Foundation 5.2 Administrator New Braindumps Free

There are three different versions of our 2V0-11.25 exam questions: the PDF, Software and APP online. You can choose the version of 2V0-11.25 training guide according to your interests and habits. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study 2V0-11.25 training engine anytime and anyplace for the convenience these three versions bring.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q107-Q112):

NEW QUESTION # 107

An administrator has deployed a new VMware Cloud Builder appliance using the downloaded OVF file.

While attempting to use the VMware Cloud Builder interface, the administrator discovers that no connection can be established to the appliance.

Which three configuration errors may have occurred? (Choose three.)

- A. Incorrect NTP settings or inaccessible NTP servers.
- B. **Incorrect DNS settings or inaccessible DNS servers.**
- C. Incorrect Dynamic IP configuration.
- D. **VLAN misconfiguration.**
- E. BGP routing misconfiguration.
- F. **Incorrect Static IP configuration.**

Answer: B,D,F

Explanation:

A VLAN misconfiguration could prevent proper network connectivity, particularly if the appliance is not in the correct VLAN or if there is a misalignment in network segmentation.

Incorrect DNS settings or inaccessible DNS servers can prevent the VMware Cloud Builder appliance from being able to resolve hostnames, leading to connection issues.

Incorrect Static IP configuration would result in the appliance being unreachable because it won't have the correct IP address or network configuration to communicate with other components.

NEW QUESTION # 108

An organization is integrating VMware vCenter with Active Directory (AD) to streamline user authentication. As part of this process, the administrator needs to add AD as an identity source in vCenter.

Which three steps must be performed to successfully add AD as an identity source? (Choose three.)

- A. **Select 'Add Identity Source' and choose 'Active Directory (Integrated Windows Authentication)'.**
- B. **Enter the Domain Name and the credentials of an AD user with domain join privileges**
- C. Configure DNS settings on all ESXi hosts to point to the AD DNS servers.
- D. **Navigate to the vCenter Single Sign-On configuration in the vSphere Client.**
- E. Reboot the vCenter Server to apply the identity source settings.

Answer: A,B,D

Explanation:

When adding AD as an identity source, you need to enter the Domain Name and provide the credentials of an AD user with domain join privileges to authenticate and add the domain.

In the vSphere Client, you need to select 'Add Identity Source' and choose the appropriate method for AD integration, which is typically 'Active Directory (Integrated Windows Authentication)'.

The process to add AD as an identity source is performed under the vCenter Single Sign-On (SSO) configuration in the vSphere Client.

NEW QUESTION # 109

An administrator has deployed the VMware Cloud Builder appliance in preparation for the deployment of a new VMware Cloud Foundation (VCF) environment. While performing the bring-up of the Management Domain, one of the tasks fails. The administrator is unable to identify the root cause of the failure and needs to generate a support bundle to send to VMware support.

Which tool should the administrator use to generate the support bundle for the failed bring-up?

- A. Generate support Bundle option on the vCenter server Management Interface
- B. Generate Support Bundle option on the vSphere Host Client Interface
- C. Supportability and Serviceability (SoS) Utility on the SDDC Manager appliance
- D. **Supportability and Serviceability (SoS) Utility on the VMware Cloud Builder appliance**

Answer: D

Explanation:

For a failed Management Domain bring-up, you should SSH into the Cloud Builder appliance and run the Supportability and Serviceability (SoS) Utility there to generate the support bundle.

NEW QUESTION # 110

An alert in SDDC Manager indicates that the health status of the vSAN cluster is degraded.

Which tool within VMware Cloud Foundation should be used to gather detailed logs and perform in-depth troubleshooting for the vSAN issues?

- A. vCenter Server
- B. Aria Operations for Networks
- C. **Aria Operations for Logs**
- D. SDDC Manager

Answer: C

Explanation:

Aria Operations for Logs (formerly known as vRealize Log Insight) is used to collect, analyze, and troubleshoot logs from various components within VMware Cloud Foundation, including the vSAN cluster. It provides detailed insights into the logs, allowing administrators to perform in-depth troubleshooting of issues like degraded health statuses.

NEW QUESTION # 111

Which three tasks are performed by Cloud Builder during the bring-up process of a VMware Cloud Foundation solution? (Choose three.)

- A. vVols storage configuration for all management hosts
- B. **vCenter and NSX Manager cluster deployment**
- C. vSphere HA/DRS cluster creation and configuration
- D. **NSX Edge cluster deployment**
- E. **SDDC manager deployment**
- F. Aria Suite Lifecycle Manager deployment

Answer: B,D,E

Explanation:

Cloud Builder deploys the SDDC Manager, which is responsible for managing and automating the VMware Cloud Foundation environment.

Cloud Builder deploys the NSX Edge cluster as part of the network configuration during the bring-up process.

Cloud Builder also deploys the vCenter and NSX Manager clusters to ensure proper management and network virtualization for the VMware Cloud Foundation environment.

NEW QUESTION # 112

.....

VCE4Plus is unlike other exam materials that are available on the market, 2V0-11.25 study torrent specially proposed different versions to allow you to learn not only on paper, but also to use mobile phones to learn. You can choose the version of 2V0-11.25 training guide according to your interests and habits. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study 2V0-11.25 Exam Engine anytime and anywhere for the convenience these three versions bring.
