EXAM INFORMATION GUIDE
ArcGIS® Pro Associate 2025

Exam Details

ArcGIS Pro Associate 2025

- Exam Questions: 75
- Exam Duration: 1 Hour, 30 Minutes
- Exam Format: Multiple Choice
- Exam Language: English
- Certification Code: EAPA 2025
- Exam State: Available to Public
 - Published Date: 3 January 2025
 - Visit [Esri Community](#) to learn more about this exam.

Exam Purpose

The ArcGIS Pro Associate Exam tests candidates' experience applying geospatial concepts and processes to workflows. The exam will test candidates' skills using ArcGIS Pro to manage, analyze, and manipulate geospatial data. It expects the candidates to have at least 2-4 years of applied experience using ArcGIS Pro.

Target Candidate Audience

The ArcGIS Pro Associate 2025 exam is intended for candidates with at least 2-4 years of ArcGIS Pro experience. Potential candidates' roles could include (but are not limited to) GIS Specialist, GIS Analyst, Senior GIS Analyst, and GIS Programming Specialist.

Description of a Qualified Candidate

Qualified candidates should demonstrate proficiency in geospatial (2D/3D) concepts and recommended practices in ArcGIS Pro. The candidate should be able to implement principles of data management, editing features, performing analysis, mapping and visualization, and sharing content across ArcGIS. Passing the exam provides an opportunity for candidates to validate their technical expertise in implementing ArcGIS Pro workflows.

Die Esri EAPA_2025 Prüfung zu bestehen ist eigentlich nicht leicht. Trotzdem ist die Zertifizierung nicht nur ein Beweis für Ihre IT-Fähigkeit, sondern auch ein weltweit anerkannter Durchgangsausweis. Auf Esri EAPA_2025 vorzubereiten darf man nicht blindlings. Die Technik-Gruppe von uns ExamFragen haben die Prüfungssoftware der Esri EAPA_2025 nach der Mnemotechnik entwickelt. Sie kann mit vernünftiger Methode Ihre Belastungen der Vorbereitung auf Esri EAPA_2025 erleichtern.

Esri EAPA_2025 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> • Calculation of the Paycheck: This section of the exam measures skills of Payroll Analysts and covers the detailed components involved in calculating employee pay. It focuses on regular and fringe compensation, tax calculations, and both involuntary and voluntary deductions. Candidates are required to accurately determine employer contributions and total payroll amounts to ensure precise and compliant paycheck processing.

Thema 2	<ul style="list-style-type: none"> • Compliance, Research, and Resources: This section of the exam measures the skills of Payroll Compliance Officers and covers the legal and regulatory framework governing payroll processes. It includes escheatment, legislative updates, and regulatory reporting requirements, along with proper record retention and penalty management. Candidates are also expected to understand multi-state taxation, reciprocity rules, and global payroll considerations while efficiently researching and applying compliance resources.
Thema 3	<ul style="list-style-type: none"> • Accounting: This section of the exam measures skills of Payroll Accountants and covers the financial principles tied to payroll reporting. It includes the preparation of payroll journal entries, application of accounting principles, and accurate financial reporting of payroll expenses. Candidates must ensure the integrity of payroll data within the organization's accounting systems and support financial audits through proper reconciliation and documentation.
Thema 4	<ul style="list-style-type: none"> • Payroll Process and Supporting Systems and Administration: This section of the exam measures skills of Payroll Systems Administrators and covers the operational and technical aspects of payroll management. It focuses on maintaining employee master files, understanding payroll system functionalities, and ensuring business continuity through effective technology use. Candidates must also demonstrate knowledge of system upgrades, maintenance, and project implementation within payroll environments.

EAPA_2025 Prüfungsfragen, EAPA_2025 Fragen und Antworten, ArcGIS Pro Associate 2025

Die Esri EAPA_2025 Prüfungsfragen und Antworten (EAPA_2025) von ExamFragen ist eine Garantie für eine erfolgreiche Prüfung! Bisher fällt noch keiner unserer Kandidaten durch! Falls jemand bei der Zertifizierungsprüfung durchfallen sollte, zahlen wir 100% Material-Gebühr zurück. Wir übernehmen die volle Geld-zurück-Garantie auf Ihre Zertifizierungsprüfungen! Unsere EAPA_2025 Fragen und Antworten (ArcGIS Pro Associate 2025) sind aus dem Fragenpool, alle sind echt und original.

Esri ArcGIS Pro Associate 2025 EAPA_2025 Prüfungsfragen mit Lösungen (Q53-Q58):

53. Frage

A GIS specialist has a street feature class and wants to add curves to show rounded curbs. The specialist wants to specify a fixed radius to make sure that all curbs are similar for the dataset.

Which Modify Features tool should the specialist use?

- A. Reshape
- B. Continue Feature
- **C. Fillet**

Antwort: C

Begründung:

The Fillet tool creates a rounded arc (curved corner) between two line segments using a specified radius. This ensures consistency in curb radius across all intersections or turns.

* Reshape (Option A) modifies segments but does not create consistent curves.

* Continue Feature (Option C) adds new segments to existing features but does not round or smooth curves.

Therefore, the correct answer is B.

54. Frage

A GIS analyst is trying to conduct overlay analysis using the Union tool but is unable to run the tool due to a red X in one of the parameters.

- A. Both input features are not polygon feature classes.
- **B. The environment settings for Processing Extent do not include the participating features.**

- C. The input features do not geometrically intersect.

Antwort: B

Begründung:

In ArcGIS Pro, a red X next to a parameter in a geoprocessing tool typically indicates an invalid input due to conflicts with the current environment settings. One of the most common causes is when the Processing Extent environment setting is configured in a way that excludes the actual input features.

The Union tool requires that input features fall within the set extent. If the Processing Extent does not cover any part of one or more input features, they are considered invalid and flagged with a red X, preventing the tool from running.

The software checks whether all input features are accessible within the defined extent. If they are not, this pre-validation error is triggered—even if the inputs are valid in terms of geometry or feature type.

* Option A is incorrect because geometrical intersection is not a requirement for Union to run—it simply overlays features and includes all areas.

* Option C is also incorrect, as the Union tool does indeed require polygon feature classes, but if incorrect feature types are used, a different error (not a red X related to extent) is shown.

This confirms that the red X in this scenario is caused by the Processing Extent settings not including the input features, making the correct answer B.

55. Frage

A GIS technician has crop field data and is working with a dimension feature class. The technician wants to get measurements for all features from the same starting location.

Which editing tool should the technician use to complete the task?

- A. Baseline aligned
- B. Continue dimensions
- C. Simple aligned

Antwort: A

Begründung:

The Baseline Aligned dimension tool is used when multiple measurements need to originate from a common baseline. This is exactly the case when measuring multiple crop fields from the same starting location, ensuring consistent and aligned measurements across features.

* Simple Aligned creates individual dimension lines between two points but not aligned from a single baseline.

* Continue Dimensions adds dimensions that continue from the endpoint of the previous dimension but is not intended for measurements from a common baseline.

* Baseline Aligned properly anchors all measurements to the same origin point.

Therefore, the correct answer is B.

-

56. Frage

Which workflow should be used to create a new dataset from a selection?

- A. In the Contents pane > Layer > Data > Export Features
- B. In the Catalog pane > Export > Feature Class To Feature Class
- C. In the Catalog pane > Export > Feature Class To Geodatabase

Antwort: A

Begründung:

When you have selected features in a map layer and want to create a new dataset containing only those selected features, the proper workflow is to right-click the layer in the Contents pane, go to Data > Export Features. This process honors the current selection set and creates a new feature class based on that selection.

* The Catalog pane (Options A and C) exports entire datasets and doesn't apply the selection set directly.

* Export Features (Option B) directly works with selected features and generates a new dataset from them.

Therefore, the correct answer is B.

-

57. Frage

In ArcGIS Pro, which tool should be used to change the coordinate system of a dataset to a different coordinate system?

- A. Convert Coordinate Notation
- B. Define Projection
- C. Project

Antwort: C

Begründung:

The Project tool is used to permanently convert data from one coordinate system to another, recalculating coordinates to match the new spatial reference.

* Define Projection assigns a spatial reference to datasets that do not have one but does not transform coordinates.

* Convert Coordinate Notation converts coordinate formats (such as MGRS, UTM, DMS) but not spatial references.

Therefore, the correct answer is B.

-

58. Frage

.....

Die Esri EAPA_2025 Zertifizierungsprüfung ist eigentlich eine Prüfung für die Technik-Experten. Die Esri EAPA_2025 Zertifizierungsprüfung kann den IT-Fachleuten helfen, eine bessere Berufskarriere zu haben. So können Sie dem Staat und Unternehmen große Gewinne bringen und die wirtschaftliche Entwicklung unseres Landes fördern. Wenn alle Fachleute das machen, ist unser Staat sicher reicher geworden. Unsere Schulungsunterlagen zur Esri EAPA_2025 Zertifizierungsprüfung können dieses Ziel der IT-Fachleute erreichen. Wir versprechen, dass Sie 100% die Prüfung bestehen können. Wenn Sie lange denken, ist es besser entschlossen eine Entscheidung zu treffen, die Schulungsunterlagen zur Esri EAPA_2025 Zertifizierungsprüfung von ExamFragen zu kaufen.
