

According to human resource management frameworks, job rotation is a strategic tool for ensuring operational stability, particularly in IT environments where specialized skills are critical.

Reference: EPI CITM study guide, under IT Organization, likely discusses workforce planning and job rotation for continuity. Check sections on human resource management or organizational resilience.

### 질문 # 54

.....

비스를 제공해드려 아무런 걱정없이 CITM 시험에 도전하도록 힘이 되어드립니다. Itexamdump 덤프를 사용하여 시험에서 통과하신 분이 전해주시는 희소식이 Itexamdump 덤프 품질을 증명해드립니다.
