CIS-Discovery VCE Dumps & CIS-Discovery Authorized Test Dumps

You can download the trial version free of charge on our product website so that you can not only see if our CIS-Discovery study materials are suitable for you, but also learn the details of our study materials and experience how to use them. Then you can know exactly the performance of our CIS-Discovery Preparation practice, including the quality, applicability and function of our products.

Therefore, you will know clearly whether our CIS-Discovery learning braindumps are useful to you.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q116-Q121):

NEW QUESTION # 116
What would be the best practice if we want to create a pattern to discover a custom application whose port communicates with a different server?
Response:

- A. We should select Target Port and IP as the Find Process Strategy.
- B. We should select Listening Port as the Find Process Strategy.
- C. We should remember to never use port 8080.
- D. We should never use Debug in this case.

Answer: A

NEW QUESTION # 117
When configuring the MID Server Service Settings, which of the following is not a valid MID Server name?

- A. mymidserverl
- B. midserverl
- C. mid.serverl
- D. mid serverl

Answer: D

Explanation:
In configuring the MID Server Service Settings in ServiceNow, the MID Server name must adhere to certain naming conventions. Among the options provided, "mid server1" (D) is not a valid MID Server name because it contains a space. MID Server names should not include spaces or special characters that are not typically used in naming conventions. Names like "mymidserver1," "mid.server1," and "midserver1" are more in line with the standard naming practices. References = ServiceNow MID Server documentation, specifically the sections detailing MID Server configuration and naming conventions.

NEW QUESTION # 118
Which of the following choices explain differences between Service Mapping and Discovery? (Choose two.)

- A. Discovery finds applications and devices on your network, Service Mapping monitors those devices.
- B. Discovery addresses inventory-related use-cases, while Service Mapping allows for the creation of accurate maps of application service topologies.
- C. Discovery requires agent installation to find hardware devices, Service Mapping requires agents for software.
- D. Discovery utilizes IP address ranges for initial discovery, Service Mapping uses entry points.

Answer: B,D

Explanation:
Discovery and Service Mapping are both products that help to identify and map the IT infrastructure and services in an organization. However, they have different approaches and objectives. Discovery uses IP address ranges as the starting point for finding devices and applications on the network, and then runs probes and sensors to collect information and classify them. Discovery focuses on inventory-related use-cases, such as asset management, configuration management, and compliance. Service Mapping uses entry points, such as URLs or host names, as the starting point for mapping business services and their dependencies. Service Mapping runs patterns, which are sequences of operations that follow the traffic connections between devices and applications, and then creates a service map that shows the logical and semantic relationships. Service Mapping focuses on service-related use-cases, such as service availability, impact analysis, and root cause analysis12.

NEW QUESTION # 119
Which of the following choices may be global variables for steps in horizontal discovery patterns? (Choose two.)

- A. process
- B. baseline
- C. system
- D. computer_system

Answer: C,D

Explanation:
Global variables are variables that are automatically available for all steps in horizontal discovery patterns.
They store information about the target CI, such as its IP address, host name, operating system, and credentials. There are two global variables that may be used for steps in horizontal discovery patterns: system and computer_system. The system variable contains the information about the target CI's IP address, host name, and credentials. The computer_system variable contains the information about the target CI's operating system, such as its name, version, and architecture12.

NEW QUESTION # 120
During the Discovery process, what determines if an Asset record is created?

- A. Model Category
- B. Model Product
- C. ECC Queue
- D. Configuration Item
- E. CMDB

Answer: A

Explanation:
During the Discovery process, the Model Category of the Configuration Item (CI) determines if an Asset record is created. A Model Category is a grouping of models that share the same asset tracking strategy and the same CI and Asset tables. The asset tracking strategy defines whether Discovery creates an Asset record for each CI of that Model Category. There are three possible asset tracking strategies: Create Assets, Don't create Assets, and Create Consumable Assets12.
:
1: ServiceNow Discovery Documentation, Model Categories section
2: ServiceNow Support Article, Why do Assets get created when inserting a CI that has a Model that is set to Don't create Assets?

NEW QUESTION # 121
......

You have tried all kinds of exam questions when others are still looking around for CIS-Discovery exam materials, which means you have stayed one step ahead of other IT exam candidates. CIS-Discovery Exam software provided by our UpdateDumps consists of full exam resources will offer you a simulation of the real exam atmosphere of CIS-Discovery.

CIS-Discovery VCE Dumps: https://www.updatedumps.com/ServiceNow/CIS-Discovery-updated-exam-dumps.html

Using our ServiceNow CIS-Discovery practice test software, you can prepare for the increased difficulty on ServiceNow CIS-Discovery exam day, We make sure that candidates are not preparing for the ServiceNow CIS-Discovery exam from outdated and unreliable CIS-Discovery study material, With the help of our ServiceNow CIS-Discovery exam dumps, you will pass your exam with ease, Getting ServiceNow Certified Implementation Specialist CIS-Discovery IT certification is setting the pathway to the height of your career.

Those service packs are also made available by themselves because they CIS-Discovery Latest Test Simulations contain very valuable fixes and optimizations, and they are designed to be fully backward-compatible so as not to break existing code.

ServiceNow CIS-Discovery Exam Practice Questions are Real and Verified

By Experts

In many concurrent applications, relatively few threads are actually CIS-Discovery Authorized Test Dumps runnable at any given time others are all blocked in some way) in which case there is little reason to manipulate priorities.

Using our ServiceNow CIS-Discovery Practice Test software, you can prepare for the increased difficulty on ServiceNow CIS-Discovery exam day, We make sure that candidates are not preparing for the ServiceNow CIS-Discovery exam from outdated and unreliable CIS-Discovery study material.

With the help of our ServiceNow CIS-Discovery exam dumps, you will pass your exam with ease, Getting ServiceNow Certified Implementation Specialist CIS-Discovery IT certification is setting the pathway to the height of your career.

And the case of nervous will be left outside CIS-Discovery by Certified Implementation Specialist - Discovery study torrent, which means that you are able to take the exam as common practice and join the exam with ease, CIS-Discovery Authorized Test Dumps which will decrease the risk to protect you pass the Certified Implementation Specialist - Discovery actual exam.
