

# NSE7\_SSE\_AD-25 Valid Test Cost & New NSE7\_SSE\_AD-25 Exam Review

DumpsActual Fortinet NSE7\_SSE\_AD-25 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The Fortinet NSE7\_SSE\_AD-25 Exam Dumps are similar to real exam questions. Our Fortinet NSE7\_SSE\_AD-25 practice test software is suitable for computer users with a Windows operating system.

As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, NSE7\_SSE\_AD-25 exam guide gives you this opportunity. NSE7\_SSE\_AD-25 test prep helps you save time by improving your learning efficiency. They can provide remote online help whenever you need. And after-sales service staff will help you to solve all the questions arising after you purchase NSE7\_SSE\_AD-25 learning question, any time you have any questions you can send an e-mail to consult them. All the help provided by NSE7\_SSE\_AD-25 test prep is free. It is our happiest thing to solve the problem for you. Please feel free to contact us if you have any problems.

## New NSE7\_SSE\_AD-25 Exam Review - Valid NSE7\_SSE\_AD-25 Study Materials

Preparing for the exam may be not an easy thing for some candidates, if you choose us, we will do the things for you, what you need to do is practicing. We offer you free demo for NSE7\_SSE\_AD-25 training materials, you can have a try before buying. And you will receive the downloading link and password within ten minutes after purchasing the NSE7\_SSE\_AD-25 Exam Dumps. In addition, we have after-service stuff to resolve the confusions you have. If you fail to pass the exam, we are money back guaranteed, or if you have other exam to attend, we can also replace other 2 valid exam dumps for you.

## Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q56-Q61):

### NEW QUESTION # 56

For monitoring potentially unwanted applications on endpoints, which information is available on the FortiSASE software installations page? (Choose two answers)

- A. The vendor of the software<sup>3</sup>
- B. The usage frequency of the software
- C. The license status of the software<sup>2</sup>
- D. The endpoint the software is installed on<sup>1</sup>

**Answer: A,D**

Explanation:

In FortiSASE, the Software Installations page (located under Network > Managed Endpoints) provides a centralized view of all software inventory reported by the FortiClient agents. This feature is essential for administrators to maintain visibility into the environment and identify potentially unwanted applications (PUA) or unauthorized software installed on remote devices.

\* Software Inventory Reporting: FortiClient sends the endpoint's software inventory to FortiSASE upon initial registration and updates the portal whenever a change-such as an installation, update, or removal-occurs on the endpoint.

\* Available Information (Vendor): When viewing the global list of applications, the portal displays detailed metadata for each software entry. This includes the Vendor of the software and its specific version, allowing administrators to differentiate between reputable enterprise applications and suspicious third-party utilities.

\* Available Information (Endpoint Association): The interface includes an Endpoint Count field that indicates how many devices have a specific application installed. By selecting a specific application and using the View Endpoints action, the administrator can see a list of every individual endpoint where that software is currently active.

\* Incorrect Options: While license management is a general feature of the ecosystem, the Software Installations page itself does not track the license status of individual third-party applications (Option B). Similarly, while FortiSASE monitors traffic, the Software Installations inventory page does not report on the usage frequency (how often a user opens or uses the app) of the installed binaries (Option D).

By leveraging this inventory, administrators can proactively manage risk by identifying endpoints that possess high-risk software and taking remediation steps or applying ZTNA posture tags based on the presence of specific unauthorized software.

### NEW QUESTION # 57

Refer to the exhibit. A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate. In this scenario, which two setups will achieve these requirements? (Choose two.)

- A. Configure private access policies on FortiSASE with ZTNA.
- B. Configure ZTNA tags on FortiGate.
- C. Configure FortiGate as a zero trust network access (ZTNA) access proxy.
- D. Configure ZTNA servers and ZTNA policies on FortiGate.

**Answer: C,D**

Explanation:

To enforce device posture checks and ensure that TCP traffic flows through FortiGate, the FortiGate must act as a ZTNA access proxy and host the ZTNA servers and policies. This setup allows posture validation via FortiSASE while routing traffic securely to protected servers through FortiGate.

### NEW QUESTION # 58

How does FortiSASE Secure Private Access (SPA) facilitate connectivity to private resources in a hub-and-spoke network? (Choose one answer)

- A. SPA applies source network address translation (SNAT) for remote user traffic and uses IKEv1 for IPsec tunnels to connect to standalone hubs without BGP support.
- B. SPA establishes direct links to spokes without IPsec or BGP and uses an easy configuration key to secure web traffic for remote users.
- C. SPA connects a FortiSASE POP to a FortiGate hub or SD-WAN deployment using IPsec and BGP for dynamic route exchange with an easy configuration key for simplified setup on FortiOS.1

- D. SPA connects to private resources using HTTP and HTTPS protocols and relies on FortiClient for agentless access to SD-WAN deployments.

**Answer: C**

Explanation:

FortiSASE Secure Private Access (SPA) is designed to provide remote users with seamless and secure access to private applications hosted behind an organization's FortiGate Next-Generation Firewall (NGFW) or SD- WAN hubs.<sup>2</sup>

\* Hub-and-Spoke Architecture: In this deployment model, the organization's FortiGate (either a standalone NGFW or an SD-WAN hub) acts as the hub, while the global FortiSASE Security Points of Presence (PoPs) act as spokes.<sup>3</sup>

\* IPsec and BGP Integration: The connectivity between the FortiSASE PoPs and the corporate hub is established via IPsec VPN tunnels. To manage routing and ensure that remote users can reach the correct internal subnets, Border Gateway Protocol (BGP) is used for dynamic route exchange.<sup>4</sup> This allows the hub to advertise internal prefixes to FortiSASE, enabling the PoPs to route user traffic effectively without requiring complex static route management.

\* Simplified Configuration: To reduce administrative overhead and prevent manual configuration errors on the FortiOS side, Fortinet introduced the SPA easy configuration key (also known as an invitation code or simplified SPA setup). An administrator generates this key in the FortiSASE portal and enters it on the FortiGate hub. This triggers the Fabric Overlay Orchestrator to automatically provision the necessary IPsec tunnels, BGP peerings, and firewall policies required for SPA connectivity.

According to the FortiSASE 25 Architecture Guide, this method is preferred over legacy VPNs because it supports both TCP and UDP traffic, integrates natively with existing SD-WAN deployments, and automatically finds the shortest path to applications using ADVPN (Auto-Discovery VPN) shortcuts where applicable.

#### NEW QUESTION # 59

An organization must block user attempts to log in to non-company resources while using Microsoft Office 365 to prevent users from accessing unapproved cloud resources.

Which FortiSASE feature can you implement to meet this requirement?

- A. data loss prevention (DLP) with Microsoft Purview Information Protection (MPIP)
- **B. application control with inline-CASB**
- C. web filter with inline-CASB
- D. DNS filter with domain filter

**Answer: B**

Explanation:

Application control with inline-CASB allows FortiSASE to inspect and control application behavior at a granular level. This enables the organization to block login attempts to personal or non- corporate Microsoft Office 365 accounts, ensuring that only approved cloud resources are accessed.

#### NEW QUESTION # 60

What are two benefits of deploying FortiSASE with FortiGate ZTNA access proxy? (Choose two.)

- **A. It supports both agentless ZTNA and agent-based ZTNA.**
- **B. It is ideal for latency-sensitive applications.**
- C. It offers data center redundancy.
- D. The on-premises FortiGate performs a device posture check.

**Answer: A,B**

Explanation:

Deploying FortiSASE with FortiGate ZTNA access proxy enables efficient access to private applications with reduced latency and supports both agentless and agent-based ZTNA methods for flexible access control.

#### NEW QUESTION # 61

.....

The learning material is open in three excellent formats, PDF, a desktop practice test, and a web-based practice test. Fortinet NSE7\_SSE\_AD-25 Dumps is organized by experts while saving the furthest down-the-line plan to them for the Fortinet

NSE7\_SSE\_AD-25 Exam. The sans bug plans have been given to you all to drift through the Fortinet NSE7\_SSE\_AD-25 certification exam.

**New NSE7\_SSE\_AD-25 Exam Review:** [https://www.dumpsactual.com/NSE7\\_SSE\\_AD-25-actualtests-dumps.html](https://www.dumpsactual.com/NSE7_SSE_AD-25-actualtests-dumps.html)

They work together and put all their expertise, knowledge, and experience and make sure the top standard of DumpsActual NSE7\_SSE\_AD-25 exam questions all the time, Through these tools you are going to make your future bright and then BrainDump NSE7\_SSE\_AD-25 latest audio training and latest Brain dumps NSE7\_SSE\_AD-25 computer based training can easily let you get prepared for the NSE7\_SSE\_AD-25 online computer based training and then you can have brilliant success in the exam, As for our service, we support “Fast Delivery” that after purchasing you can receive and download our latest NSE7\_SSE\_AD-25 certification guide within 10 minutes.

Regardless of your investing time frame, you must be NSE7\_SSE\_AD-25 willing to go with the market flow, It's also handy for adjusting color values using a curve, Theywork together and put all their expertise, knowledge, and experience and make sure the top standard of DumpsActual NSE7\_SSE\_AD-25 Exam Questions all the time.

## **Newest Fortinet NSE7\_SSE\_AD-25 Valid Test Cost Are Leading Materials & Authoritative NSE7\_SSE\_AD-25: Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator**

Through these tools you are going to make your future bright and then BrainDump NSE7\_SSE\_AD-25 latest audio training and latest Brain dumps NSE7\_SSE\_AD-25 computer based training can easily let you get prepared for the NSE7\_SSE\_AD-25 online computer based training and then you can have brilliant success in the exam.

As for our service, we support “Fast Delivery” that after purchasing you can receive and download our latest NSE7\_SSE\_AD-25 certification guide within 10 minutes, If you fail in NSE7\_SSE\_AD-25 Exam, you will get your fee refunded.

When you complete your payment, you will receive an email attached with NSE7\_SSE\_AD-25 - Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Reliable Braindumps practice pdf, then you can instantly download it and install on your phone or computer for study.
