## Valid HCL-HWA-ADM-102 Exam Sample, HCL-HWA-ADM-102 Questions Answers

As we all know, for candidates all they do is to pass the exam. If you choose us, we will help you pass the exam successfully. With the pass rate is 98.65% for HCL-HWA-ADM-102 study materials, we can ensure you pass the exam, and we also pass guarantee and money back guarantee if you fail to pass the exam. Besides, we have the skilled professionals to compile and verify the HCL-HWA-ADM-102 Exam Braindumps, they have covered most knowledge points of the exam. HCL-HWA-ADM-102 study materials contain both questions and answers, and you can have a quickly check after practicing.

## HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q368-Q373):

### NEW QUESTION # 368

Scenario: Users report slow response times in the Dynamic Workload Console when running monitor tasks on a plan with over 100,000 jobs. Which control limit should be adjusted to improve usability while maintaining performance?

- A. Increase the default page size for lists
- B. Increase the query result limit temporarily
- C. Lower the maximum concurrent tasks per user
- D. Adjust the engine connection timeout

**Answer: A**

Explanation:

The console controls the page size for list displays to balance performance and usability. Increasing the default page size allows more objects per page without exceeding overall query limits, reducing pagination overhead in large environments.

### NEW QUESTION # 369

Scenario: Dynamic agents in HCL Workload Automation 10.2 show frequent reconnects to the broker. Investigation points to jobman instability. What is the primary communication method affected?

- A. Courier.msg
- B. Persistent HTTPS/WebSocket to Liberty
- C. UDP heartbeat
- D. Batchman direct link
- E. Local message queues

**Answer: B**

Explanation:

Persistent HTTPS/WebSocket to Liberty is maintained by jobman for real-time job streaming; network glitches cause reconnects and restarts.

### NEW QUESTION # 370

HCL HWA 10.2 FTA workstation reset after production cycle network partition shows batchman stale PlanBox.msg v10.1.x but jobman 1650 queued jobs current. CP=20h41m blocked. What selective reset preserves production queue?

- A. conman "resetws wsname --queue"
- B. conman "stop wsname#batchman"; evtsize PlanBox.msg 0; startup wsname#batchman
- C. planman resyncplan wsname /PRESERVE
- D. rm PlanBox.msg only; batchman recycle

**Answer: B**

Explanation:

evtsize PlanBox.msg 0 rebuilds stale v10.1.x from current Symphony preserving jobman 1650-job queue and CP=20h41m; selective batchman recovery maintains fault-tolerant execution post-partition versus partial rm risking further corruption.

### NEW QUESTION # 371

In HCL Workload Automation 10.2 conman, to rerun a job from a specific step in an SAP job while retaining the original name due to global option enRetainNameOnRerunFrom=yes, the syntax is?

- A. continue job;from=step
- B. rr jobselect=SAPJOB;step=5
- C. submit job=SAPJOB;rerun
- D. rerun jobselect=SAPAGENT#SAPJOB;from=step5
- E. alter job;rerunfrom=step

**Answer: D**

Explanation:

rerun jobselect=SAPAGENT#SAPJOB;from=step5 restarts the SAP job from the specified step, preserving name when the global option is enabled.

### NEW QUESTION # 372

Scenario: You are preparing to install HCL Workload Automation 10.2 master domain manager using DB2. The DB2 administrator has created the database instance but not the tables. What is the correct sequence involving provided tools?

- A. Provide create\_database.sql to DB2 admin for database creation, then run configureDb to populate tables.
- B. Use serverinst script with --createdb true parameter.
- C. Run configureDb.vbs directly with admin credentials to create and populate tables.
- D. Manually run SQL scripts from tws\_tools; no automated tool available.
- E. Install first, then use optman to initialize database.

**Answer: A**

Explanation:

For DB2 in HCL Workload Automation 10.2, database creation requires a specific two-step process due to DB2 architecture. First, a customized create\_database.sql file (provided in the installation image under tws\_tools) must be edited with the desired database name and given to the DB2 administrator to create the empty database. Once created, run the configureDb script (or .vbs on Windows) on the master domain manager workstation, providing connection details and admin credentials, to automatically populate the database with required HCL Workload Automation tables and schemas.

### NEW QUESTION # 373

.....

HCLSoftware certification HCL-HWA-ADM-102 exam is one of the many IT employees' most wanting to participate in the certification exams. Passing the exam needs rich knowledge and experience. While accumulating these abundant knowledge and experience needs a lot of time.
