

# **NSE7\_SSE\_AD-25 Practice Exam, Download NSE7\_SSE\_AD-25 Pdf**

The experts in our company are always keeping a close eye on even the slightest change on the NSE7\_SSE\_AD-25 exam questions in the field. Therefore, we can assure that you will miss nothing needed for the NSE7\_SSE\_AD-25 exam. What's more, the latest version of our NSE7\_SSE\_AD-25 Study Materials will be a good way for you to broaden your horizons as well as improve your skills. You will certainly obtain a great chance to get a promotion in your company.

There are three formats of Dumpleader practice material. Anyone can try a free demo to assess the quality of our Fortinet product before buying. The Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) PDF file of actual questions, web-based Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator practice exam, and desktop practice test are three formats of Dumpleader. The NSE7\_SSE\_AD-25 PDF Questions are printable which means you can do off-screen study.

## **Reliable NSE7\_SSE\_AD-25 Practice Exam offer you accurate Download Pdf | Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator**

As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time. In order to help all customers gain the newest information about the NSE7\_SSE\_AD-25 exam, the experts and professors from our company designed the best NSE7\_SSE\_AD-25 test guide. The experts will update the system every day. If there is new information about the exam, you will receive an email about the newest information about the NSE7\_SSE\_AD-25 Learning Materials. We can promise that you will never miss the important information about the NSE7\_SSE\_AD-25 exam.

## **Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q44-Q49):**

### **NEW QUESTION # 44**

Refer to the exhibits. How will the application vulnerabilities be patched, based on the exhibits provided?

□

- A. The vulnerability will be patched by installing the patch from the vendor's website.

- B. The vulnerability will be patched automatically based on the endpoint profile configuration.
- C. The end user will patch the vulnerabilities using the FortiClient software.
- D. An administrator will patch the vulnerability remotely using FortiSASE.

**Answer: D**

Explanation:

The "Automatically patch vulnerabilities" option is disabled in the endpoint profile. Additionally, the Vulnerability Dashboard shows the patching status as "Manual patching required." This means an administrator must manually initiate the patching process remotely using FortiSASE.

**NEW QUESTION # 45**

Refer to the exhibits.

□ A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub. The VPN tunnel does not establish. Based on the provided configuration, what configuration needs to be modified to bring the tunnel up?

- A. The hub needs IKEv2 enabled in the IPsec phase 1 settings.
- B. The BGP router ID needs to match on the hub and FortiSASE.
- C. NAT needs to be enabled in the Spoke-to-Hub firewall policy.
- D. FortiSASE spoke devices do not support mode config.

**Answer: D**

Explanation:

The VPN tunnel between the FortiSASE spoke and the FortiGate hub is not establishing due to the configuration of mode config, which is not supported by FortiSASE spoke devices. Mode config is used to assign IP addresses to VPN clients dynamically, but this feature is not applicable to FortiSASE spokes.

\* Mode Config in IPsec:

\* The configuration snippet shows that mode config is enabled in the IPsec phase 1 settings.  
\* Mode config is typically used for VPN clients to dynamically receive an IP address from the VPN server, but it is not suitable for site-to-site VPN configurations involving FortiSASE spokes.

\* Configuration Adjustment:

\* To establish the VPN tunnel, you need to disable mode config in the IPsec phase 1 settings.  
\* This adjustment will allow the FortiSASE spoke to properly establish the VPN tunnel with the FortiGate hub.

\* Steps to Disable Mode Config:

\* Access the VPN configuration on the FortiSASE spoke.  
\* Edit the IPsec phase 1 settings to disable mode config.  
\* Ensure other settings such as pre-shared key, remote gateway, and BGP configurations are correct and consistent with the FortiGate hub.

References:

FortiOS 7.6 Administration Guide: Provides details on configuring IPsec VPNs and mode config settings.

FortiSASE 23.2 Documentation: Explains the supported configurations for FortiSASE spoke devices and VPN setups.

**NEW QUESTION # 46**

Refer to the exhibits.

□ An endpoint is assigned an IP address of 192.168.13.101/24. Which action will be run on the endpoint?  
(Choose one answer)

- A. The endpoint will be detected as off-net.
- B. The endpoint will be exempted from auto-connect to the FortiSASE tunnel.
- C. The endpoint will automatically connect to the FortiSASE tunnel.
- D. The endpoint will be able to bypass the on-net rule because it is connecting from a known subnet.

**Answer: B**

Explanation:

Based on the provided exhibits and the logic of FortiSASE On/off-net detection, the endpoint's behavior is determined by its network environment relative to the configured rules.

\* Subnet Matching and Detection: The On-net rule set (named "On-Premises") is configured to identify a trusted location when the

endpoint "Connects from a known local subnet". The administrator has defined the known subnet as \$192.168.13.0/24\$. Since the endpoint's IP address is

\$192.168.13.101\$, it falls within this range. Consequently, FortiClient detects the endpoint as being on- net (on-fabric).

\* Action Logic (Exemption): In a FortiSASE Endpoint Profile, when On/off-net detection is enabled and an endpoint matches an "On-net" rule, the standard behavior is to exempt the endpoint from auto- connecting to the FortiSASE VPN tunnel. This design assumes the endpoint is already in a secured office environment where the corporate firewall (FortiGate) provides the necessary protection, making the SASE tunnel redundant.

\* Comparison of Other Options: \* Option B: Incorrect, because the IP matches the defined "known local subnet" rule for on-net detection.

\* Option D: Incorrect, as auto-connect only triggers when the endpoint is detected as off-net to ensure remote security.

#### NEW QUESTION # 47

Which two components are part of onboarding a secure web gateway (SWG) endpoint? (Choose two)

- A. proxy auto-configuration (PAC) file
- B. FortiSASE invitation code
- C. FortiClient installer
- D. FortiSASE CA certificate

**Answer: A,D**

Explanation:

Onboarding a Secure Web Gateway (SWG) endpoint involves several components to ensure secure and effective integration with FortiSASE. Two key components are the FortiSASE CA certificate and the proxy auto-configuration (PAC) file.

\* FortiSASE CA Certificate:

\* The FortiSASE CA certificate is essential for establishing trust between the endpoint and the FortiSASE infrastructure.

\* It ensures that the endpoint can securely communicate with FortiSASE services and inspect SSL/TLS traffic.

\* Proxy Auto-Configuration (PAC) File:

\* The PAC file is used to configure the endpoint to direct web traffic through the FortiSASE proxy.

\* It provides instructions on how to route traffic, ensuring that all web requests are properly inspected and filtered by FortiSASE.

References:

FortiOS 7.6 Administration Guide: Details on onboarding endpoints and configuring SWG.

FortiSASE 23.2 Documentation: Explains the components required for integrating endpoints with FortiSASE and the process for deploying the CA certificate and PAC file.

#### NEW QUESTION # 48

Refer to the exhibit.

□ Which type of information or actions are available to a FortiSASE administrator from the following output?

(Choose one answer)

- A. Administrators can view application details, such as vendor, version, and installation dates to identify unwanted or outdated software.
- B. Administrators can view latest application version available and push updates to managed endpoints.
- C. Administrators can view and configure endpoint profiles and ZTNA tags.
- D. Administrators can view and configure automatic patching of endpoints, and first detected date for applications.

**Answer: A**

Explanation:

The provided exhibit (image\_57e69d.jpg) displays the Software Installations dashboard within the FortiSASE portal. This dashboard is a key component of the endpoint visibility and management features provided by the integrated FortiClient EMS functionality.

\* Visible Metadata: The output provides a granular list of all software detected on managed endpoints, including the application Name, the Vendor (e.g., Igor Pavlov, Microsoft Corporation, Adobe), the specific Version currently installed, and critical timestamps such as First Detected and Last Installed.

\* Administrative Utility: This information allows an administrator to audit the software environment effectively. By reviewing these details, they can identify unwanted software (PUA), shadow IT, or outdated software versions that may possess known

vulnerabilities.

\* Actions Available: While the primary view is informational, the presence of the View Endpoints button (visible in the top-left) allows administrators to pivot from a specific application to a list of all individual devices where that software is present, facilitating targeted remediation.

\* Analysis of Incorrect Options:

\* Option A: While FortiSASE manages profiles and tags, this specific "Software Installations" view is focused purely on software inventory.

\* Option B: Although the "First Detected" date is visible, FortiSASE does not support "automatic patching" of third-party software directly from this inventory screen.

\* Option C: The dashboard shows what is installed, not the "latest available" version in the market, nor does it provide a mechanism to "push updates" to these third-party applications.

## NEW QUESTION # 49

.....

Our NSE7\_SSE\_AD-25 study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the NSE7\_SSE\_AD-25 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our NSE7\_SSE\_AD-25 study engine.
